# REPORT

OF THE

# STATE BOARD OF EDUCATION,

AND

State Superintendent of Public Instruction,

FOR THE SCHOOL YEAR ENDING AUGUST 31, 1870.

974.401 E31

# MEMBERS OF THE STATE BOARD OF EDUCATION,

#### 1870.

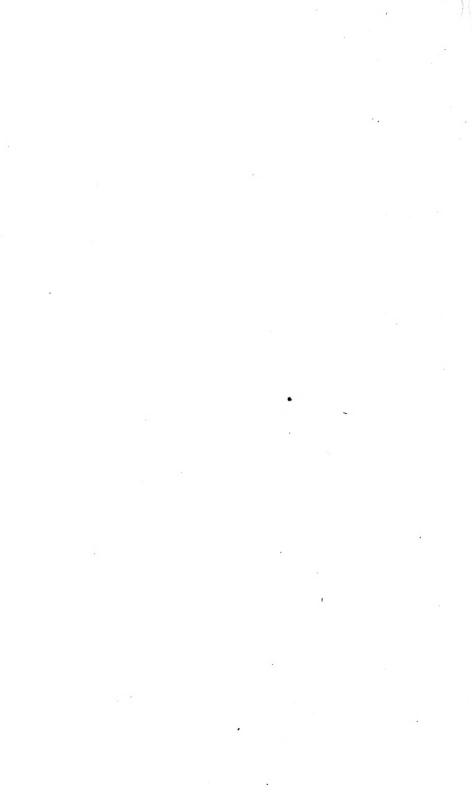

His Excellency, THEODORE F. RANDOLPH, Governor, Morristown.
Hon. ROBERT GILCHRIST, Attorney-General, Jersey City.
Hon. WILLIAM K. McDONALD, State Comptroller, Newark.
Hon. HENRY C. KELSEY, Secretary of State, Trenton.
Hon. AMOS ROBINS, President of the Senate, New Brunswick.
Hon. LEON ABBETT, Speaker of the Assembly, Jersey City.
JOHN MCLEAN, D. D., LL. D., Princeton,
THOMAS LAWRENCE, Esq., Hamburg,
WILLIAM A. WHITEHEAD, Esq., Newark,
BENJAMIN WILLIAMSON, Esq., Elizabeth,
BENNINGTON F. RANDOLPH, Esq., Jersey City,
J. F. LEAMING, M. D., Cape May C. H.,
JOEL PARKER, Esq., Freehold,
RYNIER H. VEGHTE Esq. Somerville,
JOHN M. HOWE, M. D., Passaic,
CHARLES E. ELMER, Esq., Bridgeton,
ELIAS COOK, Esq., Treasurer of the State Normal School, Trenton.

#### OFFICERS:

President—His Excellency, THEODORE F. RANDOLPH.
Vice-President—WILLIAM A. WHITEHEAD, Esq.
State Superintendent and (ex-officio) Secretary—ELLIS A. APGAR.

#### EXECUTIVE COMMITTEE:

JOHN MACLEAN, D. D., LL. D., CHARLES E. ELMER, Esq., WILLIAM A. WHITEHEAD, Esq., Hon. HENRY C. KELSEY, Hon. WILLIAM K. McDONALD.

# REPORT OF THE STATE BOARD OF EDUCATION.

TRENTON, DECEMBER 1st, 1870.

To the Legislature.

The State Board of Education, by virtue of the fourth section of the act by which they were created, beg leave to report that the public schools throughout the State were never before so prosperous in attendance, in instruction and in discipline.

The important office of Superintendent is now filled in every county, and the entire machinery of the school system, as established by law, is working with less friction than its warmest friends had ever antici-

nated.

The Superintendent of Public Instruction has his office in the State House, and is active and faithful in the discharge of his duties. The regular meetings of the Board, as well as special meetings convened for the purpose of filling vacancies in the Office of Superintendent in certain counties, have been well attended, and the action of the Board itself has alway been harmonious, and generally unanimous.

The number of children between the ages of five and eighteen years enrolled in the public schools of the State for the year 1870,

was 161,683, and the cost for the same year was \$1,664,659.03.

These moneys were provided as follows, to wit: By the 76th section of the school law, the several townships are authorized and required to raise by tax, in addition to the public moneys apportioned to them a sum not less than two dollars, nor more than four dollars, for each child in the township between the ages aforesaid. Last year this tax amounted to \$462,955.24.

The 80th section of the same law provides that the legal voters of the school district may, by a majority of two thirds of those present, raise such an additional sum for school purposes as they may deem expedient; last year this district tax amounted to \$989,914.89, which includes \$619,311.25 appropriated by certain cities having Boards of

Education of their own.

These taxes added to the State appropriation, the receipts from surplus revenue and tuition fees, make up the aforesaid aggregate of \$1,664,659.03.

The tuition fees collected in 1870 amounted to \$71,866.02. But why so? Why should the parent or guardian of any child in the public schools be charged tuition fees? They are not so charged in the cities of the State, nor in many of its villages and towns; of the 1458 school districts, 807 are free, but little more than fifty per cent.

It is believed that all the public schools of the State should be on the same footing—should be kept open during eight or ten months of the year, and the expenses thereof should be defrayed by taxation.

Life, liberty and property, are subjects of special supervision at common law, and it is certainly true that, in free States especially, their protection ultimately depends upon the intelligence of the people. This is true of personal rights, and also true of civil rights, and no republican government can stand, or stand long, without virtue and intelligence in the great masses of the governed. These form the only base upon which can securely rest a government of limited powers without which, however admirable in other respects may be the structure, the republic will resemble the famous palace of the sun, whose resplendent columns of jasper and of porphry reposed upon no pedestal—no surer foundation than the shifting sands.

"If the minimum township school tax to be assessed were raised to four dollars each child, instead of two dollars, and the maximum amount of four dollars raised to six dollars, the schools could be kept open eight or ten months during the year, and tuition fees would be no longer required. The same result would be attained by a State tax in lieu of township and district school taxes. But this board insist upon neither of these plans, or upon any other plan: they only appeal to the Legislature to make the public schools free to every child of

the proper age, by any action their wisdom may suggest.

During the past year the Vice President of this Board has been removed from its councils by death. This is more than a loss—it is a calamity. Public education has never had, in New Jersey, a more earnest and intelligent friend than Judge Field. He labored in its interests, in season and out of season, and was ever ready to spend his time his strength, and his substance, in its behalf. In former years he went into different sections of the State, and addressed the people on the subject of public instruction, and thereby endeavor to animate the popular heart with some portion of the enthusiasm which fired his own.

He was a member of this Board, and of the Normal School Board, from their beginning; and, as President of the latter, on more than one occassion, read before the Legislature the annual report, which he himself had drafted. At his solicitation, and by the force of his personal influence the Legislature, in 1857, voted \$1,200 annually, to the Farnum School at Beverly, and thereby established it as a feeder to the Normal School.

In these labors of love he was without rival or peer, and this Board, bereft of his services in the strength of his years and the matnrity of his powers, can only hope to fill his place with one whose breadth of experience and ardor, of zeal and fullness of knowledge, shall equal those attributes of their late associate; but the "the place of a finished man in not easily supplied."

THEO. F. RANDOLPH,

President, &c.

STATE OF NEW JERSEY,
DEPARTMENT OF PUBLIC INSTRUCTION,
TRENTON, November 15, 1870.

To His Excellency THEODORE F. RANDOLPH,

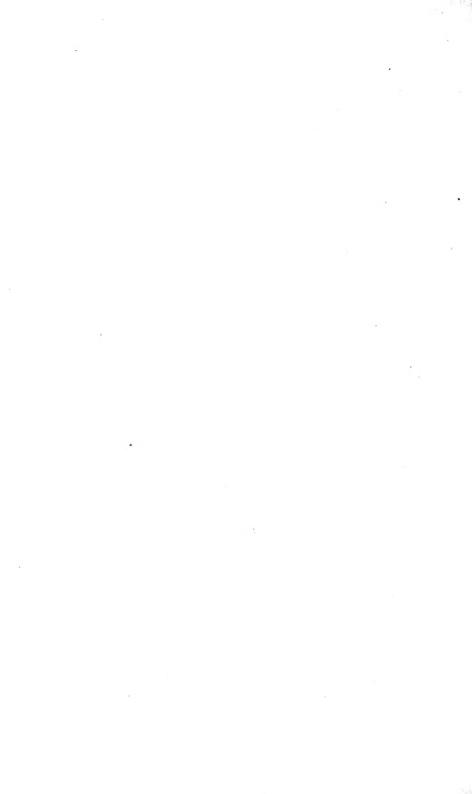

Governor of the State of New Jersey:

Six:—In conformity to law, I have the honor herewith to transmit my annual report respecting the condition of the Public Schools of the State for the School Year ending August 31, 1870.

Yours respectfully,

ELLIS A. APGAR,

State Superintendent of Public Instruction.

## REPORT OF THE STATE SUPERINTENDENT.

Department of Public Instruction, Trenton, N. J., November 15, 1870.

To the Honorable, the Members of the State Board of Education:

Gentlemen:—In obedience to the requirements of the school law, I have the honor to present to you the following report of the workings of the public school system in the State of New Jersey, for the school year ending August 31, 1870.

The following is a brief summary of the amount of money received from various sources and appropriated for the support of public educa-

tion during the year:

State appropriation,	\$100,000	00
Township school tax,	462,955	
District school tax,	989,914	89
Surplus revenue,	28,722	88
Tuition fees collected,	71,866	02
Appropriation for Normal and Farnum Schools,	11,200	00
•••		
Total	\$1,664,659	03

In the following table a general summary of statistics for this year is given and compared with similar statistics of last year:

## SUMMARY OF STATISTICS.

	1869.	1870.	Increase or Decrease.

#### REVENUE.

By reference to the financial statement given, it will be seen that the total amount of money received from all sources, and expended for public school purposes during the past year was \$1,664,659.03; being an increase \$111,323.28 over the total amount raised for the same purpose last year. The total revenue for 1866, four years ago, was \$746,794.24, from which it appears that the total increase since that time has been more than 122 per cent. The increase over last year in the amount of township school tax raised is \$39,086.38; of district school tax, \$74,560.50; and of surplus revenue, \$1,183.42; while in the amount raised by tuition fees, it is very gratifying to state, there has been a decrease of \$3,691.67. This decrease should be larger; in fact, it is time our schools were supported without tuition fees, but the mere fact that there has been a decrease in the amount of money collected in this manner shows that we at least are tending in the right direction in obtaining support for our schools.

The counties which report an increase in the total school revenue, over that of last year, are Atlantic, Burlington, Camden, Cape May,

Cumberland, Hunterdon, Middlesex, Monmouth, Morris, Passaic, Som-

erset, Sussex, Union and Warren.

If from the total revenue this year, we subtract the surplus revenue, the amount appropriated by the State, and the amount of tuition fees collected, we have remaining \$1,464,070.13, a sum which has been raised entirely by local taxation, either by township tax or district tax, and the greater portion of this amount has been self imposed.

#### ATTENDANCE.

The total number of children in the State, between the ages of five and eighteen years is 258,227, being an increase of 13,544 over last year's census. The total number reported as attending the public schools during the whole or some portion of the year is 161,683; those attending private schools, 32,447, and those attending no school, either public or private, 55,010. By comparing the attendance this year with that of last year, we find but little difference.

There has been a slight decrease, however, in the percentage attending the public and private schools, and necessarily, a corresponding increase in the number attending no school. For convenience I place

below this comparison, in tabular form:

	1869.   1	870.
Percentage attending the public schools,	.66	.65 .01 decrease.
Percentage attending the private schools,	.14	.13 .01 "
Percentage attending no school,	.20	.22 .02 increase.

Although the percentage attending the public and the private schools since last year has decreased, yet the actual number attending these two classes of schools has increased, the increase, however, has not kept pace with the increase in the total number of children in the State. The increase attending public schools has been 8,888; attending to the last the last total number of children in the state.

ing private schools, 1,078; attending no school, 9,589.

The number reported has having attended no school during the year, appears large, but it must be remembered that this number includes many children between five and seven years of age, who are considered too young to attend, and many, also, who are between fifteen and eighteen years of age, who have probably received a fair education and have been withdrawn from school to engage in some of the duties of life.

The total attendance, or percentage of attendance upon our public schools, is probably as great as we have reason to expect, and it may not be necessary for us to discuss measures for increasing it, but I do desire to call the attention of school officers and friends of education

to the lamentable evils of irregular attendance. Below, I give in tabular form, the percentage of attendance in the State for different periods of the year:

Percentage attending ten months	.09
Percentage attending between eight and ten months	. 13
Percentage attending between six and eight months	. 17
Percentage attending between four and six months	.21
Percentage attending less than four months	.40
Percentage of average attendance	

That the average attendance upon our public schools is only fortynine per cent., that the number attending ten months during the year is only nine per cent. of the number enrolled, and that the number who attend less than four months during the entire year is forty per cent., must be recognized as evils which deserve our most serious attention, and which call for some efficient remedy. We are failing to accomplish the object for which public schools are established, and a great portion of the money expended for their support is certainly wasted if forty per cent., or nearly one-half of the children enrolled in these schools, attend less than four months during the It is not necessary for me to cite the evils of irregular attend-There is no one but knows that a child cannot possibly succeed in his studies to any advantage to himself or credit to his parents if he is absent from his school in class one-half, three-fourths, or nine-tenths of his time. If circumstances are so that a child can attend school at all, he should be with his class every day. This irregularity of attendance I believe wholly unnecessary. The blame is undoubtedly due in a great measure to the parents, who on account of some poor reason of their own, or some foolish pretext of their children, allow them to remain at home, without at once considering the injury they thereby are inflicting, not only upon the children themselves, but also upon the community, which always suffers in proportion to the ignorance of those who make or who are to make its citizens. This evil, undoubtedly, can be remedied in part by making our school houses more attractive and comfortable, by lengthening our school terms and by making our schools free.

#### OUTHOUSES.

In my report last year, for the first time, was given the condition of the outhouses connected with the public schools of the State. I there pointed out the shameful condition these buildings were in throughout some of the counties. I have now the pleasure of reporting a marked improvement in this matter. Last year the number of school houses with suitable outhouses was 884; this year it is 947, showing an increase of 63. The number with indifferent outhouses, last year, was

435; this year it is 423, showing a decrease of 12. The number with no outhouses, last year was 190; this year it is 152, being a decrease of 38. Thus, during the year, besides the new school houses, with the necessary outbuildings, which have been erected, thirty-eight school houses have been supplied with outhouses, which, before, had none; and twelve outhouses have been repaired, which before were pronounced unsuitable. The greatest improvement, in this line, has been made in the counties of Atlantic, Cumberland and Monmouth. Last year Atlantic reported thirty-three school houses without outhouses, Cumberland twenty-one, and Monmouth twelve. This year Atlantic reports fourteen, Cumberland sixteen, and Monmouth six.

Improvements are still needed in the counties of Atlantic, Burlington, Cumberland, Hunterdon, Monmouth, Morris, Ocean, Sussex, and Warren, and it is hoped that the county superintendents in these counties will endeavor to have this evil corrected before another

report is required to be made.

#### SCHOOL TERMS.

The average length of time the schools of the State have been kept open during the year is eight months and fourteen days; last year it was eight months and sixteen days. In Hudson County they were kept open the greatest number of days, both last year and this, the average being ten months and twelve days each year; and the least number of days they were kept open was in Cape May county for both years, the average last year being seven months and eighteen days, and this year eight months. During the past year the schools were kept open less than five months in fifty-seven districts; between five and eight months in three hundred and sixty-seven districts, and more than eight months in one thousand and thirty-four districts. figures differ but little from those given last year. In respect to the number of schools that have been kept open less than five months, the minimum time prescribed by law, Burlington and Sussex each report seven; Warren, six; Atlantic, Cumberland, and Salem, each five; Ocean, four; Middlesex, three; and Cape May, Hunterdon, Monmouth, Morris, and Passaic, each two.

#### TEACHERS AND TEACHERS' WAGES.

The following tabular statement gives a comparative view of the number of teachers, both male and female, employed in the State last year and this, and also the average salary paid:

	1869.	1870.
Number of male teachers employed	1670	1905

By inspecting the above table, it will be seen that since last year there has been a decrease of twenty-six in the number of male teachers employed in the State, and an increase of two hundred and thirty-five in the number of females employed. This decrease in the number of male teachers and a corresponding increase in the number of females engaged in our schools has been going on for several years past, and each succeeding report reveals more and more conclusively the fact that the time is not far distant when we must depend almost entirely upon female teachers to educate our children. Nor is this fact to be deplored. Indeed, as far as my observation goes, I have always found that those schools which are under the exclusive charge of females compare favorably, both in discipline and scholarship, with those taught by male teachers. The willingness of women to work for low wages has, undoubtedly, induced trustees to engage them more exclusively, but at the same time it must be admitted by all that the schools of the present day are superior to those of former times. I do not contend that female teachers are always better than male teachers, nor that a first class female is better than a first class male — upon this point, there being no occasion, I express no opinion—but I do contend that a female teacher who can be employed for from four hundred to six hundred dollars per year, the wages usually paid in our rural districts, is far more likely to succeed and do justice to a school than the male who can be employed for the same amount. For that sum a first class female can usually be employed, but a male teacher who has no higher ambition than teach for such wages is not likely to be rated better than second or third class, and whatever difference there may be in the opinions entertained respecting the comparative merits between first class females and first class males, there can be no question but that a first class female is more to be desired in our schools than an inferior male. Notwithstanding this fact, there are hundreds of districts throughout the State which are still pursuing the blind policy of employing such males as they can get for these wages in preference to the excellent females who can be obtained for a similar amount.

The table already given shows a hopeful increase in the wages paid both to male and to female teachers. The average increase paid to males during the past year over that paid last year has been three dollars and fourteen cents per month; to females, one dollar and three cents per month. The highest average salary, both to male and female teachers, is paid in Hudson county; to males it is \$112.82 per

month, and to females it it \$47.64 per month. The lowest average salary to males is paid in Sussex county, being \$38.00 per month, and the lowest paid to females is in Passaic county, being \$23.00 per month.

#### COST OF PUBLIC EDUCATION.

The average annual cost per pupil for education in the public schools of the state for the past year was \$15.00. This is an increase of seventy-four cents per pupil over last year's expenses. This average cost is obtained by dividing the entire expenses of maintaining the schools, not including moneys paid for building and repairs, by the average attendance. It is evident that no other system of schools could be established which would afford an opportunity of obtaining an education for so slight an expense as the system established and supported by the State.

In Hudson county the average cost per pupil was \$20.00; in Somerset, \$18.30; in Hunterdon, \$17.25; in Bergen, \$17.00. In the remaining counties the cost ranges from \$17.00 to \$10.00, the annual cost per pupil in Cape May county. The average cost per child, including as the basis the entire school census, was, \$4.55 for

the State.

#### SCHOOL HOUSES.

There are in the State 1,458 school districts, 1,522 school buildings, and 2,371 school departments. During the past year, 58 new school buildings have been erected, and sixty have been remodeled, refurnished or enlarged. Of the new school houses erected, seven are in Burlington county; seven in Monmouth; six in Cumberland; five in Union; four in Hudson; three each in Bergen, Camden, Essex, Hunterdon, Passaic, Sussex and Warren; two each in Mercer and Middlesex, and one each in Gloucester, Ocean, Salem, and Somerset.

Not only has there been a good work done in the State during the past year in the way of erecting new school houses, but the character of those before established has been materially improved and their value increased. This is clearly shown in the following statement in which is given the value of the school houses as

compared with their value last year.

•	1869.	1870.
Number of school buildings valued at \$100 or less		98
Number valued between \$100 and \$500		547
Number valued between \$500 and \$1,000	357	393
Number valued between \$1,000 and \$5,000	336	-358
Number valued between \$5,000 and \$10,000	39	58
Number valued between \$10,000 and \$20,000		24
Number valued above \$20,000		44

From the above statement it appears that there has been a decided and gratifying decrease in the number of poor school houses in the State, and also an increase in the number of good ones. In the number valued at \$100 or less each, there has been a decrease of twelve; in those valued between \$100 and \$500, there has been a decrease of fifty. In those valued between \$500 and \$1,000, there has been an increase of thirty-six; in those valued between \$1,000 and \$5,000, an increase of twenty-two; and in those valued between \$5,000 and \$10,000, an increase of nineteen. In those valued between \$10,000 and \$20,000, there is a reported decrease of eight, but in those valued above \$20,000, there is an increase of six.

Of the ninety-eight school houses valued at \$100 or less each, Hunterdon and Sussex each report fifteen; Warren, eleven; Atlantic, eight; Union, seven; Cumberland, six; Bergen, Camden, Middlesex and Salem each four; Burlington, Cape May, Mercer, Morris and Ocean, each three; Gloucester, two; Hudson, Monmouth and Somerset, each

one; and Essex and Passaic each none.

Of those valued above \$20,000 each, Hudson reports fourteen; Essex thirteen; Passaic and Union each four; Camden, three; Mercer

and Morris each two; and Burlington and Sussex each one.

The total valuation of school property in the State is \$3,677,442, being an increase of \$696,446 over the valuation last year. The value of school property in Hudson county is \$823,070; in Essex, \$709,658; in Passaic, \$226,600; in Camden, \$196,105; in Union, \$180,550, and lesser sums in the remaining counties.

The amount expended for building and repairing school houses during the past year reaches the sum of \$476,606.83. This sum varies but little from the amount expended for the same purpose last

vear.

In no other respect is the increasing interest in public education made so manifest as in the improvements which are being made in our school houses. In our cities and in many of our towns and villages, the school buildings are among the most beautiful and imposing structures, and even in the rural districts, the school houses, instead of being the poorest buildings in the place, as was too often the case formerly, are now, in many places, models in their way, both in outward appearance and in internal arrangements. When it is considered how much a neat, comfortable and convenient school house contributes towards making a good school, and how difficult it is for any teacher, however skillful he may be, to succeed in a poor, dilapidated structure, it must be a source of profound gratification to know that so many of the latter class are being replaced by the former.

The character of the school houses erected during the past year ranges from the neat little structure in the rural district, costing from \$1,000 to \$5,000, to the beautiful and imposing edifice of the town or city, costing from \$20,000 to \$50,000. Among the latter class are included the school buildings lately erected at Morristown, at Newton, at Haddonfield, at Irvington, and at other places in various parts of

the State.

Notwithstanding the important work that has been done in the way of erecting good school houses, there are many buildings still in the State which are a shame and a disgrace to those neighborhoods which permit them to be used for school purposes. We have ninety-eight such buildings, reported to be worth less than \$100 each, and five hundred and forty-seven which are valued at sums ranging from \$100 to \$500 each. These buildings are often found in neighborhoods which have every appearance of thrift and prosperity; where the parents have beautiful homes, and where the cattle even are made comfort-Their churches, which are occupied about three hours per week, are provided with cushioned seats, carpeted floors, stained glass windows, frescoed walls, complete ventilating and heating apparatus for winter and for summer, and everthing calculated to add to comfort and neatness, both without and within. These poor school houses are occupied about thirty hours per week, and yet it is difficult to imagine how some of them could be rendered less comfortable and inviting. In size they are about one half or one quarter as large as they should be; they present a tumble-down appearance without, and within they are dark, damp, gloomy. The windows and doors are broken, the ceiling and side walls are crumbling to pieces, the roof leaks, the furniture consists of a few hard, mutilated and uncomfortable benches, a rude desk, a broken chair, and a poor apology for a blackboard Many of these buildings are as rude and dilapidated as time and poverty can make them. Why are parents so willing to provide themselves with all comforts and conveniences at home and at church, while their children are denied both at school?

To remedy this evil the law which requires a two-third vote in a district to raise money for school purposes should be changed. It is certainly an anomaly that all questions submitted to the people are decided by a majority vote, except the bare one of raising money for school purposes. Let a majority vote decide what moneys shall be raised for building school houses, and I am satisfied that those \$100 structures

will be replaced by others much faster than they are now.

#### TOWNSHIP SCHOOL TAX.

The main dependance relied upon for the support of our schools is the money that is raised by township tax. The total amount of this tax raised last year was \$423,868.86; this year it is \$462,955.24, being an increase of \$39,086.38. There are in the State 239 townships including the cities. Of this number sixty-seven raised \$4.00 per child, the maximum prescribed by law; eighty-five raised sums ranging from \$3.00 to \$3.50 per child, and eighty-seven raised sums ranging from \$2.00 to \$2.50 per child.

Of the sixty-seven townships which raised the maximum amount of \$4.00 per child, eight are in each of the counties of Essex, Hudson and Warren; six in Union; five in Atlantic; four in Camden, Passaic and Somerset; three in Hunterdon, Monmouth and Morris; two in Burlington, Cumberland and Sussex; one in Bergen, Cape May, Mercer, Middlesex and Ocean, and none in the counties of Gloucester and

Salem.

Under the head of "Free Schools" will be found a list of the town-

ships which raise \$4.00 per child, school tax.

The following is a list of Townships which raise but \$2.00 per child, township school tax:

Courses None in the county roise less then \$2 00

ATLANTIC	COUNTY-	-None in the county raise less than \$3.00.

Total 61

Last year there were seven townships in the State which failed to raise even the \$2.00 per child, the minimum amount prescribed by law. This year none have failed to raise the amount.

#### DISTRICT SCHOOL TAX.

In addition to the township school tax, the State appropriation, and the surplus revenue apportioned to the schools, each district is authorized by law to raise such further sums as it may deem proper, either for maintaining the schools or for building purposes. Last year the total amount of this tax raised was \$915,354.39, this year it is \$989,914.89, being an increase of \$74,560.50. The number of districts which have thus increased their school funds by local taxation is five hundred and twenty-five, being an increase of fifty-three over the number of last year. Of the \$989,914.89 district tax raised this year, \$513,308.06 is for paying the current expenses of the schools, and \$476,606.83 is for the purpose of building and repairing school houses. There is included in the district tax above mentioned \$584,751.87, which was raised in the cities.

#### SURPLUS REVENUE.

The law requires that the interest of the surplus revenue shall be appropriated to the support of public schools. The amount of revenue derived from this source this year was \$28,722.88. In several of the counties the principal of this fund has been used for building bridges, for paying soldiers and for other purposes, and the schools of these counties, therefore, no longer receive the benefit of the interest. The counties in which this fund no longer exists are Atlantic, Bergen, Essex, Hudson, Middlesex, Passaic, and Warren. It has also been used up in the townships of Bethelehem, Clinton, Delaware, Frenchtown, Lambertville, Lebanon, Raritan, Readington, Tewksbury, Union and West Amwell in Hunterdon county, in the townships of Union, Hamilton, Hopewell and the city of Trenton in Mercer county, and in the townships of Clark, Westfield, Plainfield, New Providence, Summit, Springfield, and the cities of Elizabeth and Rahway, in the county of Union.

#### THE NORMAL SCHOOL.

The State Normal School and its important adjuncts, the Model School and the Farnum Preparatory School, continue to prosper. The whole number of different scholars attending these institutions during some portion of the year was as follows: Normal School, 282; Model School, 563; Preparatory School, 281. Total, 1136.

In the Normal School the number who remain to complete the course is much greater than formerly. Instead of fifteen or twenty, about fifty now graduate annually, and nearly all of them in the course of a few weeks after graduation are found engaged in teaching. Graduates of the Normal School are now employed in considerable

numbers in every county of the State, and are silently contributing, with other causes, to that generally improved condition of our schools which is everywhere perceptible.

#### THE STATE AGRICULTURAL COLLEGE,

which forms a department of the Rutger's Scientific School, is now in a more prosperous condition than at any previous time since its establishment. The number of students in the institution during the year has been sixty-one, of whom one was from Japan, eleven from the State of New York, and forty-nine from the State of New Jersey, representing the following twelve counties: Bergen, Cumberland, Essex, Gloucester, Hudson, Mercer, Middlesex, Monmouth, Morris, Salem, Somerset and Union. The number in the present entering class is twenty-seven. It is very desirable that the other counties of the State should avail themselves of the free scholarship placed at their disposal in this institution, and the attention of County Superintendents is earnestly invited to the importance of encouraging their most promising young men to make use of this opening to a succesful and honorable career. The former graduates of the Scientific School have found almost immediate employment in responsible and remunerative positions, and the demand for them increases every year. During the past year the Trustees and the State Board of Visitors have adopted a Course of Study extending through four years instead of three, as at present—the change to take effect in September, 1871. The number and difficulty of the subjects included in the course rendered this extension necessary, and it is believed that the new arrangement will provide a better scientific education, and at the same time furnish a satisfactory general education for the graduates of our public schools who may not look forward to a Collegiate course of study. The requirements for admission are the same as heretofore; English Grammar and Spelling, Political and Physical Geography, History of the United States, Arithmetic, Algebra to Equations of the Second Degree, and Three Books of Plane Geometry. Candidates must be sixteen years of ago, and of good moral character.

Three courses of study are provided:—1. A Course in Mechanics and Civil Engineering; 2. A Course in Chemistry and Agriculture; 3. A Special Course in Chemistry. Provision is made, also, for Par-

TIAL STUDENTS.

During the last year, the Chair of Mining and Metallurgy has been fully endowed, and a new Chair of Analytical Chemestry established.

With its increased means and appliances, the institution has every prospect of increased success and usefulness.

#### STATE CERTIFICATES.

The State Board of Education, since August 31st, 1869, have issued certificates to the following named persons, the same having passed the necessary examinations and possessing the other qualifications required by law:

## FOR ONE YEAR.

#### RULES PRESCRIBED BY STATE BOARD OF EDUCATION.

Since the publication of my annual report for 1869, the following additional rules have been prescribed by the State Board of Education:

"Rule 35. At the close of their official term, or on the vacation of their office by resignation, or otherwise, should the same occur during the Scholastic year, all County Superintendents shall report to the State Superintendent for the portion of the year that may have expired, as provided for in the 30th section of the School Law with reference to their annual reports; and no order shall be given for their last quarter's salary, until such reports are received in a manner satisfactory to the State Superintendent.

"Rule 36. In case of the failure of any County Superintendent to make his annual report to the State Superintendent on the first day of October, as required by law, the State Superintendent shall not give to such County Superintendent any order for the payment of salary for the quarter next succeeding such delinquency, except by a special resolution of the State Board of Education for that purpose.

"Rule 37. All changes made in the boundaries of school districts, against which no appeals are made in writing, may be approved by the State Superintendent as Secretary of the State Board of Education.

"Rule 38. County Superintendents, on granting certificates at private examinations, may grant them in the usual form, or, if they deem it advisable, they may grant them to be good only until the regular quarterly examination next succeeding such private examination."

#### FREE SCHOOLS.

There is a growing desire in the State for free schools. In my judgment no act could be passed by the Legislature this winter which would receive so hearty an approval by the people, or be productive of more good than one which would relieve us from the trouble of collecting rate-bills and give us free schools. Such a measure would be opposed only by those who oppose the very principle itself of a system of public instruction. The County Superintendents, without an exception, represent to me that the one desire most prominent among the people of their respective counties in reference to public schools is that they should be free, and I sincerely hope that the Legislature this winter will enact a law which will make free all the schools of the State. No other argument in favor of such a measure at this time should be necessary than the mere statement of the remarkable fact that New Jersey is now the only State having a system of public instruction, which has not free schools. Only in New Jersey are

rate-bills found necessary, or even allowed. Although we have the rate-bill system, I am satisfied that the people desire it abolished, and that if a law were passed imposing the necessary additional school tax to make the schools free, such tax would be paid far more cheerfully

than the rate-bills now imposed.

No more time or trouble would be required to collect by tax a sum sufficient to make the schools free than is now required to collect one-half or three-fourths enough for that purpose, and if a sufficient sum were thus collected, all the trouble and annoyance now experienced by school officers in collecting rate-bills would be avoided. The trouble too of collecting these rate-bills is at least equal to if not much greater than is required to assess and collect the regular school tax. However small may be the amount required to be collected from those who send to school, a separate bill must be made out against each, and be presented to each for collection. The schools cost no less by being supported in this double manner. The amount required for their maintenance is the same, whether raised by tax or by tuition fees, or by both methods combined.

Relative to free schools, and the evils growing out of the rate-bill

system, I extract the following from my report of 1868:

"Our schools receiving the benefit of the public funds are called public schools, in distinction from those supported by private funds, called private schools. The name and the distinction would seem to imply that our public schools are free schools, or schools open to the public where all children, of the legal age, may attend and receive an education free of cost. This, I regret to say, is not the case. About one-half of the public schools in the State are free, but the remaining half are partially supported by what are termed 'rate-bills' or 'tuition This latter class are of two kinds, those made free while the public money lasts, after which full tuition is charged for the remaining months of the year, and those made part free and part pay during the time they are kept open, the plan adopted being such as the trustees in each case determine upon. Whichever plan is practised, the ratebill system wherever found, is a great hindrance to the prosperity of the schools, and a most prolific source of mischief, complaint, trouble, contention, and endless neighborhood feuds.

"In one district the trustees will not serve if they are obliged to collect the bills. In another, they must have a commission for collecting them, and thus an additional burden is placed upon the people. In another, the teacher is required to collect the bills, and it is with difficulty that one can be found willing to engage upon these conditions. If one is engaged, it is probably more because he will work cheap, and relieve the trustees of the unpleasant task of collecting the bills, than because he has any qualification or fitness for the position. At the end of the quarter the bills are made out, and the teacher proceeds to collect them. The task proves to be anything but pleasant. At the first house the paymaster, or the head of the family, is away, and the

bill must be left and another call made; at the next, the bill is contested—'it is too high'—'the child never attended that number of days,' etc.; at the next, the occasion is taken advantage of by showering upon the innocent head of the unfortunate teacher all the accumulated complainings which the children have brought home during the quarter; and before the teacher has finished his journey, he probably concludes not to teach another quarter in that district, if he can find

employment elsewhere.

"If the school is made free only during the summer months, then those who have large boys who never attend but in the winter, complain, and if it is free during the winter, but a pay school in the summer, then the small children cannot receive the benefit, and their parents are aggrieved. The attendance upon a school conducted upon this plan is very irregular and uncertain. While the school is free, there is a great increase in the attendance; but when it becomes a pay school, those who are unable or unwilling to pay the tuition bills withdraw their children, and the cost of maintaining the school becomes burdensome to the few who remain. On account of this irregularity of attendance, the classes are disorganized and broken up, the patrons are dissatisfied, the teacher is discouraged, and the school fails to ac-

complish the good desired.

"If the school is part pay and part free, some will insist on sending their children until, as they say, 'their free money runs out,' and they consequently refuse to pay the assessment; others will only send while the school is large, and the tuition bills are consequently small. Often such a school opens with a fair prospect of having a large attendance, but for one reason and another a few families become dissatisfied and remove their children. At once the report is spread that the school is becoming small, and the fear that the tuition bills will be high, causes others to keep their children at home. Each child that is taken out of the school increases the expense for those who remain, and this affords an inducement for others to withdraw, and thus the smaller the school becomes the greater the panic rages, until the attendance is so reduced that the school is literally broken up. The tuition bills, too, are made out for the time the children attend, every day's absence lessens the amount of the bill, and thus a premium is paid for irregular attendance.

"But the greatest objection to the rate-bill system is, that it requires the poor man to pay for the education of his children. This is contrary to the principle upon which we found our public school system, which is, that every child has a right to an education, and that it is the duty of the State to provide the means whereby he may obtain that right. To afford such means as will only lessen the expenses of an education, without making it absolutely free, is not enough. Where tuition fees are charged, be they ever so small, the question with many a poor man is, education for his children, or bread for his family? The tuition bill keeps hundreds and thousands of our children out of

school, who consequently grow up in ignorance; it is also the means of making so irregular and uncertain the daily attendance upon the schools, as to so disorganize the classes that not more than one-half the good is accomplished that would be were the schools entirely free.

"It is no longer a question with the American people whether we shall establish and maintain public schools or not. The free public school has become a characteristic feature of our government, and it must remain so as long as our form of government exists. We guarantee free education to all the children, and liberty to all the people; and we can no more deprive the former of the benefits of the free public school, than we can take from the latter the political and religious liberties they enjoy; for liberty can neither be enjoyed nor perpetuated, unless education accompany it. In a government wisely administered, the rulers must be educated; where the rulers are few, as in a monarchy, the number educated may be limited, and education may be esteemed a privilege; but in a government like ours, where the people rule, education must be universal, it can be esteemed no less than a necessity. Give liberty to the educated, and you have the best form of government known—a democracy; give it to the ignorant, and you have what is the absence of all government—anarchy. The surrender of our public school system would be equivalent to the surrender of the charter of our freedom. The public school system is a part of our form of government; it constitutes our educational department; and we can no more be relieved of the expense of supporting it, than we can free ourselves from the obligation of paying our share for the support of the legislative or the executive departments. The money we are called upon to pay for the support of publie schools is but a part of the claim the government has upon our property for its own support. It is, therefore, not a question with us whether we shall have public schools or not. That question is already settled. Every State has established them, and made provisions, more or less ample, for their support. The only question which admits of debate is, how can they be made most efficient in accomplishing the good for which they were established. In answer to this, we may say —by erecting suitable school buildings, by employing skillful teachers. and by securing the regular attendance of the children. This is well; but there is is a condition precedent to all this before we can enjoy the full benefits a public school system is able to afford. The public schools throughout the State must be made what they already are in other States-free schools."

To have free schools we have only to pay the cost. The methods of obtaining the money necessary for the support of free schools may vary, and some methods may be much preferable to others, but the importance of having free schools is so great as to make it of secondary importance, how the needed funds are obtained. I will, however, explain three methods by which we may secure free schools, and will show

some of the advantages or disadvantages of each.

Free schools may be secured,

First—By substituting for our district system the township system of school organization;

Second—By increasing our township school tax; or,

Third—By making a sufficient increase in our state appropriation

and abolishing our township school tax altogether.

By the first method the funds needed for the support of free schools could, undoubtedly, be obtained at the least trouble and expense. The township board of school officers would merely ascertain, by calculation, the amount needed, which would be assessed and collected without further trouble. This method is fully explained in the supplement to my report of last year.

The second method needs no explanation, as it consists simply in a modification of our present long established and well understood

system of school taxation.

The third method would relieve us of much trouble and contention growing out of our calling upon the people to vote every year upon the question, which, if decided in the negative at any election, prevents our accomplishing for that year the object of our desire. the following extract from my report for 1868 are presented some of the advantages which a state tax would have over our township school "To make our schools free we need but two sources of revenue. a general fund to be appropriated to all the districts on the basis of the school census, and a local tax to be assessed when and where A general fund cannot be so apportioned as to give to every district enough to support the schools, and leave a surplus in none. For the expense of maintaining a school does not depend upon the number of children in the district, nor upon any other fact which can be taken as a basis of apportionment. We need, therefore, a general school fund sufficient to maintain the ordinary grade of schools at times when no extra or unusual expenses are incurred, and a district tax to be assessed in those districts where the people, with more than ordinary enterprise, desire a better grade of schools than can be supported by the general fund, and in all districts where additional funds are needed to erect, furnish or repair school buildings. At present we have two sources from whence we derive a general fund: the State appropriation and the township school tax. This, it appears to me, is unnecessary. I see no reason why we could not dispense with our township school tax altogether by increasing the State appropriation equal to the amount we now derive from that source. There are many objections to a township school tax which would be avoided by the State appropriation. Our public schools should not depend, for their support, upon a revenue which a mere majority, at town meeting, can any year withhold. Party interests, political issues, or the exertions of influential men opposed to public schools, will often defeat a school tax, and, in consequence, the schools for the year must either be closed, or tuition fees must be imposed upon those who attend. Much

difficulty is experienced in apportioning township school moneys to districts lying in two or more adjoining townships, for separate apportionments must be made, separate accounts kept, and separate reports rendered every year for each fraction, the same as though it were an entire district. In some of the counties as many as one-fourth of the districts are fractional, being situated in from two to four adjoining townships, and a separate apportionment, account and report must be made for each part. All this would be avoided by a State appropriation, for all moneys then belonging to a fractional district could be kept and distributed by the collector of the township in which that part was situated having the school house. Townships in which fractional districts are situated often vote different amounts of school tax per child, and thus one portion of a district is made to contribute more towards the support of the school than the other, and this becomes a cause of dissatisfaction and trouble. Public schools, giving a free education to all, have long been considered, with us, not only a benefit but a necessity, and hence the fund for their support should be permanent."

I will now proceed to show what amount of money, whether appropriated by the State or raised by the townships, is needed to make our schools free. There are in the State 1,458 districts, of which 807 maintain free schools and 651 pay schools. These free schools are nearly all situated in those townships or cities which raise the maximum amount of school tax fixed by law, namely, \$4.00 per child; while, in the remaining townships, for the want of sufficient funds nearly all the schools are supported in part by tuition fees. To this sum of \$4.00 per child is added about forty cents per child, received of the State appropriation. In order to have free schools, therefore, it is necessary that each district should have at least \$4.40 per child. This would amount to an aggregate sum of \$1,136,198.80, which differs but little from the entire sum expended for school purposes last year, exclusive of the amount used for building purposes. If the minimum township school tax, therefore, were fixed at \$4.00 per child, or an equal amount were appropriated by the State in addition to that now appropriated, all the schools of the State could be maintained free,

and kept open from 8 to 10 months during the year.

The following is a list of the Townships and Cities in the State which now raise \$4.00 or more per child, school tax, including both township and district tax:

ATLANTIC	County-	−Atlantic City—schools all free.
"	66	Egg Harbor City—schools all free.
"	"	Hammonton township—schools all free.
.6		Hamilton township—schools all free.
	"	Mullica township—schools all free.
Bergen	44	Harrington township—three schools free, two
		not free.

BURLINGTON	COUNTY-	-Bordentown township—schools all free.
"	66	Chesterfield township—schools all free.
"	66	Northampton township—schools all free.
٠,	66	Westhampton township—schools all free.
44	"	Willingboro' township—schools all free.
CAMDEN	66	Haddon township—schools all free.
"	66	Monroe township—schools free except two.
		These two pay schools are in districts, one
		of which has but thirty children, and the
		other but twenty-three.
6.	66	Newton township—schools all free.
"	"	Washington township—schools all free.
"	"	Caman city—Schools all free.
CAPE MAY	"	Cape May City—schools all free.
CUMBERLAND	"	Landis township—schools all free.
"	"	Bridgeton City—schools all free.
"	"	Millville City—schools all free.
Essex	"	Bloomfield township—schools all free.
66	"	Montelair township—schools all free.
<b>66</b>	"	Caldwell township—five schools free, three not
		free. This township only raised \$3.50 per
		child, last year.
44	"	Millburn township—one school free, two not
		free. This township only raised \$3.50 per
		child, last year.
46	66	South Órange township—schools all free.
46	"	Clinton township—schools all free.
"	66	East Orange township—schools all free.
"	"	West Orange township—schools all free.
44	"	Newark City—schools all free.
GLOUCESTER	"	None of the townships raise \$4.00 per child,
		school tax, and none maintain free schools.
$\mathbf{H}_{\mathbf{UDSON}}$	46	North Bergen township—schools all free.
"	"	Union township—schools all free.
"	"	Bayonne township—schools all free.
"	44	Jersey City—schools all free.
"	"	Hoboken—schools all free.
"	"	West Hoboken township—schools all free.
"	"	Union—schools all free.
"	"	Weehawken township—schools all free.
Hunterdon	"	Clinton borough—schools not free because no
		money was raised last year.
44	"	Frenchtown borough—schools not free—only
		\$2.00 raised last year.
"	"	Lambertville—schools all free.
46	"	Lebanon township—seven schools free, three not
		free. Those not free are in small districts.

Mercer	Consum	Princeton tempolin two schools for these
MERCER	COUNTY-	-Princeton township—two schools free, three not free. Only \$3.00 per child was raised
		in the township last year.
MIDDLESEX	**	Woodbridge township—schools all free.
44	"	New Brunswick City—schools all free
Моммочти	n -	New Brunswick City—schools all free. Middletown township—schools all free.
"	44	Ocean township—schools all free.
"		Shrewsbury township—schools all free.
Morris	6.	Morris township—all the schools are free
		which are situated in districts wholly in the township.
"	••	Passaic township—all the schools are free
		which are situated in districts wholly in the township.
4.		Randolph township—schools all free.
OCEAN		Manchester township—schools all free.
Passaic	"	Acquackanonk township—schools all free.
"	**	Little Falls township—schools not free. The
		township tax last year was only \$3.00 per child.
**		Manchester township—schools not free. The township tax last year was only \$3.00 per
		child.
**		Wayne township—schools all free.
	••	Paterson City—schools all free.
SALEM		Salem City—schools all free.
Somerset		Bridgewater township—five schools free, four not free.
6.	**	Franklin township—nine schools free, nine not free.
••	"	Hillsborough township—two schools free, thirteen not free. The township tax last year was only \$3.00 per child.
	**	Montgomery township—one school free, six not free. The township tax last year was only \$2.00 per child.
Sussex	4.	Hardyston township—six schools free, two not free. The school tax last year was only \$3.00 per child.
••		Wantage township—ten schools free, eight not free. The school tax last year was only
Union		\$3.00 per child. Rahway City—schools all free.
0.2102		Plaintield City—schools all free.
• 6	"	Linden township—two schools free, two not
		free. This township raised only \$3.50 per child last year.

Union	"	Clark township—schools nearly free, only \$14.00 tuition fees collected.
"		New Providence township—one school free, one not free. This township raised only \$3.00 per child last year.
• •	"	Springfield township—school not free. This township raised only \$2.50 per child last
W	66	year. Belvidere—schools all free.
WARREN		
66	"	Greenwich township—schools all free.
46	46	Hackettstown township—schools not free.
**	4.	Harmony township—schools free.
"	• 6	Independence township—four schools free, five not free.
66	**	Lopateong township—schools free.
	46	Phillipsburg Borough—schools free.
4.		Washington Borough—schools free.
	Total—77	

In this list of 77 townships and cities which raise the maximum amount of school tax this year, 15 raised a less amount last year, and as the schools during any one year depend mainly for their support upon the tax ordered the year previous; the schools in these townships are not all free, but will undoubtedly be free next year. Of the remaining 62 townships and cities, 56 report all their schools free, leaving only 6 townships, having raised \$4.00 both last year and this, which have not free schools, and even in these more than one-half of the schools are free. These 56 townships and cities with free schools contain about one-half of the children of the State. Thus it appears that only one-half of our school population now enjoys the benefit of a free school system which should certainly be enjoyed by all.

In the remaining 162 townships of the State, all of which raise less than \$4.00 per child school tax, only 18 have free schools, and in these townships the schools are either made free by district tax or are kept

open but a small portion of the year.

From the facts here presented, it is evident that to make our schools free, we must raise at least \$4.00 per child school tax; but, before that will be done, the Legislature must give us a law making that amount the minimum required to be raised in the townships, or appropriate an equal amount out of the revenue of the State. If such a law was passed, I believe the people would pay the additional money ealled for as cheerfully as they did that called for in the law of 1867. The law which was repealed by the law of 1867, fixed the maximum limit of the school tax at \$3.00 per child, and gave no minimum limit. In the year 1866, under that law, sixty-three townships raised \$3.00, fifty-five raised about \$2.00, ninety-two raised less than \$2.00, and eighteen raised nothing. The present law raised the maximum to

\$4.00 per child, and fixed a minimum limit of \$2.00, and, as the result of this change, seventy-seven\* townships now raise \$4.00, one hundred and one raise about \$3.00, sixty-one raise \$2.00, and none raise less than \$2.00.

ELLIS A. APGAR,
State Superintendent of Public Instruction.

<sup>\*</sup> This number includes all that raised \$4.00, by both township and district tax; the number that raised \$4.00 by township tax alone is sixty-seven.

# REPORTS OF CITY SUPERINTENDENTS.

# REPORTS OF CITY SUPERINTENDENTS.

#### ATLANTIC CITY.

#### S. Vansant, Superintendent.

The school has been in successful operation during the year, closing

last June, 1870.

Our excellent Principal, S. R. Morse, who is well qualified for the position he fills, and the efficient corps of teachers associated with him have taken a deep interest in the school, and labored earnestly to promote its welfare.

Mr. Morse has not only employed the time during the school session for the day, but his evenings, in giving lectures, and promoting the interests of the "Lyceum," hearing recitations in Latin, etc.

The other teachers have also been prompt and willing to devote extra time to get up concerts and exhibitions, to interest the children

and patrons.

The instruction, I think, is thorough, and the advance of the children, rapid and highly satisfactory; and in management, in discipline, and in its practical efficiency, the school compares favorably with any similar institution in the State.

The visit of the State Superintendent, Mr. Apgar, and also of Dr. Hart, of the State Normal School, during the session of the Teachers' Institute, held in Atlantic City last winter, was hailed with delight, and will be long and gratefully remembered.

Our school building is in excellent condition, but in view of the large attendance, especially in the primary department, an additional

room is needed.

The grounds have been enlarged and improved during the summer vacation, and the trustees manifest a deep interest in the welfare of

the school generally.

I may add that the school is quite a "centre" during winter, interesting not only the children, but, by its Lyceum, its manuscript paper, its public lectures, its concerts and its exhibitions, entertaining and instructing a large portion of the population.

Through the energy of Mr. Morse, aided by the teachers, by public concerts, means were secured to purchase a suitable bell, and now its pleasant tones peal out upon the ear of the inhabitants, to remind them of our excellent institution, as well as to indicate the hour to to the sportive and happy children.

#### NEWARK.

#### George B. Sears, Superintendant.

In presenting my annual report for the year just closed, I can say that we are holding on our way—gaining some conquests over ignorance and error, but a complete and decisive victory looks to be far in the distance. We have so many raw recruits coming into the ranks every year that our aggregate advance is only step by step; nevertheless, when that advance step is taken we have yet been able to hold it.

According to the census, the number of children between five and eighteen years of age has increased 631, while the number of children attending public schools has increased from 11,321 to 13,232 during the year. This increase has been caused mainly by the increased facilities for seating pupils. We have now modern improved school seats and desks for more than 10,000 pupils, and we shall probably add during the fall term accommodations for 500 more, and yet we shall not keep up with the demand.

The \$200,000 "Loan Fund" authorized by the Legislature in 1868, for the purpose of creeting and furnishing school houses is almost exhausted, and if we would place our educational interests upon a good foundation we should build at once four good school houses, and after that by adding one each year we might afford reasonable

accommodations.

Our schools are free to all classes and conditions in the community, and we regret that all classes do not esteem it a privilege to encourage the public schools by the presence of their own children as well as by their contributions of money. But some of our citizens exercise the privilege of paying their taxes into the general educational fund and then educate their own children at private schools. We acknowledge their right to do this, but would be glad of their influence in our public schools.

I may say, however, that our schools are popular and deservedly so. I believe we lay a better foundation for an advanced English course of

study or for practical business life than is acquired in any other class of schools in the city. We have yearly examinations for admission to the High School from the pupils of the grammar schools, and those children who apply from private schools are examined with the grammar pupils, and are submitted to precisely the same tests, and while about sixty per cent of the grammar school pupils attain the required per centage, not one in ten from private schools succeed.

We examine in Spelling, Geography, Arithmetic, Grammar and United States History; in select schools, pupils pursue other studies in which our pupils could not sustain an examination, but we choose

to lay the foundation stones before the top stones.

#### STATISTICS.

We think the blanks furnished this year for gathering statistics, an improvement upon former years, especially in ascertaining the cost of tuition upon different bases. In regard to the salary of teacher's per month, I think there may not be sufficient uniformity to institute a comparison between different towns or cities. One teaches at so much per month for actual service; another teaches at so much per year; if the yearly salary be divided by twelve, the number of months in the year, we report a smaller salary per month, than if we divide by the actual number of months the teacher is engaged in the school rooms. My remedy for any disparity would be to require the amount paid for each month's actual teaching. If a teacher has \$900.00 a year, and three months of that is vacation, I would have him report \$100.00 per month.

#### NUMBER OF CHILDREN.

I ought to explain in reference to so large a number of children, reported as attending no school whatever. The regulations of the Board exclude all children from the public schools under six years of age. This would reduce the number of non-attendants, at least fifteen

hundred, perhaps two thousand.

The great majority of our children leave school at a very early age; a very small per centage ever reach the High School. Of the average number registered in all the schools only 3½ per cent., and of the number registered in the grammar schools about nine per cent. reach the High School. Of the number who enter the primary schools not more than fifty per cent. reach the Grammar Schools. Such are some of the difficulties we have to contend with in maintaining a High School, and that at not a very high grade. We are not able to reach a very high grade in our High School, from the fact that pupils must leave when they arrive at the age of eighteen years. Would that some legislation might enable the Board to retain pupils long enough to complete a respectable course of High School studies.

Notwithstanding this restriction, forty-one young ladies and gentlemen graduated the present year. Our classes are promoted year by year on the basis of a written examination upon the subjects pursued during the year, and their final examination for graduation embraces Rhetoric, Physiology, Geometry, Algebra, Cæsar, Virgil, and the Constitution of the United States—Seven days were spent in the examination; the answers to the questions were all written, and the average per cent. attained was eighty five. These pupils, especially the girls, enter the Saturday Normal School and pursue a course of study preparatory for teaching. From this source most of our teachers are procured, and we feel proud in the fact that, with the exception of the classics, our primary teachers are qualified to instruct in any classes in the High School.

We have no difficulty in procuring teachers intellectually qualified, but tact and success in using those attainments can be ascertained only by trial in the school room. When we consider that tact is indespensable to success, we are surprised that there are so few fail-

ures.

Our Monthly Teachers' Institute, which is held on the third Saturday of each month, at which all our teachers are present, serves to keep our teachers abreast with all the modern improvements in science and in teaching, and gives a kind of perennial freshness to the work of teaching. We hope to maintain this Institute as long as any progress can be made in teaching through this channel.

#### NEW BRUNSWICK.

## HENRY B. PIERCE, SUPERINTENDENT.

Enclosed please find the Statistical Report of the Public Schools of the City of New Brunswick. In addition I believe it can be truthfully be said that the public schools are steadily improving in character and in the estimation of the citizens.

In taking charge of the schools, nearly five years ago, I found two evils—tardiness and irregular attendance—that I felt must be overcome, in order to insure good scholarship among the pupils, and good

schools for the city.

An examination showed a daily tardy list of nearly 200 pupils, coming at all hours, in both morning and afternoon sessions, and with all sorts of excuses; some having been written by parents, and some having been forged by themselves. It was utterly impossible for

teachers to determine which were gennine and which were counterfeit. To accept a false excuse seemed like offering a reward for successful deception. After careful consideration, the following remedy was proposed to the Board of Education, and by them adopted: The principal was authorized to close the gates at five minutes past nine and five minutes past two, and afterwards to admit no pupil for that session, either with or without an excuse. The remedy worked like a charm. Pupils that could not possibly help being late (using their own and their parents' language), before the rule was adopted, are now never tardy. Five minutes grace after nine and two o'clock are allowed on account of having no signal but the town clock to give warning of school time. It is pleasant to see what a change has taken place in the manner of coming to school. Formerly pupils justified the poet's line—

#### "Creeping like snail unwillingly to school."

Now the sound of the clock, at nine or two, puts new life into the coming feet, and they move as though their owners were on important business; no rule adopted by the Board has produced more beneficial

results than the one in regard to tardiness.

The improvement in regularity of attendance is also very encouraging. Four years ago, out of nearly 2,000 pupils enrolled, only two were present every day. The next year there were thirty; the next, fifty; and, at the close of the last year, the names of eighty pupils were read who had not missed a day; and of this number, one, Miss Lizzie Bessonett, had not missed a day for four years. Three others had not missed a session in three years, and seventeen had been present every day for two years. Believing that regularity in attendance is one of the essentials to a good school, and wishing to excite a spirit of emulation in this particular, I should be glad to have each city superintendent present a similar report for publication and comparison.

#### TEACHERS.

We have had, and still do have, an excellent corps of teachers; yet I am sorry to say, for the success of our schools, that other localities have found it out, and we are constantly losing valuable teachers, who leave us to accept other positions where greater inducements are offered. I do not blame the teachers for accepting better positions, yet I can not but regret that our citizens do not recognise the fact that a good teacher is as valuable in New Brunswick as in any other place.

#### SCHOOL REPORT.

#### SCHOOL ACCOMMODATIONS.

In this respect New Brunswick is behind her sister cities. Were it not that the Catholics have schools of their own, we should lack room for a thousand children. As it is we can not properly seat many that

are in daily attendance upon the schools.

The one great want of our public school system is a fine school building to accommodate the High School department. Believing that a building of this kind would greatly promote the interests of the city as well as of the schools, we hope that our citizens will soon furnish one that shall be a model in every respect.

#### PATERSON.

#### WILLIAM SWINBURNE, SUPERINTENDENT.

I have the pleasure of presenting to you some of the most important features of our progress in Public Instruction. During the past year there has been a gradual increase in the attendance of pupils in our school until all our school accommodations have been taxed to their utmost to find room for all that apply. During the past year we have been building a large brick school at a cost of about \$50,000, capable of containing about 1200 scholars, which we expect to occupy some time in December next; and have just commenced another brick building to be completed in March next, at a cost of about \$23,000, to contain about 600 scholars; also, have just completed an addition to one of our school buildings, doubling its capacity equal to 900 scholars; and, also, in addition to a frame building erected about three years ago, increasing its capacity by 200 scholars; this large addition of school accommodation we think will be sufficient for seven years to The standard of our schools is gradually rising, and our present Board, by their liberal expenditure of money, both for educational and building purposes, seem determined to give all needful school accommodations for the present and future wants of this city, as well as to raise the standard of our schools equal to any in the state. the internal operations of our schools are in a prosperous condition. We make it an object to the female scholars in the High School to prepare themselves to become teachers in our primary departments; about half the teachers now employed in our schools are graduates from our High School.

#### PERTH AMBOY

## G. W. NICHOLSON, SUPERINTENDENT.

For many years past the public schools of this City have been conducted in the old City Hall buildings, which is quite unfitted for school purpose. Under a new charter granted by the Legislature last winter, a Board of Education was established with authority to build a new school house, when appropriations for that purpose had been made by the Mayor and Council of said city. Accordingly the Council have authorized the raising of \$20,000 city bonds, for this purpose.

The Board have secured a lot of land for a site, for which they paid \$3,000. A contract is about being made for the erection of a commodious and handsome school building to cost about \$17,000.

For the general support of the schools the tax is \$4,300. For the interest on the bonds, \$1,400, making the total expenses for such purpose \$5,700.

The friends of education in Perth Amboy are looking for a brighter day before long, when their youth may have all the blessings of a liberal and free education in a suitable and convenient building.

#### PHILLIPSBURG.

## SAMUEL FREEMAN, SUPERINTENDENT.

There has been very great improvement during the past year in the condition and efficiency of our public schools, although there is still a great insufficiency of school accommodations.

We have but two public school houses in the town. In each school building their are four rooms, and each room will properly accommodate just about fifty pupils. The two buildings will, therefore, accommodate only about *four hundred* pupils.

As will be seen by my annual statistical report, which has already been transmitted to you, the number of children enrolled in the school register during the year was 1,342, and the whole number

enumerated at the end of the year was nearly 1,700. Previous to the past year the two buildings above named were the only accommodations ever provided for the schools. But during the past year the Board of Education hired for the use of the schools several halls and other rooms, and by so doing provided more than twice as much room as they ever before occupied. The corps of teachers was also greatly enlarged. Several of the schools, however, were greatly overcrowded during the greater part of the year, and in three or four instances we were compelled to have two schools in one room with no room attached to which the pupils could resort for recitation.

We have not as yet perfected a system of grading and classifying, nor have we adopted a complete course of study, because we have found it impracticable to do so until we can have more school build-

dings provided.

We have, however, made a good beginning, and have classified and graded the schools in the public buildings into four grades, that being the number of rooms into which each building is divided. The schools in the other halls were of necessity, to a great extent, ungraded, though we endeavored to so arrange as to allow not more

than two grades in the same room.

A number of our teachers are young and quite inexperienced, but most of these are earnest, faithful, apt, and are desirous of improving. We have some others, however, who have been longer employed as teachers, that are apparently satisfied if they can barely obtain a third grade certificate from year to year, get through with their duties easily, draw their salaries regularly, and hold on to their positions without making much effort to rise in their profession above mediocrity. But we have still another class who have adopted teaching as their life work, and are competent, efficient, ambitious and progressive, and they embrace every opportunity for improvement and advancement in knowledge, and the theory and practice of teaching. And, as a whole, I believe our corps of teachers will compare favorably with any body of teachers of equal number in the county, and, perhaps, I might say in the State.

The order maintained in most of the schools was excellent. During the last half of the year in several of the schools, whipping or flogging was avoided altogether, while in some schools the teachers occasionally made use of the rod or strap to enforce obedience. But the better order was secured in those schools which did not make use of them. It is proposed this year to dispense with their use in *all* the schools, and I hope to be able to testify in may next annual report, that the teachers of this town have succeeded in securing obedience and good order in their schools, without disobeying the eighty-first

section of the school law.

Early in the year a new school building was commenced in the Third Ward, but for several reasons, yet principally for want of the necessary funds, the work on said building was suspended for several

months and was resumed again soon after the election of five new members of the Board of Education, and the building is now under roof and will soon be enclosed. It is probable, however, that it will not be ready for the use of the schools much before the beginning of another school year. When completed, it will be a creditable building, the cost of which, including land, outbuildings, cisterns, fences and furniture, will not propably fall much below \$28,000.

It will seat without including the basement about six hundred children. The basement story is nine or ten feet between floors, and if finished and furnished would seat of primary children about one hundred and fifty to two hundred more, and would make much more suitable rooms for said primary schools, than several of the rooms we

are compelled to use for the purpose at present.

During a part of the year much dissatisfaction was expressed by many of the citizens with the action of the Board in commencing the erection of such a building. But the Board was not deterred in its efforts, by the complaints and taunts of the dissatisfied and grumblers, and has steadily persevered until now that the building approaches completion, the grumbling has nearly ceased, and the dissatisfaction appears to be confined to a very small portion of the community. Our people are aware that there is a pressing necessity for greater and better school accommodations, and now that the good work of supplying the demand has been commenced, it is to be hoped that it will continue until our town shall have ample accommodations for its one thousand and seven hundred children.

#### RAHWAY.

## D. J. Bunn, Secretary of Board of Education.

The Board of Education of the City of Rahway, in compliance with the act of incorporation, respectfully submit the following annual report for the year ending May 2, 1871:

The number of schools under charge of the Board is four (4). The number of teachers employed by the Board is seventeen (17).

The amount of appropriation for school purposes for the past year to the Board of Education was as follows:

Salaries of teachers		
Incidental expenses		
Books and furniture

# JOHN D. CHAPIN,

Chairman of Commissioners of Public Schools.

### SALEM.

# John R. Murphy, Superintendent.

I herewith send you the statistical report of the public schools of Salem city for the past school year.

According to your request, I also submit the following in reference

to the general interests of our schools:

The public schools in this city have always been far behind in the work of their true mission. Limited funds, the want of general and generous sympathy from the citizens, and especially from the wealthier and more influential of our citizens, have greatly embarrassed the Board of Education in their work.

The members of the Board have tried to do the best they could under their unfavorable circumstances, but they have felt that our school buildings, the standard of studies and almost everything pertaining to our schools were such as to place them to great disadvantage. Our public schools were patronized more from necessity than

But there has been a gradual improvement during a few years past. The last year has witnessed a marked advance in all the interests of

our schools.

The Board of Education has had more funds to work with, the tone of public feeling towards our schools is better and parents are sending their children to public schools of preference. Rules for the government of the schools and a prescribed course of study has recently been adopted and published. A copy is sent to every family represented by pupils in the school. The new year has opened with a larger attendence than any previous year, and the future is full of promise to our public schools; and yet there is much to be done before they reach the position they ought to occupy.

I herewith submit a copy of our "Rules of Government" and

"Course of Studies."

Rules for the Government of the Salem Public Schools.

### RULE L

### TEACHERS.

The Principal of each school shall have the general direction and control of all the departments of their school, subject to the Board of Education, and shall be held responsible for the general government

and order of the school, and the observance of the Rules of Government by both pupils and teachers. They shall make a quarterly report to the Board of Education of the general condition and interests of the school.

### RULE II.

The principal of each Department shall be responsible for the government of that department, and shall make a quarterly report of the condition of the department to the Board of Education, signed by all the teachers of the department.

### RULE III.

The school-rooms shall be open and the teachers in attendance fifteen minutes before the time of calling the schools to order. A notice bell shall be rung at each school five minutes before the opening of the school. The teachers shall require every pupil to be in his or her seat at the opening of the school. Any late attendance must be noted by the teachers.

# RULE IV.

A daily record of the attendance, conduct and recitations of each pupil shall be kept, and a monthly average made on the last Friday of each school month.

### RULE V.

The principal of each Department shall have authority to excuse absentees and tardiness, but only when a sufficient cause is signed by the parent or guardian for such delinquency. In case of doubt the Principal may refer the matter to the Visiting Committee or Board of Education. All cases of absence or tardiness shall be indicated on the record.

### RULE VI.

All the teachers are required to be prompt and punctual in their attendance, and faithful in observing and enforcing all the rules of the school and in the discharge of all their respective duties.

### RULE VII.

### SCHOLARS.

All pupils on roll or in attendance at the close of the school year, who shall be present on the first day of the new school year, shall be regarded as already enrolled and entitled to seats, and shall be assigned, without examination, to the department and division to which they respectively belonged.

### RULE VIII.

Pupils who leave the school during the term time and enter again during the year, or at the beginning of another year, may be assigned without examination, to the department and division to which they belonged when they left the school.

### RULE IX.

All other pupils applying for admission, must be assigned, their place on examination.

# RULE X.

Every pupil is required to be punctual and prompt in attendance upon school and to be in his or her appointed seat at the opening of the school.

### RULE XI.

Each pupil shall, on entering the school, after disposing of such articles of clothing as may be necessary, in the place appointed for that purpose, proceed quietly to his or her seat, and await the opening services by the Principal.

# RULE XII.

Diligence in their studies, respectful deportment to their teachers, and kindness in their intercourse with their fellow pupils, are required from every pupil.

# RULE XIII.

Communications among the pupils, either by talking, whispering, sign, or writing during the hours appointed for study, restlessness

in their places, any unreasonable noise, or disorderly conduct, are strictly forbidden.

### RULE XIV.

Cleanliness of person and dress, propriety of deportment, truthfulness and honorable conduct, are expected of all.

# RULE XV.

Fighting, profane or indecent language, playing truant, wilfully injuring or defiling any part of the school buildings or furniture, using tobacco in school, or any other gross misconduct, will subject the offender to suspension till the next committee day.

### RULE XVI.

Pupils are required to observe all the rules of the school, and to obey the directions given to them by the teachers or other school authorities, not only during school hours, but also in coming to school and returning home. Any violation of the rules of the school will subject the offender to detention after school hours, or suspension till committee day, or such other lawful penalties as in the judgment of the teachers the case may demand.

### RILE XVII.

All cases of suspension shall be reported to the Visiting Committee who shall hear and adjudge the case on committee day. Pupils persistently negligent, refractory or disorderly, will be dismissed from the school.

### RULE XVIII.

A third unexcused absence or late attendance, in one month, shall suspend the pupil till the next committee or board meeting day.

# RULE XIX.

All suspensions shall involve the forfeiture of the seat occupied by the suspended pupil, but a restoration does not involve the repossession of the former seat. Restored pupils must take their chance for unoccupied seats.

### RITE XX.

The Board of Education will furnish the pupils with reading books, copy books, pens, ink, pencils and crayon. Parents or guardians will be required to furnish all other necessary books and stationery. If any book belonging to the school is lost or injured by any scholar, it must be replaced or paid for by the parent or guardian.

### RULE XXI.

The non-compliance of the parents or guardians, with any of the regulations of the schools, adopted by the Board of Education, will subject the pupil to suspension or dismission.

### RULE XXII.

### EXAMINATIONS AND PROMOTIONS.

Any pupil whose class average for the month falls below 60 shall be put back into the next lower class. Attendance and conduct shall be included in making up the class average.

### RULE XXIII.

There shall be three regular examinations each school year, during the last week of November, February and May.

### RULE XXIV.

An average of 65 of class and examination averages, on all the studies required in any given division, shall be necessary for promotion in the Primary and Secondary Departments, and from the Primary to the Secondary Department.

### RULE XXV.

An average of 70 of class and examination averages, shall be necessary for promotion from the Secondary to the Grammar Department and in the Grammar Department.

### RULE XXVI.

Promotion in the departments, from one division to another, may be made by the teachers in charge, upon satisfactory examination.

### RULE XXVII.

Promotion from one department to another, shall be made only by vote of the Board of Education, and upon the recommendation of a Committee of Examination and the Principals of the departments concerned. Good conduct as well as necessary scholarship shall be required for such promotion. The names and final average of all thus promoted shall be recorded in the minutes of the Board.

### RULE XXVIII.

SCHOOL HOURS, TERMS, VACATIONS, &C.

The schools shall be opened at 9 o'clock A.M. and 2 P.M., and shall close at 12 M. and  $4\frac{1}{2}$  P.M., excepting that during the months of November, December and January, they shall close at 4 P.M.

### RULE XXIX.

The school year shall begin with the first school-day of September, provided that day is not later in the week than Wednesday; in which case the schools shall commence on the following Monday. The year shall close on the Friday before July fourth.

Holidays-Christmas Day, and until January 2d, February 22nd,

National or State Thanksgiving or Fast Day.

### RULE XXX.

### BOARD AND COMMITTEE MEETINGS.

The Board of Education shall meet on the first Wednesday afternoon of each month. Their business meeting shall commence one hour before the close of the schools.

### RULE XXXI.

The Visiting Committee shall visit the schools on Wednesday afternoon of each week, at 3 o'clock.

### COURSE OF STUDIES.

The following Course of Studies, for the different departments and divisions in the school, has been adopted by the Board of Education. All pupils before entering an advance department or division, must pass a satisfactory examination on the studies as here designated, in the preceding department or division.

### PRIMARY DEPARTMENT.

# Class E.

Spelling—Alphabet, Spelling on Cards.

# Class D.

Spelling—On Cards. Reading—Parker & Watson's Primer. Arithmetic—Numbers.

### Class C.

Spelling and Reading combined. Reading—Primer completed, First Reader commenced. Arithmetic—Multiplication Table to the 6th line. Writing—On slate.

### Class B.

Spelling and Reading combined.
Reading—First Reader completed.
Arithmetic—Multiplication Table completed.
Writing—On slate.

# Class A.

Spelling and Reading combined.

Reading—Second Reader commenced.

Arithmetic—Tables, Weights and Measures, Mental and Written Arithmetic, Greenleaf's Elementary to page 33.

Geography—Monteith's First Lessons commenced.

Writing—In copy-book.

### SECONDARY DEPARTMENT.

# Class D.

Spelling—Town's Speller to page 56, Spelling and Reading combined.

Reading—Parker & Watson's Second Reader continued.

Arithmetic—Mental and Written continued, Greenleaf's Elementary to page 70.

Geography—Monteith's First Lessons completed.

Writing—In copy-book.

### Class C.

Spelling—Town's Speller to page 72. Spelling and Reading combined.

Reading—Second Reader completed and reviewed.

Arithmetic—Mental and Written continued, Elementary to page 105.

Geography-Monteith's Introductory completed.

Writing—In copy-book.

### Class B.

Spelling—Town's Speller to page 92, Spelling and Reading combined.

Reading—Third Reader commenced. Arithmetic—Elementary to page 130.

Geography—Colton & Fitch's Modern, to page 72.

Writing-In copy-book.

### Class A.

Spelling—Town's Speller to page 114, Lynd's First Book of Etymology, to page 48.

Reading—Third Reader continued.

Arithmetic—Elementary to page 177.

Geography—Colton & Fitch's Modern completed, Map Drawing.

Writing—In copy-book.

The B and A Classes of this Department also have Declamation.

### GRAMMAR DEPARTMENT.

# Class D.

Spelling and Etymology—Town's Speller completed and reviewed, Etymology to page 120.

Reading-Parker & Watson's Third Reader reviewed.

Arithmetic—Greenleaf's Elementary completed and reviewed.
Geography—Monteith's No 4 commenced, Apgar's Map Drawing.
Grammar—Hart's Part 1st commenced.

### Class C.

Spelling and Etymology—Etymology completed to page 184. Reading—Fourth Reader commenced. Arithmetic—Common School to page 194. Geography—No. 4 and Map Drawing continued. Grammar—Part 1st completed.

## Class B.

Spelling and Etymology—Lynd's Class Book on Etymology com-

Reading—Fourth Reader commenced.

Arithmetic—Common School completed.
Geography—Warren's Physical Geography commenced.
Grammar—Hart's Grammar commenced.

### Class A.

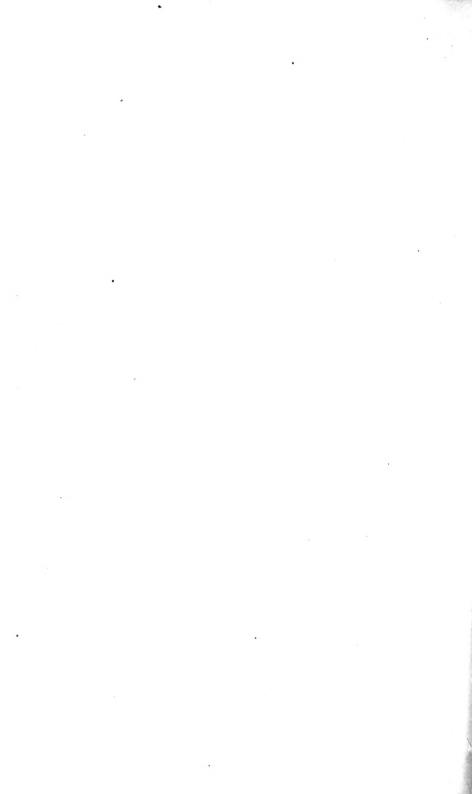

Spelling and Etymology—Class Book on Etymology completed.

Reading and History—Fifth Reader, History.

Arithmetic—National Arithmetic, Select Studies,

Geography—Physical Geography continued, Natural Philosophy. Grammar—Grammar continued.

Penmanship, Composition and Declamation by all the classes of this Department.

# REPORTS OF COUNTY SUPERINTENDENTS.

# REPORTS OF COUNTY SUPERINTENDENTS.

# ATLANTIC COUNTY.

CALVIN WRIGHT, SUPERINTENDENT.

In accordance with the design of the school law of the State, and agreeably to the regulations of the State Board of Education, I have the honor to transmit herewith my statistical report, together with such other tacts as have transpired in connection with educational matters during the school year, ending August 31, 1870. In looking back to the time at which the present school law went into effect, I think, on comparing the present with the past, we can see much for which we have abundant reason to congratulate the public at large,

and particularly the people of Atlantic county.

Although the educational interests of the county had been gradually on the increase for some ten or fifteen years previous to the enactment of the present law, there was no time during that period, in which such rapid strides were made as has been manifest for the past three years in which the new school law has been operating. The little opposition with which it met in its incipient stages, has been met and overcome more by its practical workings than by the arguments of its friends till now we find none who wish to return to the old order of things; but on the contrary, the grand rallying cry seems to be "onward and upward."

The progressive movements of the age are, perhaps, no more manifest in any one thing, than in the increasing interest we everywhere witness in the cause of education; and I am happy to say that Atlantic county, although among the least of the counties in the State in point of population, manifests her willingness to be among the

foremost in the great work of educational reform.

By reference to the statistical report for the county, it will be seen, by comparing with previous reports, that the value of public school property in the county has been gradually on the increase, to-

gether with teachers' salaries; and judging from the present inquiry for good teachers irrespective of salary, the time is not far distant when Atlantic county will not feel humiliated by placing herself beside her sister counties.

By reference to the township of Weymouth, hitherto among those manifesting the least interest in educational matters, it will be observed that she has started in the right direction. District No. 26 (Tuckahoe), has authorized the erection of a new school building, by voting the levy of a respectable tax on their district of \$2,500. District No. 7, (Unionville,) in Galloway township, has authorized the levy of the same tax to be raised in annual installments of \$250. District No. 43, (Pleasant Mills,) in Mullica township, has also started in the right direction, but has lain a foundation too small to admit of sanguine hopes of very great results, \$500 being a sum too small for the erection of a building sufficient to meet the demands of such a district. But "half a loaf," &c., will apply very well in her case, hoping the district will take a more generous, enlightened, not to say a more economical view of the matter at a time not far in the future. District No. 44, (Elwood,) has a fair house and gives an earnest of her future, in saying by her acts, that "we mean to keep step to the march of improvement."

Buena Vista township stands first, according to her population in the aggregate of good school buildings. No. 32, (Buena Vista), No. 33, (Newtonville,) and No. 34, (New Germany,) have new buildings, all of which have been completed within the past three years; the last of which, I believe, was done through the instigation and influence of one of our worthy county examiners, Mr. J. A. Herr, upon whom, with our most esteemed friend of Atlantic City, Mr. S. R. Morse, who have hitherto been our most active co-laborers, and have always been ready to give a helping hand in the right way at the right time, I cannot bestow too much praise for their untiring zeal in the good cause. The wheels of educational progress are certainly in motion in the county, and to accelerate their speed, it is only necessary that the above recited examples be imitated by their sister It may not be improper to say here, that our institute of districts. last February was a perfect success, at which, during a portion of the time we were honored by the presence of our worthy State Superintendent, who, I believe, gave the affair his unqualified approbation, and I have reason for believing it promotive of great good.

The township system with some modifications, receives the approval of a majority of the districts that have reported; some wish for more time to consider, some are willing to submit to the majority of the township and a few have not reported at all. A respectable minority, however, of those reported, disapprove. The prominent objection seems to be that the entire Board of Trustees in a township, will consist of men belonging to the same political party, and consequently the educational machinery of the township will be run by political wire-pullers; to obviate which, it is suggested by some, that the Board of Trustees be appointed by the County Superintendent, or be subject to an examination by the Board of County Examiners, with reference to their qualification for the office. The great commendable feature of the "township system," in my estimation, is that which gives the weaker districts an equal chance with the stronger. As the law now is, we know that the disadvantages under which the smaller districts labor are almost insurmountable, in consequence of the unwillingness on their part to burden themselves with a district tax sufficient to enable them to compete with their stronger sister districts, which now receive the great share of public funds, of which the individual tax-payer of the weaker district pays no less than he of the stronger.

The present school law has certainly done much for the cause of education in our State; but to say that it is not susceptible of improvement, in the face of so radical a defect, seems to me sheer presumption. The provisions of a school law should be such that, by its operations, equal advantages may accrue to all. Short of this, something is wrong, and the remedy for the wrong should be applied whenever the wrong becomes so obvious as the one under consideration. The true remedy, in my opinion, consists in a *general* free school system, but if we cannot have all we need, let us have as much

of it as we can get and trust to the future for a full supply.

Therefore give us the "township system" till we can get the general free school system, which, I verily believe, is not far in the future; and I would that it might be forthcoming during the next session of our Legislature, when New Jersey will stand among the foremost in

the great cause of truth and right.

# BERGEN COUNTY.

# ALEXANDER CASS, SUPERINTENDENT.

Nothing of material interest has occurred since I rendered my last report. The present school law works well. An increased interest is manifested in public education by such as are directly interested in the same, and by others who appreciate the elevation of the public morals.

No one objects to the now fully established system, having the

State Board for its head, and descending, step by step, to the humblest teacher, harmonizing the several gradations and preventing the many local strifes which formerly engendered bitter feeling and embarrassed the school officers.

The teachers, comprising graduates of the Normal School, as well as others that have not received the advantages derived from special training, are becoming more and more efficient and acceptable. A much higher degree of qualification is exacted than formerly, of which the schools receive the benefit.

Our school houses, as a general rule, are far in advance of what they were two or more years ago. The new school houses at Englewood and Rutherford Park are now complete, and have all the modern improvements. The two in the village of Hackensack, as well as several others, have been enlarged. Several of our schools have three teachers each. In the first mentioned, a fixed compensation of \$2,000 per annum is paid to the principal and his two lady assistants. The townships are liberal in raising money by tax, and the specially organized districts are still more so, since in all such the schools are entirely free.

Last May, after my re-appointment, I appointed J. H. Walker, and re-appointed B. F. Shaffer, as examiners, both being fully competent,

having had large experience in the profession.

During my official year I made one hundred and thirty seven visits, and on every occasion the trustees and inhabitants were kind and obliging, duly appreciating the affinity of the townships in regard to schools, which heretofore was confined to the schools of each township, independently of every other. In nearly every district visit, the trustees, or some of them, as well as one or more of the inhabitants, accompanied me. The statements above recited furnish the best evidence of increased attachment to educational matters on the part of the people.

# BURLINGTON COUNTY.

William Hutchison, Superintendent.

In attempting to give a succinct statement of the condition, apart from what is contained in my tabular report, of the condition of the public schools in this county, it may not be improper to advert, first of all, to the pleasing fact that more new school houses have been projected, are in course of completion, or have been erected, during

the past year than during any similar period in the history of the county. The general character, also, of these new structures affords gratifying evidence of an improved state of public opinion as to what constitutes a school house. It is not to be denied that, in the past, too frequently, a mean and parsimonious spirit, born of ignorance and prejudice, or some other as lamentable couple, has been permitted to dietate to the architect everything in regard to size, shape, style, materials, location, surroundings, interior accommodations and external appearance; and the miserly and miserable rule of "what can be made to do" has governed in the case of the school house, with men who would have blushed had they been accused of applying the same rule to the construction of a barn or an outhouse intended for the comfort of their beasts of burthen. Here, as in all things that concern "the school." a generous purpose should prevail. The finest site that the district affords, centrally located, should always be chosen. Elevated, that it may catch, on the most sultry day each freshest breath of air that stirs, the shelter and companionship of trees, too, should be sought—the classic beach, the umbrageous maple, and the fairy-peopled oak. The house itself should be as comfortable and convenient as it can be made. Bare and unsightly walls should be covered with maps and charts to instruct the mind, and with pictures selected to please the eve and cultivate the taste. Instead of shivering in a fetid atmosphere, the pupils should, in winter, breathe in a warm, well ventilated apartment. The rude pine bench, that wearies and wears out "a trustee" in the time of a visit or two, should be discarded for those better substitutes, "modern school furniture." In short, the school house, within and without, should be all that wealth and art, and taste can make it.

In proof of the statement that our people are ordering these things better now than in the past, it may be stated that at Woodmansie, a district away "down in the Pines," a building has been projected at a minimum cost of four thousand dollars, intended to take the place of the one heretofore in use, and most accurately described by the district clerk as "a shanty;" at Chesterville, one of our most charmingly situated hamlets, an admirably finished and furnished building of brick has just been completed, near enough to the wooden "pen," whose office it will hereafter supersede, to justify by the contrast while the latter stands, the feeling which more than once incited me to drive that way on some tempestnous night and apply an iconoclastic "match" to this "temple of learning;" at Westfield, the building heretofore used as a school house, and belonging to the Society of Friends, is to be replaced by one now in course of erection, under the control of a Board elected in accordance with the provisions of the law; New Albany, a new district recently laid off, has its new house, at this date, almost completed; Lower Mansfield has torn down the wooden structure erected almost a century ago by the Friends, and in its stead built of bricks, and fitted up with modern

furniture, one of which the children may be proud, and with which the people should be abundantly satisfied; Florence, after an irrepressible conflict for years on the part of a few brave, energetic and determined men, will in a few weeks, be in happy possession of a

house worthy of that thriving village.

I divided what is known as the "Irick District" in Burlington township, making of the portion lying towards Burlington City a new district, and have given it the name "Mitchell," in recognition of the liberality displayed by John Mitchell, who had given the feesimple of a lot of land ample for the uses of the district, perhaps for all time to come. Instances of liberality such as Mr. Mitchell's deserve to have attention called to them, if for no other purpose that those almost like-minded may imitate his good example and go and do likewise.

Among the many districts that have done more or less to, at least improve their school house, it would be an omission almost unpardonable not to call attention to what Bordentown has done. Already furnished with a capacious building, the facilities in the way of classroom accommodations were not such as to subserve the best interests of the school. The Board, therefore, after mature deliberation, concluded to ask the people for a few additional thousands to enable them to utilize all the space of which they were already in possession. If I am not mistaken, the people of this district have never yet refused, declined or hesitated to vote any amount of money deemed necessary for the use or the improvement of their schools; and so with a unanimity in this instance, by no means singular, the entire sum asked was granted. The Board proceeded immediately upon the closing of the school, to put the building in a condition in almost every respect, upon a par with the best of Philadelphia school structures, if I may except that of school furniture—desks—which it must be confessed, having been constructed after a pattern happily obsolete or lost, lack in strict conformation to modern principles of hvgiene.

Many other districts—so many, indeed, that the space to which this portion of my report is, of necessity, limited, prevents me from mentioning in detail—have done, or are doing, *something* in the mat-

ter of improvement to their school buildings.

You will readily believe that this spirit of improvement, so generally diffused, affords me occasion 6 sincere gratification. To many of the districts before named. I had special invitations to meet and address the people in view of the desirability of improved school accommodations; and whether or not it was already, what our French brethren would call "an accomplished fact," a new school house, or an improved one, always followed.

An experience of a year and a half in the work of superintendence convinces me that, in a county so large as Burlington, the rule of your Board requiring the Superintendent to visit each school at least twice

a year is impossible, either in the way of satisfaction to himself regarding what is expected to be attained by him during these visitations, or in respect of the amount of good supposed to be derived from his instructions by the teachers and pupils. The time to which he is limited is too short in which to effect much good. The teacherhe may be your personal friend, or a former student of your school is not at his ease. The pupils are filled with wonderment very similar to that with which they regard "the new minister;" no matter how much sound doctrine the latter may preach; no matter how much good, pertinent and profitable instruction the former may give, the novelty of the situation prevents them from carrying away much of either. Do not understand me to undervalue this portion—I will not say of his duty, merely, but—of his most pleasurable privileges; nor do I think that their number should be diminished, but, rather, if a reasonable measure of good is to be accomplished, made more fre-Their number must be increased, or some other better plan be devised and carried into effect, by which work, which shall have the different stages of its progress distinctly marked, be accomplished. The method of examination, written and oral, as now conducted under the law has, in my judgment, done much to raise the standard of education in the county; but even this falls short in cases where one would least expect, as candidates who have once, and even twice, passed this ordeal successfully have, on presenting themselves a third time, been remorselessly "plucked," owing to the fact that they had not only not advanced beyond, but had fallen below, their former standard, either from want of application during the year, from listlessness, laziness, or some other cause which makes no good reason.

It may be demanded that the only way by which we can hope to elevate the standard of any school, is by first "elevating" the teacher; and this, it will be confessed, is impossible to be attained, except in the most limited degree by a day's teaching repeated every

month in the year.

To obviate this difficulty, and to render my services more vitally effective; I propose, with the concurrence of the several township Boards of Trustees, to organize a "Teachers' Institute" in every township in the county. The teachers will make their own organization, elect their officers, arrange the order of exercises, assign subjects for discussion, &c.; and I hope that, by a little attention to the calendar, the time at which these monthly meetings of the different township Institutes will be held, may be so arranged as to enable me to be present with the teachers of the entire county many more times, during the year, than could possiby be otherwise done.

How far all the township Boards may be impressed by my views

How far all the township Boards may be impressed by my views on this subject, is yet to be tested. I have been preparing the way by individual representations of the matter, personally and by correspondence, with both teachers and trustees. Some difficulties must, of course be met and overcome. If all the meetings were to be held on Saturdays, it would actually increase the school-month by one day; and to this teachers may demur. If held on one of the school days, it will shorten the month just that much; and to this the trustees may object. But I am satisfied that the advantages to be derived from these meetings by the teachers, advantages in which the school will, immediately, directly and continuously share, will more than compensate for the apparent loss of a day in either case. It may be safely assumed that all those townships according with these views and acting upon them, will continue to so act from year to year, and so encourage, if they do not require, the teachers to instant in their attendance upon these unsurpassed means of advancement in a "calling" which does not yet admit, except in rare cases, to be dignified

with name of profession.

During the last winter those was held in the Court House, at Mount Holly, a second convention of the trustees of the county, called to consider a change from the present district system to the township This meeting disclosed the remarkable fact that some who had, from the first and all along, been known and considered the most persistent opponents of the "new school law," suddenly became enamored of that law as many unreasoning men have been observed to do when anything is said about "the Constitution." If this love had been one born of knowledge, or sprung from the discovery of some new and hitherto hidden beauty in that law, or of some secret and cunning device, skilfully concealed in the terms of the proposed change, whereby the liberties of the people were to be tolled away from them, it might, at least, have challenged some other feeling than either pity or contempt. It would, however, be unjust to conclude that this was the character of any respectable number of those composing the convention. On the contrary, a large majority of those present were favorably impressed, as they were intelligent enough to see and appreciate the elements of reform and improvement in the proposed change. To the different sections of the bill, these gave careful attention and a patient consideration, and where objections were urged or suggestions offered, they were made in a spirit of candor and presented in a manner animated by a zeal that evidently was ready to warm towards anything that might promise to be made accrue to the good of our public schools. The most weighty objection perhaps, made to any portion of the bill was in that relating to the sub-division of the townships into sections, regulated by population, and constituting a township board, inflexibly six (6) in number. was assumed that one grand object sought to be gained by the change was, to rid us of those miserably perplexing and constantly varying creatures of all previous enactment, district boundaries. It was suggested, as meeting the views of nearly the entire convention, that each and every public school should be represented in this Board, and so making the number of the Board depend upon the number of

schools, and, of course, to vary with them. Those, it was argued, whose interests were identified with a given school, would nominate one of their own number to be voted for upon the general township ticket, and thus the school would always be sure of a representation in the Board. Some one or two astute and far seeing members of that race known as "professional politicians," were seized with serious alarm lest the placing of the names of six candidates for the office of School Trustees, upon a general ticket might cause "school matters to run into politics." It was rejoined, and I think justly, that any success in the management of the schools would be duly credited to "the party," and any responsibility for failure promptly debited to the same organization. In this way the responsibility, in either case, could be fixed somewhere. Now it is nowhere. If the work of the district is done at all and done well, it is all done, in a majority of instances, by one man. In the very best school in the county, ostensibly "managed" by the largest board in the county, almost the entire work is done by one man; one who earliest in the field as the champion of "Free Schools," has ever since stood like St. Simeon Stylites, upon a column where was room for only one; enduring, at times, the pitiless rains of opposition, to shine out only the more clearly in the warm sun-light, as the unfailing and untiring servant of the people always serving for the good of the people.

In making all my appointments to fill vacancies caused by either the death or the resignation of any member of any Board, I have never allowed myself to be influenced by either personal or political considerations. In all cases the remaining, or surviving members have been first consulted. In no instance, to my knowledge, when the person so appointed has, desired his election afterwards at the hands of the people, or has signified a willingness to serve if elected, has he failed to be elected; sometimes, without opposition, and sometimes when opposed, by a majority so overwhelming as to prove, conclusively, that the proper man—if the verdict of the people so ex-

pressed, is worth anything—had been selected.

It is not unworthy of remark that the compensation now paid to County Superintendent, is entirely inadequate to the amount of work to be done by any one qualified to do it. Would it not be well to demand of the Legislature, as a matter of right, that the present

rates of salaries should be doubled?

### CAMDEN COUNTY.

# ALEXANDER GILMORE, EX-SUPERINTENDENT.

In presenting my report for the portion of the school year 1869-1870, thus far transpired, I will commence with the meetings of the "Township Boards." These have all been called, and all have convened with one exception. This failed to meet on account of some unfavorable circumstances connected with the day on which it was appointed. There was not time to arrange for another meeting before the expiration of my term of office. These meetings are occasions of great importance, affording an opportunity to discuss the various question relating to the interests of the schools in the several townships.

Seventy-eight visits to schools have been made during the period

embraced in this report.

Two new school houses had been opened since my report in October, 1869. One of these is located at Atco, Waterford township; a two-story building, arranged in modern style, with a teacher well qualified for her work. The cost of this house is \$1,500. Nearly

an acre of ground is attached.

The other is situated in Haddonfield, Haddon township, a description of which was contained in my report presented in October last. The "opening" of this school edifice in the month of March was an occasion of great interest. The State Superintendent and the Principal of the Normal School were invited, who delivered very interesting addresses on the subject of education. These gentlemen were followed by several citizens of the town, who gave reminiscences of their school days, contrasting those times with the present, showing the superior literary advantages with which the children of the present generation are favored. The County Superintendent congratulated the Trustees and the inhabitants of the town upon the consumnation of the enterprise. The large audience assembled to witness the "opening" retired with inspirations of gratitude, that the children will now be favored with such increased facilities for receiving instruction.

A new house is to be erected the current school year in Stockton township. Merchantville district (one recently formed) resolved, at its annual meeting in March, to build a new house, and voted a tax to accomplish the purpose. The Trustees were authorized to borrow \$3,000, besides \$1,000 tax to be levied the present year. A good

house is expected.

We held a Teachers' Institute at Williamstown in November last. I insert the account of it, as reported by a correspondent from the seat of the Institute:

"Williamstown, November 8, 1869.

"Friend Press:

""Tis education forms the common mind, Just as the twig is bent the tree's inclined."

"So sang one of England's favorite bards, and so was it most potently and practically illustrated at Williamstown during the present session of the Teachers' Institute. Never has it before been our pleasure to behold in our little 'hamlet' such a conlogression of wisdom, wit, knowledge and science; and, as we prophesied, it was a complete success, and the grand emanation of educational attainments has set all my classic soul aflow with a fiery ardor to have my name emblazoned on the escutcheon of fame, that it may stand tantamount to the immortal and immaculate 'Bachelor;' but of the grand functio extraordinare 'from which pure fount I am content to drink in.'

"The exercises opened as duly announced, on Wednesday afternoon. The Rev. John Fort was appointed President, and welcomed the teachers in a kind and feeling address. Mr. T. M. White was chosen Secretary, when the regular order of business was entered upon. There were teachers present to the number of thirty-three.

The preliminary duties being disposed of by way of singing and prayer, the President delivered a short homily in favor of education. in which his remarks were elucidated by irresistible arguments. It was both eloquent and powerful. Miss Richardson then delivered her elegantly prepared essay on the 'Utility of Teachers' Institutes,' reflecting not only great credit on her abilities as an essayist, but on the profession which she represented. Practical remarks were made by various teachers and the Superintendent of the county, full of useful hints to those engaged in 'teaching the young ideas how to shoot,' and of course 'Fido' came under that head. Miss Hillman also delivered her deep and well-propounded essay on 'School Government.' It was replete with wit, naivete and vivacious argument, and was one of the most striking of the essays of that species of scholastic erudition, and in the publication of which, as well as that of Miss Richardson, the public will have a mental treat of a very rare character. On this account we abstain from giving detached parts of them, for fear of marring the beauty of the whole. They are so intricately concatenated that it is impossible to epitomize them.

"On Wednesday afternoon, the State Superintendent, Professor Apgar, delivered an able address on the subject of geography, grappling with and so forcibly illustrating his theme as to render it most palpably evident that, as a geographer, he stands unrivalled in the State. He also made a practical illustration on the blackboard, sketching with unfailing accuracy perfect delineations of South Amer-

ica and the State of Georgia, with descriptions and the various objects connected with his subject, which were listened to with keen and evident satisfaction, and were greatly beneficial to the audience. thinking public lose a truly valuable production in its non-publication. He made the new and naive remark that, 'a person knew nothing himself until he had imparted it to another,' thus forcibly showing the practical use of the Institute. On Thursday afternoon and evening, Professor Watson, of New York, delighted us with a fine etymological and elocutional dissertation, showing the great power of the human voice, and read fine extracts from the American poets. Among the selections were 'The Wonderful One Hoss Shay,' which he read amidst peals of laughter, and 'Sheridan's Ride,' which was graphic and fine. He stands at the head of elocutionists. Dr. Hart, Principal of the Normal School at Trenton, N. J., read a lecture on the 'Method of Teaching,' which was replete with great research and deep philosophical knowledge. In the evening, after some miscellaneous business, he again entertained us with a very unique and interesting lecture on the 'Best Method of Teaching Grammar,' full of practicable hints to teachers, and was of a very high literary tone—a scholastic production of classical beauty and grammatical worth, holding the audience spellbound by its eloquence and diction. The Rev. Alexander Gilmore delivered a practical lecture on 'Arithmetic,' full of interest, worth and instruction; but, as we are trespassing on your hospitality, we will have to be brief on a subject so prolific. The Committee on Resolutions reported the following, which were unanimously adopted:

"Whereas, Education is an agency most potent in the promotion of peace and good order in society, in restraining vice, in elevating humanity, in preserving our rights and privileges as a people, and exalting us as a nation. And whereas, our public school system is the great areane through which knowledge is diffused; there-

fore,

"Be it Resolved, That in order to render the system more efficient, we would hereby recommend that all the public schools in the State be made free for the period of ten months in each year, and in order to secure this important event, we would also recommend that the entire fund be levied and raised by the State, and distributed among the several districts pro rata to the number of pupils.

"Resolved, That in view of the general satisfaction rendered in the government of schools under the present law, we do hereby

heartily endorse its wise provisions.

"Resolved, That the salaries now generally awarded for teaching are not a fair and just compensation for the services rendered, and while they have a tendency to degrade the teachers, they also prove positively disastrous to the profession by driving from this department many of the most efficient laborers to seek a more liberal support in other fields of enterprise.

"Resolved, That we deprecate the frequent changing of teachers prevalent in many districts, and that we regard the custom as seriously detrimental to the cause of education.

"Resolved, That when female teachers prove themselves qualified to fill the position assigned to male teachers, they should receive an

equivalent compensation for services rendered.

"Resolved, That we witness with pleasure the increasing interest manifested in the Teachers' Institute, and for the purpose of awakening a deeper interest in the cause of popular education, and for the diffusion of new ideas pertaining to the method of teaching and government, we would heartily endorse and strongly urge the officers and friends of education, the importance of giving them their support, aid and attention, and that we teachers do hereby pledge ourselves to sustain them.

"Resolved, That we gratefully recognize the favor conferred by the Trustees in the county, who so readily seconded the recommendation of the County Superintendent in granting the teachers the privilege of attending their Institute without being held subject for loss of time.

"Resolved, That we do hereby tender a vote of thanks to the County Superintendent. Rev. Mr. Gilmore, for his generous zeal manifested in behalf of education, and for the faithful discharge of his onerous duties.

"Resolved, That a vote of thanks be tendered to the Trustees of the Methodist Episcopal Church for the gratuitous use of their build-

ing during the present session. "Resolved, That we, the teachers and friends, attending the Institute, hereby tender to the numerous friends of education in Williamstown our heartfelt thanks for their kind and cordial welcome and gen-

erous hospitality tendered to us during the session.

"Resolved, That the poems and essays read before this Institute be requested for publication, and that the County Superintendent be requested to act as Publication Committee, by offering the same to county papers for publication, and a vote of thanks be hereby tendered them for the same.

"Resolved, That a vote of thanks be tendered the Rev. John Fort for his impartial presiding and his eloquent and powerful speech

on education.

"Resolved, That no more business being before the session, we be

adjourned by singing and prayer.

"Miss Sue D. Richardson, Miss Sallie C. Hillman, Miss Sarah B. Bugby, Mr. T. M. WHITE, Mr. A. S. Doughty,

Committee on Resolutions.

"Notwithstanding the above resolutions, Mr. Editor, I cannot close

without avowing, on my own behalf, that great credit and thanks are due to Messrs. Gilmore and Bugby for their untiring assiduity in making the Institute pass off with so much pleasure, and we, the citizens of Williamstown, return our reciprocal feelings and numerous thanks to the teachers for their kind and entertaining exercises, and bid them 'God Speed' in their noble work of instructing the youth of our land. Our hearts are with you, your interests are ours, ours yours.

"Let us then be up and doing, With a heart for every fate, Still achieving still pursuing: Learn to labor and to wait."

"Yours respectfully,

Fido."

I have issued forty-two certificates since my last report—twenty-one to males and an equal number to females. Of these two were first grade, three second grade, and thirty-seven third grade.

All the townships have voted a school tax of sufficient amount to entitle them to the State appropriation. Three have voted \$4.00 per scholar, one \$3.00, and six \$2.00 and upward, but not reaching \$3.00.

I had progressed in the work of constructing a map of the county, and was proceeding to lay out the districts thereon. It would have been completed before the time of presenting the annual report in October; but now, of course, that work will devolve upon my successor. To him will also be transferred an application for admission into the State Agricultural College.

# CAMDEN COUNTY.

# F. R. Brace, Superintendent.

In presenting this, my first report, let me in the outset record my thanks to the district clerks for their promptness in sending in their annual reports, only a few having failed to do this within the specified time. You will notice that nearly every column in the statistical table is complete. Gloucester City fails in its report because school registers were not supplied last year.

Having received my appointment only last May, about six weeks before all the schools were closed for the summer vacation, I am not

able to give as full a statement of the condition of educational matters

in the county as I would like to do.

I have visited about one-half of the schools, and found them generally in good working order. My short experience has satisfied me that there is much work to be done in Camden county. There is not accommodation for more than one-half of the children between five and eighteen years of age, in the school houses, and many of these school houses are totally unfit for educational purposes: small, low, unpainted, dilapidated, forlorn looking buildings, without any pretension to architectural proportion, the inside corresponding well with the outside, the plaster broken off the walls and ceiling in many places, panes of glass out, shutters shattered, floors uneven, desks and benches the old fashioned kind, long, high and curiously carved, the benches so high that the feet of the children cannot reach the floor, little pieces of blackboard or none at all, no maps, no charts, no cubical blocks, no globes, no anything. Nothing inside the school room to attract the little ones, nothing outside, unless it is the broad, beautiful fields that God clothes with their rich carpet of green, spangled with flowers of various hue and adorned with leafy trees. It will be a glad day when, in imitation of the great Creator, we shall make our homes and school houses as beautiful and as attractive as art and taste can make them. I do not wonder that so many children dislike to go to school. Were I å child to day, nothing but physical force would compel me to enter within these unsightly, unattractive, repulsive buildings called school houses; I would choose the broad meadows and the gentle streams, and take just what education nature would afford.

Only think of it, there are twenty-five school houses that are worth, land included, five hundred dollars and under, one of them valued by the district clerk at fifty dollars and another at fifty cents. But you must not think that all our school houses are like those described above. We have too many of that kind, but we have some that will compare favorably with any in the State. There are about fifteen neat, pleasant, commodious buildings in the rural districts, and two substantial structures in the Liberty and Haddon districts.

The one at Haddonfield is a beautiful model for any district to imitate. It is complete in all its arrangements and equipments, internal and external. A munificent liberality has been shown by the citizens in making the building what it ought to be—a first class workshop for the training of the young. Much credit is due to the Trustees, Messrs. May, McKnight and Jennings, for the energy and enthusiasm they have exhibited in pushing along this work to completion.

It is one of the good signs for the future that nearly all the Trustees in those districts where the buildings are so unfit for educational purposes, perceive and lament the state of things, and are endeavoring to bring the people up to the point of contributing or raising

money by tax to put up buildings that are worthy of the age and of the cause.

Our teachers will compare favorably in efficiency with those of other counties. Some of them cannot be surpassed. A great change is taking place in the matter of procuring teachers. The great question now is, not how low can they be obtained, but are they competent? The cry is, send us experienced teachers.

The Haddonfield school has been thoroughly organized and put under the care of Miss Clara J. Armstrong, formerly Principal of the Fredonia Training School, a lady who has a wide reputation as an

advocate of object teaching.

Meetings of all the township boards of trustees, but one, have been held, and the "township school system" thoroughly discussed. It was indersed with almost entire unanimity by almost every board.

The present district system, with its intricacies and endless contro-

versies, had scarcely an advocate.

One of the first matters attended to after my appointment, was to obtain the boundary lines of all the school districts in the county. This has been nearly accomplished. All the districts except six are marked out on my map. As soon as I obtain those six I will make a copy and send it to you. I ascertained on marking these lines that clerks of adjoining districts, in several instances, had been in the habit of taking the children of the same families and enrolling them on their several reports, two districts thus drawing money for the same children, and this for the last eight or nine years, and in one instance for the last twenty years. One family was found whose children had never been enrolled on any census report.

The annual meeting of the County Institute was held at Haddonfield. Thirty-eight teachers were in attendance. The week was a week of good work. Part of the time was occupied by prominent educators, such as Professors Kain, Apgar, Sypher, Corless, Peirce, Sanderson, Miss Armstrong and the State Superintendent, in explaining and illustrating various methods used in teaching the different branches, and part in discussions by the teachers on the different parts of the teachers' work. All expressed themselves well pleased with

the Institute.

### CAPE MAY COUNTY.

MAURICE BEESLEY, SUPERINTENDENT.

In reviewing the last school year ending August 31st, 1870, one particular as well as interesting feature in respect to the whole system of educational advancement in this county presents itself, and that is, the longer we try and put in force the provisions of the present school law, the more it is appreciated; and it is generally conceded that its wise enactments, now so fully endorsed and understood, have not only answered the ends intended, of dispensing its blessings to the youth of our State, but has likewise satisfied the community at large, with few exceptions, that the law, although not perfect, is so much in advance of all others that have preceded it, that we should accord it, as it justly deserves, our most grateful economiums. Then, what has been the result of its operations? In the first place, it has given a system where no system before existed. It has given correct and reliable reports of the status and financial condition of our schools, through our State Superintendent, where no reports were rendered and none exacted. It has given us, in many instances, new, substantial and beautiful school houses, where none but miserable, unsightly tenements, scarce fit for stables, formerly existed; and, as progress is the word, it will not be many years, under the present dispensation, before the balance of the old, worn-out and dilapidated houses yet remaining to disgrace some of the districts of the county, will be swept away by the force of public opinion, and in their place will spring up, "Phænix like," new, chaste and desirable edifices, alike creditable to those who conceived and those who consented to be taxed, whereby education, in its most exalted sense, can be dispensed to every child of our county, enlightening and enriching their minds, a consideration paramount, as all must admit, to all those of a pecuniary character. To endow a child with an education, to enable him to take a stand with his compeers, and to place him in a situation to stem the battle of life successfully, are certainly far better, and more likely to conduce to his happiness, than to shower upon him the things of this world. The mind, when once enlightened by the riches of education, is permanently benefitted, and they cannot take wings; but the riches incident to this world are fleeting and transitory.

The public examinations, which have been held regularly, have had the effect of giving a decidedly better class of teachers than formerly, and the provision that a third grade license shall hold them but for one year, makes them ambitious, at subsequent examinations, to advance to the second or first grade. And the trustees, now, not only enquire the grade a teacher possesses before they employ him, but likewise desire to know how high an average he has on the record.

There is one thing I have endeavored to impress upon our trustees, and that is the propriety of employing no teacher unless they hold a license in full force and virtue. They too often employ them without this necessary qualification, and the consequence is, they are not legal teachers in the eyes of the law, and in case of rejection before the Board of Examiners, they could receive no pay for the time they had taught. Numbers 8, 9, 12, 15 and 18, yet retain the old system of collecting tuition fees or head money. It would be beneficial to the schools adopting this plan, to follow out the State Superintendent's views as set forth in his last report, and abolish the system altogether. It leads to much trouble in collecting it, and to much hard feeling with the patrons who pay those bills, some refusing to pay The district tax system is decidedly preferable, where the township money fails to come up to the required amount necessary to keep the schools open at least eight months in the year. of ours have fallen short of five months, and one, No. 6, has had no teacher during the year. This inequality in the number of children in the districts, between five and eighteen years, leads to great detriment and hardship to the weak or smaller ones. It seems almost impossible to get a two-third vote to raise money by tax, and consequently the school is open for a limited time only, whereby the children are denied the benefits of the law, as showered upon the larger districts, consequently the cause of education in those districts, must assume a retrograde instead of an advance movement. Where districts are isolated, there seems to be no remedy. Where they are compact enough, it would be better that the small districts were united; then they could afford to hire competent teachers, and they could not labor under the disadvantage of having to take cheap ones, or such as they can get, as cheap teachers above all other commodities are certainly the dearest.

There are many difficulties likewise in introducing the new series of books as adopted by the Boards of Trustees of the Townships. A number of the schools have supplied themselves, too many however have only partially done so. No means having been provided to purchase books from the public fund, the trustees though favorable to the project have failed to accomplish this desirable end. It is apparent to every one that a school having a uniform system of books has decided advantages over those that have them not. No matter how accomplished and talented a teacher they may have, they will fail to come up to the standard that all our schools should emulate and strive to reach. The uniform system, besides dispensing information in advance of the various hues, kinds, and qualities of the old books, gives the teacher an opportunity to divide the school into larger classes, in all the different branches, and to institute practical opera-

tions on the black board, whereby he secures the advancement of his school and himself, the credit which a first-class teacher is entitled to. But what chance has a teacher to do justice to himself or his school, where almost every child has a book of a different aspect on the same subject? It is to be hoped some plan will be devised by these benighted districts, to remedy this evil, and advance them to the standard of mediocrity, if not to that of first-class schools.

The work I have had before me during the last year, has consisted of the usual routine of visiting the schools, corresponding with the district clerks, trustees and others, including many persons living out of the State, sending out the apportionments, visiting districts where conflicts arise in building new school houses, dividing districts, and other duties incumbent on the Superintendent, unnecessary to recapitulate.

All the schools were visited twice and some oftener with the exception of three, in one of which, No. 6, there was no school during the year, and two other, Nos. 3 and 7, were found open at my first visit, but were closed when I made my second call in April.

Of the twenty-seven teachers licensed and employed during the year, seventeen were females, and ten males. Two licenses were revoked, one for incompetency to teach, and one applicant was rejected.

The great disparity between the wages of males and females induces many of the trustees as a matter of economy, to employ the latter. And as the improved system of instruction as inculcated by the Normal School, has permeated its influence more or less throughout the State; the teachers generally pattern after its method, though many of them have not been pupils in that useful Institution. If female teachers perform the same duties, keep the same order, and advance the scholars in the same acceptable manner as the males, which I am prepared to say many of them do, then most assuredly they should receive the same pay as the males. The lowest wages paid to female teachers was in No. 9—only twelve dollars per month. The highest in No. 23—forty-five dollars per month, and the highest in No. 27—sixty-one dollars per month.

I have associated with me as an Examiner, Samuel B. Jarman, Principal of Tuckahoe School, in District No. 5; a gentleman amply competent for the position, and I shall have to make another selection soon. You will perceive by my statistical and financial report accompanying this: that the total amount of money raised by all the townships and districts of the county, including the State and surplus fund is \$14,838.51; and the number of children between five and eighteen years, 2,513; Cape May City having increased 117; and the

whole increase in the county is ninety-five.

In conclusion, in a question so momentous as that of the education of our rising generation, it is difficult to fully appreciate its vast importance and bearings, and the deep responsibility resting upon us, in seeing that no effort upon our part is neglected, to provide for and insure the necessary means and appliances, to encourage, foster, and perpetuate this great and glorious work. It requires energy, liberality and perseverance. It requires wisdom, forethought, and discretion. Combine all these elements together and place them in the hands of those competent to administer them, and the status of our schools will assume and maintain a position so near perfection, that all others may adopt as a model worthy imitation, and as the nee plus ultra of the age and spirit of the time.

# CUMBERLAND COUNTY.

### A. R. Jones. Superintendent.

I forwarded my statistical report to you by the 1st of October, and received a letter from you acknowledging the receipt of the same. My written report was not quite finished, but I completed and sent it within ten days. I did not ask for a receipt, but supposed you received it in due time, and gave myself no further concern about reports. You may judge of my surprise when I received your note of November 30th: "I have just sent my report to the printers. In looking it over, I find I have no written report from you. Has none been sent! If not, it will have to be sent immediately, or it will be too late."

The statistics of the schools are not as fresh in my mind as they were when I prepared the statistical report, and I do not feel as thoroughly inspired with the advancement and deficiences taught by the reports from the clerks of the districts. We wish to return our thanks to those clerks who have taken so much pains to carry out the provisions of the law. Some of them are very particular to have the teachers get their certificates before they hire, and will not give orders on the collectors until the teachers comply with all of the regulations.

As a general thing, the clerks have been very prompt in sending their reports of the districts.

Free Schools.—We believe that the majority of the people of this county are in favor of free schools, and they feel that the school law is unjust in requiring a two-thirds vote to make them free. They say that "a majority only is necessary in other matters; why should there be such an unreasonable discrimination in school affairs?" The majority, composed as a general thing, of the very best class of the

inhabitants, the liberal minded, noble hearted, progressive men, would willingly and cheerfully have good school houses, good school apparatus, and good teachers, but a despicable minority composed of the selfish, narrow-minded part of the community can dictate to the majority.

As we have stated in other reports, the schools of Bridgeton and Millville are free, and all of the schools of Greenwich, Landis and

Manrice River townships are free.

There have been some changes in the districts during the past year, so that we now have sixty districts and nine fractional parts of districts; thirty seven are free and twenty three are part pay. Last year we reported thirty five free. We have gained two during the year.

Our progress seems to be slow, but we hope it is sure.

We hope our people will examine the subject very carefully, and be influenced by the teachings of Him who said; "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me;" and by the example of those noble hearted men who are giving so much to build and endow institutions of learning. It is a small thing, indeed, for us to throw open the school room door and

bid all go in and drink at the fountain of knowledge.

A man said to me, one day, "I have no children to educate, but my neighbors have, and as I cannot expect to live long, I wish to do what I can towards making better men and women than we have now." If all were actuated by such noble impulses, we should have no trouble. When will the glorious day come when men will seek the happiness of others and not their own. A man who votes against free schools in one place would vote against them in another. He votes against the principle. And if we truly love this goodly heritage of ours, we will feel a deep interest in those who are to come after us; we will do all in our power to make good and useful citizens of the young. The friends of free schools have an important issue at stake, and we hope they will not get discouraged by reason of the way. The last signal made by the British Admiral on the morning of the battle-of Trafalgar, was in words which have become immortal: "England expects every man to do his duty."

The impression seems to prevail, that as we are as a nation so rapidly increasing in wealth and population, we are also growing rapidly in education. This impression should be corrected. We should know the truth. In 1840 it was found that one in thirteen of the free adult population could not read and write. In 1850 the number had increased to one in nine. In 1860, of our 13,634,033 free adult population, 1,218,011 were reported illiterate, and if we add the 1,745,140 slaves who were unable to read and write, we have 2,963,151 wholly unable to read and write; and if we add the 3,000,000 of young who are growing up in ignorance, we have nearly 6,000,000 in 1860, or, as Dr. Lee, who has carefully prepared statistical tables and Maps under the direction of the Department of Edu-

cation, says, 7,000,000 now. It is not worth while for us to comment upon such figures. All thinking men must admit that no nation can,

for any great length of time, carry such a load of ignorance.

In view of the above facts, America expects every man to do his duty. The forty-five different States of Europe have national systems of education, and by far the greater number make it compulsory upon parents to send their children to school. If the countries of the Old World find it necessary to educate, it is certainly very necessary for us.

Interest in Education is evidently on the increase, but we regret to say that it is not as deep and thorough as it ought to be, and I think much of this indifference is owing to the failures to build suitable houses and establish good schools in many districts. Meetings are called, but those whose souls are all shrivelled up come out in full force and vote down every progressive measure. The minority rules the majority. Those who would have good schools become discouraged, and send to the private schools. The townships voted \$14,452, a gain over last year of \$317. The districts voted \$13,930.

The township and districts of Landis vote \$12,171. The other seven townships, and districts of those townships, vote \$16,211. If we could have as much interest in every portion of the county as we have in Landis, we should aim to be the banner county of the State. We would not forget that there are many districts in the county that are doing well. The people of Bridgeton and Millville have reason to be proud of their schools. Bridgeton spent \$8,000 and Millville

\$10,000.

Deerfield, Stoe Creek and Landis each voted \$3 per scholar. The teachers reported a much better regular attendance than they did last year.

Efficiency of Teachers.—We have some excellent teachers in our county, who work hard and are very faithful, and we have some who are teaching because they have nothing else to do, and intend to get into some other business as soon as possible. Others are keeping school, not teaching; they have got into the ruts, into old worn paths, and they cannot get out. A majority of our teachers are young and inexperienced, but most of them show a strong desire to improve themselves by reading and conversing upon the subject of teaching.

We have not enough experienced teachers, and why? because, as we have said before, we will not pay them. There are young meu and women who love the work, but they soon learn that they will not be paid as they deserve; and who can blame them if they quit about the time they learn how to do it. There are trustees who are honorable and willing to pay for the services rendered, and there are others who would stand for days and refuse to hire a poor girl be-

cause she would not take five dollars less than her price. "Miss B. will teach for sixty dollars, and you ought to teach for that sum." But as a balance to such meanness we have the following: The trustees of a small district called upon a lady who was teaching and wished to engage her to take their school. She could not quite decide, but thought she would settle the matter by asking a price which she thought they would not be willing to give. She asked \$125 for three months. The trustees did not say that it is more than we have paid, or it is more than Miss A. gets, and we can't do it, but decided to give the price. We are very much pleased to know that many of our teachers are disposed to improve themselves by going to school.

Last winter a semi-monthly Institute was held at Shiloh and was well attended. Mr. B. G. Ames, Principal of Union Academy, assisted us, and is otherwise a great help to the cause of education. Let our teachers more thoroughly qualify themselves for the work and we hope the time will soon come when a wise and liberal people

will appreciate their labors and reward them.

Teachers cannot know too much. Section twelve of the Duties of Teachers of the Oswego Schools, says: "They should sparingly use the text book themselves, except for occasional reference, and should not permit it to be taken to the recitation seat to be referred to by the pupil, except in case of such exercises as absolutely require it." We have too much machine teaching.

Condition of School Buildings.—We have sixty-four school houses in the eight townships of the county; three are entirely unfit to teach in; eight poor and not suitable; eleven only medium; forty-two good, but not all of them properly seated. Of the forty-two, sixteen are very good. A new district in Deerfield township, has built a new house with two rooms. The people are new settlers, but they have done nobly. Two new houses have been built in District No. 5, Landis, one in District No. 11; one at Shiloh, and one at South Vineland. Six good houses have been built during the year. A pretty good work for one year. The people of Harmony district, Hopewell township, have thoroughly painted their house.

Improvements.—This item has been anticipated in the different

points already touched upon.

More money has been voted for educational purposes; our teachers are better prepared for the work; the attendance has been much better; we have six new school houses; we have a uniformity of books in nearly all of the schools.

The average price for male teachers has been raised from forty-one dollars per month, to forty-three dollars, and of female teachers

from twenty-three dollars to twenty-seven dollars per month.

Practical Effects of the New School Law.—Since the passage of the new school law, the citizens of the county have built eight new

houses, and enlarged, refurnished and painted fourteen.

We think the effects of the law have been to awaken a deeper interest in the cause of education, and to call the attention of the people more directly to the wants of the districts. I wish that I could report that all of the schools are free, but we must be patient, labor on, and wait.

Work.—In regard to my work I would report as follows: since September 1869, made the annual report to the State Superintendent, and during that month visited 32 schools, and travelled 144 miles.

In October, visited 40 schools, and traveled 145 miles.

In November, " 40 53 In December, 52 289 In January, – 6. 43 In February, 215In March, " 41 "
In April, " 39 "
In May, " 38 "
In June, " 19 " 186 " 119 97 In July, 12

Total for the year 400 visits, and traveled 1,838 miles.

There is a great deal of work done which cannot be appreciated by those not fully acquainted with the labors of the Superintendent. Such as clerks and trustees to appoint, teachers to examine, many letters to write; trustees and teachers to encourage and advise; advice to give to teachers about schools and to trustees about teachers, &c., &c. It is a pleasure to do any work which will in any way advance the interests of education.

So far as we have learned those who have examined the township system, are very much in favor of it, and I have heard but one man object. It will be a great thing for the small districts and those of the large, wealthy districts may not be very anxious for the change. I think it would be well if the State Board of Education would pass a regulation requiring the teachers of each township to have monthly meetings for mutual improvement. The Superintendent should meet with them. The meetings should be in the day time, and the time thus spent should be given to the teachers. I think our teachers would be very much pleased with such an arrangement.

The teachers and trustees have treated me very kindly and hospitably. One clerk said "you will always find the latch string out." I feel very thankful indeed for the many acts of kindness and hospi-

tality received during the year.

In looking over the labors of the past year, we find many things to strengthen and encourage us, as well as many things to sadden and discourage. The teachers complain that the trustees and parents

do not visit the school, do not take any interest in the children. In some schools there will not be a visit made by trustees or parents during the whole term. Let us all enter into the work with more spirit; work hard and leave the result with him who careth for all and remember that

"Sculptors of life are we, as we stand
With our soul uncarved before us,
Waiting the hour when, at God's command,
Our life-dream passes o'er us.
If we carve it then on the yielding stone,
With many a sharp incision,
Its heavenly beauty shall be our own,
Our lives that angel vision."

#### ESSEX COUNTY.

## CHARLES M. DAVIS, SUPERINTENDENT.

In obedience to law, I have the honor to present the following report. That part of Essex county which lies outside of the cities of Newark and Orange is the field under my charge, and to which the

following statements refer:

On comparing the statistics of the present year with my first report (rendered two years ago), a marked advance is to be noticed in almost every respect. The total amount then raised from all sources for school purposes was \$31,796.42; this year, \$63,094.68—an increase of nearly one hundred per cent. The value of school property then was \$108,750; this year it is \$171,158—an increase of forty-eight per cent.

The average pay of teachers has advanced from \$60.55 for males and \$33.34 for females, per month, to \$85.64 and \$35.62, respectively. This is because the teacher's work is more highly valued, and

also because there is a demand for higher qualifications.

I wish I could say that the rate-bill system had been abolished; but, although this has not yet been done, still we have been approaching it so steadily that I believe another year will see its death in

Essex county.

Two years ago there were fourteen districts in which the schools were not free; now there are seven. The amount of tuition fees then collected in those fourteen districts was \$2,178.06; in 1870 it was \$436.20, divided as follows:

District No. 15	\$125	78
District No. 16	25	00
District No. 17	70	00
District No. 21	93	00
District No. 23	32	42
District No. 25	25	00
District No. 26	65	00
	* 100	00

There are in those districts 694 children, and a district tax of 63 cents each would have made the schools free. Were the townships required by law to raise not less than four dollars for each child, no rate-bill would be necessary in any district in this county. I do not mean that such schools as I desire to see could be supported for that sum, but it would answer for such schools as we have in the country districts, which are the only ones where no district tax is raised.

The sentiment of the people is becoming fixed in favor of good public schools in many districts. Heavy taxes are assessed and willingly paid to erect suitable buildings and employ capable teachers.

There is nothing stationary with such citizens; as the facilities for giving a good education to the children increase, their ideas of what constitutes an education also enlarge, and their motto ever seems to be "forward." I regret that the outlying districts do not advance more rapidly, but I have hopes that the examples of those nearer the cities will steadily influence them to improve. Not that there is no im-

provement among them, but it is slow.

I wish to make especial mention of the teachers. It is an honor to be the superintendent of schools conducted by a corps of such teachers as are many of those now laboring in this county. There are among them not a few gentlemen of high intellectual endowments and scholarly attainments, who have made teaching their profession, and are enthusiastic in its practice. We have many ladies, too, of refined manners and careful culture, whose examples as well as instructions tend to the improvement of their pupils. Such teachers also elevate the profession and stimulate others to rival them. If fair pay were offered in all our districts there would be still more of this class.

And just here I may mention a custom which exists in some Boards of Trustees, in reference to the bargains they make with their teachers. It is an old one, but would be "more honored in the breach than in the observance." They engage their teacher at a certain sum per annum, and pay him by the month, a month's pay being not one-tenth, but one-twelfth of a year. For example: a teacher is engaged on the first of September at \$1,000 a year; at the end of five months he leaves the school, and receives not \$500 but \$416.66. If he stays the whole year, he receives a year's pay. But even then there is often trouble. Why not have it understood

that a school year is ten months, and a month's pay is one-tenth of a year's salary? Great progress has also been made in school houses and furniture. The sentiment in favor of providing good accommodations is almost universal. Every year several new buildings are erected, and old ones enlarged or repaired.

In Irvington last summer a new one was built at a cost of———; at the dedication, the State, County, and Newark City Superintend-

ents were present, and took part in the exercises.

A large addition has been made to the school house in Montclair, by which the accommodations have been nearly doubled. In East Orange two fine brick buildings are arising, at an expense of about \$30,000 each. Other districts are making arrangements to creet

equally good buildings next year.

With such improvement in our accommodations, and with such a body of teachers, it would be strange could I not report good progress in the schools themselves. In some cases higher studies are pursued, but the principal advance has been in more thorough and intelligent instruction in the main elements of a common school education.

More efforts are made by school officers to secure prompt attendance and good deportment on the part of pupils. In District No. 28, South Orange, the Trustees, among other prizes offered, give a gold coin to the pupil who is first in attendance, and also one of equal value to the pupil whose deportment is best. Last year there were two, Anna Klein and Mary Hogan, who were not absent once. In District No. 31, the same can be said (for the third time) of Florence Headly; and in No. 38, of David Asa Dodd. It is almost unnecessary to add that these scholars also stand among the first as regard deportment.

I have sent to most of the trustees and friends of education in the county the State Superintendent's Report on the Township School System. While some earnest friends of the cause think this change would work unfavorably in some cases, and would seriously retard progress in others, still the general opinion is in favor of the

change.

The vacancies in the Agricultural College are all filled.

#### GLOUCESTER COUNTY.

# WILLIAM MILLIGAN, SUPERINTENDENT.

My expectations of being able this year to compile my statistical report from the reports of the district clerks has not been realized, and I have been compelled to collect them from those of the teachers. The sentiment of the major portion of our people is in favor of free schools, and it is steadily advancing. Our people need to feel that they had better be taxed to support the public school than their prisons and county houses. The teeling against raising a District Tax is so great in some parts of the county, that none can be raised on account of the required two-thirds vote. Where such a tax is levied we find our best teachers and schools.

We have not in our county one school that can properly be called a *free* school, for they are compelled to furnish the books and other things that are necessary, and this often is a serious annoyance to the teachers. Although a smaller number are opposed to free schools, and whose ery is "let every man educate his own children or go without it," it is consoling to those who are interested in the education of the children of this State to know that such unchristian and unpatriotic views must soon be scattered to the four winds of

Heaven.

Our people are anxious that our schools should be made free by a State tax. Such a course would relieve us from much that is embarrassing. Only one township raises more than the two dollars required by law, and this causes trouble where a district is in two or more townships. Our trustees are mostly farmers or mechanics, and they do not all realize that maps, charts, globes, &c., are articles, just as much needed in the school-room, as farming implements on the farm, or tools in the workshop. That our interest has increased and is increasing since the passage of the "New School Law," is still further evinced this year, in the construction of a new house at Bellevue, and a handsome two-story building at Mount Pleasant (Five Points) at a cost of \$3,000. The colored school house at Woodbury has been enlarged and reseated. The house belonging to Mantua Grove has been repaired and reseated, and now presents a fine appearance.

We have some very faithful, earnest and enthusiastic teachers; teachers of long experience, and who love the work, and have made it their profession; but they feel that their labors are not appreciated from the fact that the people are not willing to pay that which they

feel is their right to expect, and hence every year we are obliged to part with some, from whom to separate causes pain, to know that they have left our ranks to take positions in more remunerative positions: We ask experience and falents, and we should be willing to pay for it. I find that a large number of the trustees do not visit the schools, and I am often told that there has been no one in since my last visit. I find that the children are quite as anxious to see me as their teachers, and I am often asked when I will be there again. Too many of our trustees have the impression that if they have a house, and a teacher to take charge of the school, his duties are at an end until a new teacher is needed. We have had our usual quarterly examinations, and find that our teachers are endeavoring to keep pace with the times. I have been faithfully assisted by William Iszard and Benjamin F. McCollister, gentlemen well known in our county as eminent educators. I have visited all my schools with the exception of five, which were not in session long enough to admit of it. I have met my Township Boards regularly, and expect to meet them again this month.

We feel that the "township system" would be preferable to that of the district, although objections might be raised against it, and so they might against anything human when men cavil with that which is divine. It would remove much of the machinery that is of a cumbrous character in the district system, and relieve us from some of the scenes that are enacted in our school houses on the Tuesday succeeding town meeting. Our people are very anxious to have the fiscal and school year to commence at the same time. Three of my districts failed to elect trustees.

At the August examination we examined Herbert F. Watson, a young gentleman from Clayton, who passed a creditable examination, and was recommended by us to the "Faculty of Rutger's College," to fill the vacancy to which this county was entitled.

#### HUDSON COUNTY.

# WILLIAM L. DICKINSON, SUPERINTENDENT.

In looking over my field of labor and in examining the results of my efforts during the past year, I find myself at a loss for something new to report.

The sameness which belongs of necessity to every well organized

plan of labor is especially apparent in our school system.

I can report a steady, healthy progress in educational interests, but

nothing unusual or startling.

Nothing has occurred during the year to diminish the interest which has been felt in our schools during years previous. They are free to all and have been free for many years. The constant, large increase which we are receiving to our population, makes it necessary every year to increase in some form our expenditures for school purposes. In all parts of our county, save two, such expenditures are freely, even gladly made.

The township of Harrison, reports 1,316 children, between the ages

of five and eighteen, but has no school house.

Two rooms are hired in a deserted factory, where two really faithful teachers, with most miserable furniture and no conveniences, vainly strive to do the work for which six teachers should be employed.

District No. 9, in Union township, has no better accommodation for its children than it had last year. The district has 132 children and provides them with a school house so poor that it is hard to say

that it ought not to be utterly condemned.

The Efficiency of the Teachers.—The number of teachers has been increased during the year from 204 to 238. It is remarkable that this increase has been confined almost wholly to the list of female teachers, the number of male teachers being only one larger than last year.

Our teachers as a body, grow more efficient every year. Whenever a poor teacher leaves a school, a better teacher with better pay is al-

most always appointed the successor.

The Condition of our School Accommodations, and the improvements that have been made during the past year.— The condition of the school accommodation, with the two exceptions already referred to is very satisfactory.

In many of the city schools trouble arises from the overcrowding of the primaries, this however will soon be removed by the erection of new school houses.

Three very fine brick school houses have been built by the young and thriving city of Bayonne, and one by the town of Greenville; Jersey City has two very large houses, rapidly approaching completion; Hoboken has one nearly finished.

These will accommodate a large number, perhaps all of those who are now in some cases most cruelly crowded into the Primary Schools.

The practical effects of the present School Law.—This is a county so largely made up of cities that as I stated in my last report, we are little affected by the provisions of the school law. Many of the benefits that the law has secured to all the towns in the State, had already been secured to the towns and cities of this county by special legislation.

That provision in the law which prevents the townships from raising more than four dollars per child, for school purposes, is regarded by many as unreasonable. Why should not the people of a township tax themselves, as much as they please to make as good schools as

they desire !

The work I have done in connection with the duties of my office, and such other information as may be of public interest.—The usual work of visiting the schools, counseling with trustees, distributing reports, blanks, &c., &c, I have performed as faithfully as I have been able. I have visited the schools and trustees from three to eight times each.

Several troublesome disputes have required my attention but I

think I have been able to settle them all without bitterness.

An attempt was made to induce candidates to offer themselves for the free scholarships in the Agricultural College. Three candidates were examined, only one of whom could sustain the examination prescribed by the College.

I consider myself fortunate in being able to retain the services of Messrs. Beale, Kelly and Drew as County Examiners. They are able, popular and efficient. While the growth of the public schools, in efficiency, numbers and attendance is very apparent, not less re-

markable is the growth of private schools.

The largest of these are the Roman Catholic Schools. It is not easy to obtain reliable statements of the number of children that attend the various private schools. Many of the children that attend the public schools during one part of the year, are found in the private schools during another part of the year.

The numbers given in the statistical report of those who attend private schools, or do not attend any school, are believed to be as

nearly correct as it was possible to make them.

It is proper here to make some reference to the Steven's Institute of Technology in Hoboken, endowed by the munificence of the late Edwin A. Stevens.

The value of the bequest made by him to establish the Institute,

cannot be less than \$800,000.

It is proposed to admit a large number of pupils from the public schools to free scholarships upon competitive examination. Should this be done a favorable influence upon the standard of scholarship of the schools will be exerted. The Institute will be opened in a few months.

#### HUNTERDON COUNTY.

# JOHN C. RAFFERTY, SUPERINTENDENT.

In compliance with instructions in your communication of the 15th

of April, I forward you the statistics requested.

Educational matters are progressing favorably and harmoniously in the county. I have nothing of special interest to add to my last annual report. The schools should be absolutely free; the public money should be used exclusively for the maintenance of free schools; the rate-bills should be abolished; the money raised by the townships should be imposed by a general law. The incorporation of every school district is one of the greatest improvements of the present law. The two-thirds vote required in the district meetings is the great clog on the erection of proper school buildings, it should be changed to a majority vote.

I have had, since my annual report, a number of disputed matters brought before me, which were acted upon; and I believe I hand over my parish in a comparatively quiet condition to my successor.

Licenses were granted at the quarterly examinations as follows:

In November—To Males, third grade	3
To Females, third grade	1
In February—To Males, third grade	9
To Females, third grade	8
To Males, second grade	1
To Males, first grade	5
Special examinations	11
•	
Total	

Fifty-nine school visitations have been made since October 1, 1869.

#### HUNTERDON COUNTY.

## C. S. Conkling, Superintendent.

The manifest design of a report is the faithful indication of condition, progress, or its opposite. This designed indication is attained by means of clear and comparative statements of facts and figures.

Essential to accurate report is definite knowledge of past as well

as abundant information of present position.

Past facts, with statistics of other years, are absolutely needful to correct announcement of the field and work now to be represented.

Every new incumbent of office, therefore, suffers no insignficant hindrance in presentation of honest report, arising essentially from lack of due knowledge of the former status of territory and past qualification of instruments employed in its culture.

Hence, the report of the recently appointed incumbent, of necessity, must be approximate rather than positive, and immediate more

than comparative.

As in duty bound, the Superintendent of Public Schools, for the county of Hunterdon, having endeavored faithfully, during his brief tenure in office, to inform himself by every proper means of the present condition of the educational interests of his county, hereby presents his first report:

The Condition of Public Sentiment.—The present school law of the State has hitherto found but little favor in many parts of this county. In some districts the law has been and remains decidedly unpopular.

There is, however, manifest though slow improvement in this particular. Just in proportion to true knowledge of the law, and faithful execution of its wise provisions, has been an increased approba-

tion.

One thing is certain, viz.: a very general and earnest desire for the improvement of the schools. Visits to the several townships have revealed the encouraging feature here alluded to. Emphatic and repeated enquiries have saluted us—"What can be done! "How can the needful improvements be best accomplished?"

The above and similar questions, often and earnestly addressed, should be regarded as the harbinger of the speedy elevation of our

schools.

Many parents, remembering their own slender opportunities, and feeling deeply their own, and often humiliating deficiences, are now

greatly anxious to furnish their own children and the children of their neighbors, the best means of obtaining a competent education.

A great awakening among the masses is apparent. This awakened condition needs to be carefully promoted and wisely extended by in-

telligent, and earnest addresses throughout the districts.

Visiting the schools with vigilant inspection and plain exhortation to teachers and scholars, though connected with kindest appeals to clerks and trustees, will not attain the desired high point of improvement. Parents, patrons, and tax-payers should all be appealed to and thoroughly aroused to duty.

Our programme for the winter months includes addresses at as

many points of the county as can be conveniently reached.

The District Boundaries.—The imperfectly defined boundaries of the districts have given no small amount of trouble. References to the Superintendent have been multiplied and often perplexing; satisfactory adjustment of these lines must be a matter of time. I hope, however, during the coming year to secure a clearly defined map of every district in the county, ready for immediate and intelligent reference.

In this connection I am happy to report that not a single new district has been created in the county. The districts are in many instances already too small. I have endeavored to show the people, that the benefit will be much greater, by bringing three districts into two, rather than making three out of two. I apprehend that this

desired end is about to be accomplished in several instances.

The School Buildings.—I have omitted intentionally in my report to indicate the condition of the school houses.

A reference to the last report of my predecessor shows that many of the buildings are *poor*. And doubtless not a few of those pro-

nounced good, should be made better.

Many of the school houses I know from personal inspection, are atterly unfit for comfortable occupancy. Much less then are they in any wise adapted to the dignified and successful uses to which they are now set apart.

I am well convinced that the health of many a child is greatly and

permanently impaired by confinement in these narrow walls.

On one occasion I had promised to call at a certain school house in a remote part of the county, and during the drive was eagerly on the lookout for said edifice, but did not suspect, until I had passed quite beyond it, that I had reached the spot. True, I had passed a certain ill-shapen, pent up and perched-up thing, but so little did the structure I had encountered comport with any proper idea of a school house, that I had unwittingly left it away in the distance ere I was duly apprised of the fact. Yet this very building is a fair type of no small number of buildings in the county, employed for the same high

purpose. I am, however, much consoled by the assurance that the trustees, in no small number of districts, are in waiting to unite in an emphatic condemnation of such dilapidated, narrow, ill-shapen and uncomfortable houses. My next report will doubtless announce the complete erection and proper furnishing of a goodly number of houses in the places now occupied by the above mentioned.

Hunterdon county, however, is not devoid utterly of some commodious and well furnished school buildings. These have been already

pointed out by my predecessor.

The borough of Clinton has been adorned during the past year with a noble academy edifice, exponent of the good taste and enterprise of its citizens.

The Teachers of the County.—Of these I am not yet fully prepared to speak; some of them I have not seen, and of the qualifications of some that I have met I cannot now give any opinion. I am, however, well persuaded, and not without reason, that this county can boast of workmen who need not be ashamed. I have sought, as opportunity offered, to inspire our "school masters and school madams" with love for their work and with zeal in their work, and with a self-respect for themselves and their high calling that may tend speedily to render obsolete the familiar phrase, "nothing but a school master." I have openly and heartily pledged myself to aid our teachers to elevate themselves. While permitted to speak of teachers in our borders abundantly qualified for their work, I apprehend there are incumbents who greatly need to tarry awhile at some Normal, until they learn to know what they do not now know, and also learn better to teach what they already know.

The Examinations and Examiners.—The quarterly examinations have been held promptly and in accordance with the prescribed instructions. I have endeavored to disabuse the minds of some who have hitherto looked unfriendly to these examinations. At the last examination I introduced some institute exercises, which seemed to be relished by the candidates. But for lack of time such exercises might be profitably extended; and but for the remoteness a series of exercises could easily be sustained. And notwithstanding the remoteness of the teachers, I look to the early inauguration of some important and regular exercises for the benefit of our teachers.

In the examinations I have been efficiently aided by Messrs. I. W. Leigh and L. K. Strouse, both actual teachers, holding first grade county license. Mr. Miller K. Reading, of the former board, also

assisted me at the first examination.

I have avoided the conferring of regular licenses at special examinations, preferring to grant a certificate to hold good only until the next quarterly examination.

The Statistical Tables.—These have been filled with tolerable accuracy. They are not as perfect as I desired to have them, but they are as correct as I could possibly make them. The timely collection of the reports of the district clerks and teachers has cost me a great amount of labor and anxiety. The tardiness and the imperfection with which many of these have been forwarded were not premeditated evil, but have resulted, in most cases, from badly-kept registers and the too frequent changes of teachers. Whenever our clerks and teachers shall have come to the full knowledge of the great inconvenience suffered by the superintendents in consequence of their delays and inaccuracies, I apprehend the evil will be speedily corrected.

### MERCER COUNTY.

WILLIAM J. GIBBY, SUPERINTENDENT.

In again transmitting my annual report, I take pleasure in recording the growing interest manifested by the school officers, and the marked improvement in their efficiency. This is observable, particularly in the promptitude with which the district clerks have made their annual reports; but to a no less degree in the correctness of the reports when first received at this office. The tardiness of last year places the promptitude of the present year in agreeable contrast; for, while the tenth of October witnessed the reception of the last report for last year, many of this year were in before the first of September. While the great majority performed this duty at the proper time, I regret to say that a few have been so delinquent as to leave me but a short time in which to prepare my statistical statement, with no time at all to institute comparisons or to deduce statements of value as showing our progress.

As an indication of the favorable estimation in which the schools are held, may be cited the fact that the best citizens often devote much valuable time to their local control; but a more favorable criterion exists in the action of some of the townships which have this year increased the insufficient stereotyped appropriation. More undoubtedly would have done the same were it not that the fund for schools is placed on the political ticket, becoming a party issue, often carrying against us, those who favor a larger sum, but who are precluded from voting as their convictions dictate. We can not afford

to mingle school matters with partizan politics. The two must be kept distinct to insure success. Ours must be the work of banding together all the friends of free public schools, no matter of what nationality, religion or politics. To accomplish this, our school affairs must be separate and distinct so that but one issue shall be presented to the voters drawing the dividing line between friends and enemies simply as such. My experience leads me to believe that the school moneys should be ordered at a time when it is the exclusive object of contention; in the same manner that we now choose trustees. I attempted, in one instance, to supplant the effect of the present practice by addressing a similar note to each party caucus, advising the appointment of a committee of conference, with power to determine upon a sum to be placed on both tickets. As far as its appointment I succeeded admirably, but a railroad meeting called away a part of the committee, and by some means, which no one seems to understand, the project was defeated. Unless we obtain relief in some other way there remains the alternative of a united and determined effort at the polls. Every friend of schools must attend the election precinct, and must exert his influence to induce voters to displace the insufficient amount by one adequate for the support of the free school, just as is done in substituting the opponent of an obnoxious candidate for an office. Even if we fail, we shall have the consolation of having done our duty.

Teachers exhibit a marked improvement in their examinations. The standings are usually higher. A laudable spirit prevails to perform the duties of the school-room thoroughly. I gladly bear testimony to the progress generally noticeable at each successive visit.

It is true that the securing of the requisite financial support is vital, but equally, if not more so, that the funds be so used, and the duties so performed, that the greatest advantage may accrue to the children of the State. What has been provided for this end, thus far, has accomplished a good work, and will continue to do so; but its efficiency would be immeasurably enhanced by the aid which would be afforded by a township board of five trustees, with the full control of the school, that is now enjoyed by the Board of Chosen Freeholders in their peculiar sphere. The public money is levied on the property for the equal benefit of the children. The man whose money we take, in some cases against his will, has the right to insist that it shall be so used that each child shall enjoy privileges equal to those enjoyed by any other child. It is certainly not the case now. If a district is sufficiently large, it supports a good school by the public money alone; but if the child happens to live in the corner of a township, in a small, weak district, with a poor house, the money is in most cases little better than squandered, for the teacher and other appointments are in keeping with the surroundings.

Again, what school officer of any extended experience will deny that one of the great obstacles in the way of good schools is neigh-

borhood prejudice? Who cannot point you to weak districts, made so by a separation in obeyance to the behests of a neighborhood difficulty? A board, not so large as to be unwieldy, would do justice in these cases, and in many of a purely local character, from which they would be far enough removed to prevent their prejudices from

warping their judgment.

Nothing good ever has existed, or ever will exist, without its enemies; so we, in this case, must expect to meet opposition. Some will array themselves against us from misunderstanding the ease; others from a thorough dislike of anything which tends to elevate the masses, or attempts to make the wealth of the nation its support. The time has come when all such must yield to the current that is overwhelming us. Irresistibly they will be borne along by the wave, or they will sink beneath it in insignificant and ineffectual opposition, creating scarcely a ripple upon the surface above them.

If we, as a republic, are to go down to future ages with our institutions, not only not impaired by the inroads of time, but embellished by new achievements in the onward march of greatness; if we expect to preserve this peerless structure, born of so many hardships and baptized over and over again with the blood of patriotism; if we owe any obligation to those who are to come after us, then it clearly becomes the duty of the State to insure its own permanence by the generous support and rigid supervision of its public schools—the

great hope of this free-thinking people.

#### MIDDLESEX COUNTY.

# Ralph Willis, Superintendent.

No pains have been spared to make the statistical report herewith presented accurate and complete. With one or two exceptions, the reports from the districts were promptly rendered, enabling me to commence my work at an early day, and affording time for whatever correspondence was needed in supplying omissions and correcting errors.

The statistical summary exhibits some advancement over that of the previous year, yet the results attained fall far below the measure of success attainable and still hopefully anticipated. Several old, dilapidated school houses are still tolerated, while others, in decent repair, are too small to accommodate the number of scholars. Many school houses are badly furnished, the desks and seats being con-

structed in such a way as to inflict the greatest possible discomfort and physical injury. We need not wonder that so many growing children are seen with drooping shoulders, and that spinal weakness is so prevalent a complaint among them. Nor need we wonder that children subjected to these uncomfortable positions through wearisome hours, day by day, contract a dislike for the school room and its duties. Think of dear little children compelled to sit for hours on a bench without a back, with their feet a foot from the floor, and made to behave themselves at that. Not one-half of our schools have decent blackboards, and a much smaller number have them of sufficient surface to be of general use. Wall maps are few and far between. Some teachers seem to have no occasion for the use of either blackboards or wall maps. A very large percentage of children of school age attend no school, either public or private. From this class of neglected children our reform schools, jails and penitentiaries are supplied. Some legislation is urgently needed to protect the State against the large amount of ruffianism and crime springing from this source. Among the evils of less magnitude, but seriously impeding the progress of public education, are the short time of attendance of most of the larger scholars and the irregular attendance of the scholars generally. In the winter months the older children are found in the school room in considerable numbers, but during other parts of the year most of them are absent, employed in the house or on the farm. The absence of the older scholars for so great a part of the year, and the fact that the short time they spend in school is occupied in reviewing studies almost forgotten, are a chief source of discouragement to zealous teachers and a chief cause of the backward condition of most of our schools. Nor are these absentees always the children of the poor and necessitous; very commonly they belong to the thrifty, money-making class, who, neglecting the educational wants of their children, consult chiefly their own convenience and pecuniary advantage. Perhaps a remedy might be found both for short and for irregular attendance in the adoption of a different basis for the apportionment of the State moneys, making the number of children who have attended school for five months of the school year the basis of distribution, instead of the number of children of school age in the district.

That feature of the school law, which allows Trustees to use twenty dollars only of the public funds for incidental expenses, operates unequally, and produces general dissatisfaction. The expenses of some schools, apart from teachers' wages, are twice or three times as great as those of others, and yet the allowance is the same. Provision is made in the law for a district tax to meet these expenses; but the two-third vote, upon which the assessment is conditioned, deprives two-thirds of the districts of any benefit from this source. The necessity arising is often so urgent as to oblige trustees to resort to a rate-bill for relief sometimes, we fear they are emboldened to violate the law, and use the public money. The law would be more

equitable, if it allowed twenty dollars for incidental expenses to each department of a school, and provided some remuneration for the services of district clerks. This office involves considerable trouble and responsibility: and, as it rarely receives any compensation, it is fast becoming unpopular, and undesirable. The question is often asked: "Am I not entitled to some compensation for my time and trouble, as district clerk?" When answered in the affirmative, another question is sure to follow: "How can I get it?" It cannot come out of the twenty dollars, which the law allows for incidental expenses, and the district will vote no money for this, or any other purpose. Here the conversation ends, unless the worthy clerk happens to say, in an undertone not altogether benevolent, "Somebody else can take the office!"

The law which makes no proper provision for the payment of district clerks, is equally innocent of any checks or penalties to be imposed upon them for misdemeanors in office. If so disposed, a district clerk may refuse to discharge his duties; may misapply the public funds, and use his influence against all school expenses and improvements, without any legal check or forfeiture. No matter how defiant and refractory he may be, he can hold his office while its term continues, in spite of everybody. Cases, like the one described, have been reported, and it is quite within the range of probability that

they will frequently occur.

Should the change contemplated in our school organization be carried into effect, viz: the substitution of Township Boards of Trustees, in place of the present district system, many of the inequalities and defects of the present school system will be removed. A favorable sentiment, it is believed, has been produced throughout the county by the distribution of the pamphlet, in which this subject is ably discussed by the State Superintendent. At the recent meetings of the township Boards of Trustees, this pamphlet was read, and the arguments presented carefully considered. From the views expressed it was apparent that those, who had bestowed much thought upon the proposed change, regarded it with favor. The important fact that the plan contemplated, is not a naked experiment, but one which has been, for sometime, in successful operation in several other States, was recognized by all as a plain and forcible argument.

Four quarterly examinations have been held, and sixty-seven candidates for teachers' certificates have been examined. Of these, fifty-one received certificates, and sixteen were unsuccessful. Forty-five of these certificates were of the third, five of the second, and one of the first grade. In this part of my duties I have been ably assisted by Captain E. Whitney, recently Principal of the public schools at South Amboy, and J. N. Smith, Principal of the public school at Metuchen. Both of these gentlemen are teachers of high standing and of superior scholarship. A larger number of higher grades would be secured, if it were possible to retain our best and most

promising teachers; but no sooner do they acquire character for ability and success, than they are taken from us by offers of better pay. As it is, we have a goodly number of competent and successful teachers, but we should have more of the higher grades, if those most diligent and faithful were better appreciated, and better paid. A few of our teachers have relinquished teaching for the greater portion of the year, and have sought to be better qualified for their work, by attending the Normal School at Trenton. We easily recognize the benefit such have derived from their connection with that institution. Nearly all the schools of the county have been visited twice during the year, some have been visited many more times. This part of the work is slow and toilsome. Bad weather and bad roads must be considered as well as the fact that these visits, most of them very distant, can be made only during short school hours. In this particular, my duty has been as fully performed as my other duties have permitted. With all my perplexities and fatigues I have taken pleasure in my work, and have endeavored to be prompt and faithful in meeting every requirement of my office. I have formed very pleasant acquaintances among teachers and trustees, and I shall always retain a grateful remembrance of the respect and kindness, with which I have everywhere been received.

### MONMOUTH COUNTY.

SAMUEL LOCKWOOD, SUPERINTENDENT.

Another year of labor in the educational interests of our county has closed, and it is believed, with positive and gratifying results in every portion of the field. The carefully tabulated statistical figures when compared with the same tables presented last year, show indisputable progress. And it gives me pleasure to be able to state my entire confidence in these figures. Indeed, so far from overstating, there is a severe accuracy in them. And yet, when rightly understood, they bear a greater amplitude of significance than appears upon their face. Take one statement for example: It would appear from the returns that the number of schools entirely free has not been increased in the county during the year. So the figures in strict honesty seem to say. I must confess my surprise at this result. But on more careful reading I found that they did show that public education is to-day much more free than it ever has been.

The report made a year ago shows that the amount then collected in the public schools of the county, by a "rate" tax on the children to eke out the necessary sum to keep the schools open, was \$2,336.62, for a population of 14,209 children of school age. In the present returns, the same item, as will be seen, stands \$1,677.49 for a population of 14,485 children; and if the returns of one school could be excepted, which holds an anomalous position among its fellows, in that it raises \$550 by tuition fees, it would be seen that the actual amount of tuition fees raised in the public schools is only \$1,127.49. But a closer examination will modify even this statement. The limitation in the law of \$20 from the public funds for incidental expenses, and the very great difficulty of obtaining the two-thirds vote in a district to provide the necessary means, has begotten in some districts the ingenious device of taxing the children in attendance, ostensibly to pay for their "schooling," but really to raise a fund to supplement the \$20 for incidentals. I believe that, allowing the above exception, could this matter be strictly sifted, it would appear that, but for the small sum of \$1,000, the public schools of the county would have been virtually free. It will be seen that the entire moneys from from all sources for the working of the public school system in our county during the year now reported foot up \$81,886.41, against the sum of \$70,660.14 of the previous year—that is, although the item of tuition fees has gone down to a mere moiety, the actual school income has gone up very considerably.

The average number of months the schools have been kept open seems to be a very small fraction less than that in a previous report. This is explained by the fact, that two of the school houses were destroyed by fire, thus causing an unavoidable loss of time to ensue, and the necessary consumption of time by the building of new school houses. But I think this is more than offset by the fact that a large increase in the attendance of the children has been attained, and the number of children reported as not having attended any school has been considerably decreased, although quite a large increase is reported

of the child population.

Were it not that it would look like repeating the tabulations, we might go on specifying results. As the figures can speak for themselves, I think it better to meet the question which naturally arises: "What has led to such results!" The answer, without hesitation, is,

four classes of facts are concerned herein:

1. The popular opinion has in the space of three years been largely enlightened, and a corresponding expansion of view has set in as respects the necessities of education—all which I regard as a direct consequence, sooner or later sure, of a faithful administration of the present law.

2. School officers themselves are showing the effects of the last three years' working of the new *regime*. With the possibility in their hands of a greater efficiency than in the former times, they are more zealous.

Besides, as there is a personal accountability now, a correspondent

intelligence has become evolved.

3. The teachers are manifesting improvement, as respects actual knowledge, and, of course, in professional ability. The system of examination conscientiously conducted could hardly lead to any less result. In our county I believe a license means what is on its face. Of one hundred and thirty-eight certificates granted in two years, only five were of the first grade and ten of the second grade. The rest were all of the third grade, and thirty-eight candidates failed to get even that. It is not meant that all these were actually excluded from teaching. A discrimination was exercised, and an indulgence granted such as showed aptness for the work and a true heart set towards it. These were by special permit allowed to teach where evidence of satisfaction was given, and the assurance entertained, that they would by earnest study fit themselves for success at a future examination. A good number of these now own regular licenses, and are doing good work. Of course, under such tillage there must be mental growth. It will also be seen in the statistics that the average pay of teachers has increased.

4. The school houses are becoming more comfortable and attractive. The old buildings so shabby and comfortless are fast disappearing. In their places buildings of a modern type, and furnished accordingly, are going up. Seven new school houses have been erected during the past year. Of these, the one at Eatentown is an ornament to the place, an enterprise which owes much to the indomitable energy, good judgment, and excellent taste of the District Clerk, Mr. Lyttleton White. And there are nine more in prospect the coming year, the money for their erection having been voted. Of these, the one at Farmingdale is to cost \$5,000, and that at Red Bank

\$10,000.

The difficulty, I am sorry to say, of getting a two-thirds vote at a district meeting is still so great as to discourage many earnest and progressive men. In some cases of great importance I have advised the calling again of meetings which had failed to give the requisite vote, promising that I would attend and address the citizens. Although these instances have not been few, yet I am not a little glad at being able to say that in no one case has there been a failure to obtain the vote required by law. In several instances I have recommended what, for the sake of convenience, we call "the installment plan," meaning by that, when a sum of money shall be voted to build a school house, if the circumstances seem to desire it, that a vote shall be taken to extend its collection over a series of years, and then, by a proper vote, the trustees shall be authorized to borrow sufficient to carry the enterprise through.

The following are among the advantages supposed to be gained by such a course. By this method the district is more likely to get the sum really needed; for in this way it is usually as easy to get \$1,500

as it would be to get \$1,000, by immediate collection, and that too, when the former sum is really the *minimum* of the district's necessities. In this way, too, it is easier for the tax-payer. With some this is really a serious consideration; for we have in some places small farmers, with encumbered properties, with whom it is not an easy matter to make both ends meet. To these persons such an arrangement is a real necessity, and to those who are abler, although too often less willing, the measure commends itself, and lessens opposition. It should also be remembered that in some townships the taxes are still heavy to meet unexpired bonds issued during the late war. Another advantage to the above method, which I have strongly urged in villages, is, that it allows new comers to bear a part of the common burden.

I regard the above as a great advantage in many instances, and yet it infringes upon a weak spot in the present law. It necessitates the borrowing of money. But the borrower is under no other bonds than the common consideration of honor for the direct and proper use of the money, which may be a large amount, that has come into his hands. And further in the present usage of money loans, the fact cannot be disguised, that a heavy bonus enters into every such operation. Here again is room for temptation. Indeed, it must be confessed, that with the utter want of protection to the school officer, a good man acting however squarely, might be wrongly suspected. Nay, more, the case is before us, if appearance and belief may be trusted, of a pertinacious attempt by an irresponsible person to get himself made district clerk, in view of a contemplated loan.

As regards the election of district clerk, it seems to me from difficulties which I have been called to adjust, that to make that officer's election valid, it should be required that he have two votes other than his own; and that in default of this, the office should be

filled by appointment.

It gives me pleasure to state my grateful feelings to the district elerks, who have with a few exceptions punctually met their duties in the matter of their annual reports. But I am pained to state that such praise in an unequal degree, cannot be awarded the teachers. The delinquency of many of these has been to both Clerks and Superintendent, the cause of much difficulty in the getting up of their respective reports.

Owing to a serious accident received in connection with my work, and which a kind Providence saved from being fatal, an interruption for a time was given to my out-door labor. In consequence, as the figures show, my school visitation has fallen below that of the previous year. Still, I can affirm that in the aggregate of actual work done,

the present year is actually in excess of the past.

I have made some effort to get at the extent of an evil which, as it lies at the door of the parents, does not admit of an easy remedy. Allusion is here made to the practice of granting to children a written

request of the teacher to be allowed to go home at some specified hour —generally the middle of the afternoon session. I selected a large district for experiment. At my request these little missives were taken care of and submitted to my inspection. In them all we could not find over twenty that gave a valid reason for the request; and yet these notes amounted to over four hundred, in an aggregate enrollment of three hundred and sixty-two pupils. Suppose these requests all granted, what a huge wrong is inflicted! And suppose them not granted, what then? A torrent of complaint such as a teacher and trustee would likely be too feeble to withstand. Such an indiscriminate practice is fraught with distinctive evils, each of no ordinary character. It is a wrong done to the teacher, for how, in such a course of things, can he be held responsible for success? It is an irreparable evil to the pupil, for how can the child's work be done when the child's life is thus cut up and frittered away! And is it not a grievance upon the community and an especial injustice to the tax payer! The theory of benevolence is a sheer fiction here. It is purely and entirely a matter of business. If the tax payer must pay his part for the general education, the true theory of the case is that he is to receive his meed in the assured advance of the communal intelligence.

A consolidation of two districts has been happily accomplished, and a commodious edifice is near completion—from which measure I

anticipate greater efficiency than before.

In order to insure the results needed the people must devise liberal things, and we cannot conceal from ourselves the fact that the public instruction must be a matter of expense. Still, there is a growing conviction in our county that the best use is not always made of the so-called school moneys. It is beginning to be felt that in many places the allotment of these funds is neither equitable nor wise. Where the population is the thickest there the money will be absorbed, except a pittance for the thinly settled regions. Hence it is felt by many reflecting ones that the present district system is wrong. But where is the remedy? To me it seems to be only found in the so-called township system. Yet, perhaps from want of information—but from whatever cause it may be—I dare not say that our county is ready for this change which, to many of our best thinkers on education, seems so desirable.

With our schools almost free, with the neat school edifice rising in many places, with our teachers better equipped mentally, and better remunerated, with a larger and increasing attendance on the schools, this report is made by the Superintendent with gratefulness for what

he has seen and with bright hopes of what is yet to come.

## MORRIS COUNTY.

# R. H. DE HART, EX-SUPERINTENDENT.

In compliance with the thirty-fifth rule prescribed by the State Board of Education, I transmit my report for that portion of the school year, commencing September 1st, 1869, which has already

passed.

The winter has been spent in visiting schools, as reported from time to time in stated monthly reports. The exceedingly bad traveling has prevented my making the two full journeys of inspection up to date, three parts of townships still remaining, for which there remains ample time still within the year. The policy which I urged upon the different Boards of Trustees at an early period in my official term, of employing capable persons, having social or domestic ties in the neighborhood, as teachers in their schools, has in a great measure realized my expectations of it. The disastrous consequences of too frequent change of teachers have thus been greatly diminished; and, as a consequence, of a longer sojourn with the same pupils, the teacher has been necessitated to lead them through a wider range of study, and has thus been led to review or take up for the first time the more advanced studies with consequent improvement to himself. The advancement made in some two or three instances in this way, as brought out by the regular examination, has been a source of surprise and satisfaction to both myself and my Board of Examiners. This policy, in my opinion, cannot be too strongly urged upon trustees.

I have, through the kindness of Richard Speer, our County Clerk, received a statement of the names and addresses of the Town Collectors, and have written to ascertain the amount voted in each township for school purposes. Answers to my enquiries are already coming in, showing already in two townships an increased taxation. From four districts, also, I have received encouraging returns of tax imposed for building purposes, and notwithstanding some returns of not so pleasing a character, I have yet reason to hope that the present year will not fall behind any of its predecessors in anything that

goes to the bettering our common schools.

#### OCEAN COUNTY.

# W. F. Brown, Ex-Superintendent.

Your instructions requiring information in relation to certain points, are received (and also the blank requested, since), and as far as practicable with the data in my possession, they are herewith complied with.

You state "the report may set forth the present condition of educational matters in the county, the progress that has been made since last August, and the work you have done since the same date." Respecting the first suggestion, permit me to say, that it would require more time than can be allowed me at present, to enter into a complete statement; nor do I presume you would care to find room in your report for it. As to the second proposition, I may further say, that I have never given in detail, (nor even kept minutes) of the various many little things (so-called), necessary to be attended to; such as consultation and counsel, both at home and when out in the county with teachers, school officers, and others; holding interviews with opposing parties; appointment of trustees and district clerks; inquiries of teachers, and replies to the same; township board meetings, &c., &c. To give a detailed statement of these, and the numerous other little things, making, nevertheless, when added up quite a considerable amount of labor, has not been done, nor do we deem it necessary or called for, so that the work is performed. For instance, in August last, pursuant to notice duly given, every township in the county was visited for the purpose of meeting the township boards of trustees, one object being to secure uniformity in text books. In the discharge of these duties, through the sand and heat of August, we traveled by horse power about two hundred miles. much other work was not even referred to in my October report. All the work done since that date, will not therefore appear on paper. A brief statement, we presume is all that will be expected. good work begun, still continues, and it is to be hoped, will go on to perfection. In my annual report of October last, in connection with the improvements then completed or under way, it was stated that "probably before another school year closed, the best school building in the county will have been built at the county seat, Toms River."

We are informed, and it is with pleasure the fact is communicated, that the people of Toms River have resolved to build. This will

meet at least two demands, one as to the needed accommodations for the district, and the other in the beneficial influence exerted on districts in other parts of the county. The friends of public schools may well rejoice over this new and enterprising movement in the

cause of education.

The new school buildings at Cold Spring, in Dover and Whites districts, in Jackson, are both completed and occupied. These school houses and their furniture, are both creditable to the districts. The new school building at Whiting, is commodious, and no school room in the county is more advantageously seated. The people of District No. 8, (Greenville), Brick township, (also Howell), who lost their school house by fire, as reported a few months since, have resolved to rebuild, and ordered the district tax assessed accordingly. A dozen more such improvements as those above mentioned, will meet the requisite demand for new school houses.

With No. 8 rebuilt, we scarcely need any more new school buildings, to provide for present wants in Brick. Dover with a new building in No. 3, completed, ought to have five, viz: Nos. 4, 5, 6, 7, (Beach), and 10. Jackson needs at least two, Nos. 2 and 8; Staf-

ford one, No. 1; Union one, No 3.

It is not to be understood that these districts are destitute of any school building. Those they have, however, need re-modeling and repairs, or to be replaced by new and better school rooms. Several of them have these improvements in contemplation, and are taking the preliminary steps necessary to accomplish the object. We believe at no time have the people of Ocean county enjoyed better educational facilities, whether as regards text books, school room accommodations, or the qualifications of teachers. Generally speaking, both teachers and school are worthy of commendation. But few of the schools are kept in constant operation. These of course show the advantages gained over those only in session a term or two.

While many are entitled to honorable mention for the progress made, the schools at Bricksburg, Manchester and Barnegat are wor-

thy to receive the highest commendation.

These schools being constantly open, and in charge of thoroughly competent teachers, are making rapid progress. A praiseworthy evidence is found in the fact, that two of the pupils of Bricksburg school passed a good examination at a late meeting of the Board,

their papers averaging respectively  $84\frac{1}{3}$  and  $95\frac{1}{8}$ .

No doubt similar results might be readily reached at other schools. This is referred to only as an evidence of progress. We have forty-one whole districts and thirteen fractional parts, (or nine Union) districts in the county. Two, numbered among the whole districts, lie along the narrow beach next to the ocean for about twenty miles, embracing about twenty children. They very setdom have any school in operation there. The Superintendent has had interviews with parties from along the beach, and recommended them to establish a

school, but thus far we believe nothing has been done. Except these two, with three whole and nine Union districts (four of whose school houses are in Monmouth county), all the districts in the county have been visited in person since my annual report in October last.

At the time of visiting, for various reasons, several of the schools were not open, but we are gratified to know that almost everywhere

we find awakened interest and marked improvements manifest.

In the performance of these and other school duties, the Superintendent has made about fifty district and school visits, delivered over thirty public addresses to the schools and those present, and traveled about 600 miles.

The last two examinations were more numerously attended than any that preceded them, and were of more than usual interest. During the last two quarters twenty-three (23) certificates have been issued, fourteen (14) dated in November, all third grade; and nine (9) in February, four first and five third grade. In the third quarter, nine (9), and in the fourth quarter eight (8) failed to bring their papers up to the required standard to obtain a certificate, some for want of time and others for want of knowledge.

want of time and others for want of knowledge.

It has been deemed best not to hold private examinations. The constant changes going on in the county, would seem to render the "district boundary" question, as prescribed by instructions at the present time, impracticable. If re-districted and the required map made and forwarded to you as prescribed, it would probably hardly be one week before some change would be called for. Others may see it different, but at present it seems to me we are not ready for

the work.

We feel inclined to reiterate the sentiment so often expressed, that a more liberal policy ought to be adopted and pursued by the State in relation to public schools. The small pittance (not speaking depreciatingly) doled out to the children is not enough to do much toward benefiting them. The amount ordinarily appropriated is, we believe, about forty-one (41) cents per child. A district of one hundred children, would, therefore, receive forty-one dollars. would not be sufficient to pay a properly qualified teacher his salary for one month, and yet the district is required to "keep school open" five months in the year to entitle them to this amount. The friends of public schools must see that this state of things cannot continue long. There must be a forward step taken, an advanced position gained, or the result may be a retrograde movement by a change from the present system to the field of experiment again. is too much uncertainty often connected with the action of a town meeting, to leave this important question for the decision of such an uncertain tribunal; beside, the better course is to have the State make the necessary appropriation, and the people will acquiesce in the needful taxation. The Superintendent has not re-apportioned the appropriation withheld from Stafford township, in the hope that some amicable and satisfactory arrangement might yet be adopted by

which the matter might be justly and equitably adjusted.

It is claimed that the action of the town meeting, in not voting to raise two dollars per child, was not a voluntary act, or neglect, on the part of a majority of the people, and under the circumstances, it seems to us hard, that a township as much in need of school money as any township in the county, should be deprived of the amount because of an unintentional mistake. Even allowing the worst supposable feature existed, namely, that the parsimoniousness of the people influenced them in the said action; ought orphan children, or any other children to be responsible for and bear the sad consequences of such an act? Ought not the State, or some other parties render other children to be responsible for and bear the said consequences of such an act? Ought not the State, or some other parties render the necessary relief to such children? But such was not the case with a majority of the people of the township. Could the vote have been taken one day, or perhaps one hour after the time had elapsed. it is believed the law would have been complied with. If we have erred, it must be attributed to a knowledge of the wants of the people; a just sympathy with them; and a conviction that some method ought to be adopted, by which this small amount might go into their hands for the benefit of the children.

The package of "forms" reported as forwarded to me has not been received, and consequently the districts are not generally supplied. The few received from you when at Trenton, have been dis-

tributed.

Without form or precedent to govern, especially through the early part of the work, it is unnecessary for me to say to you that the work has been sometimes difficult and unpleasant. If any order has been produced out of the frequently existing chaos, it is a source of pleasure to be recognized as an humble agent, in the good work. errors or omissions exist, we shall be obliged to bear the responsibility, eraving the elemency and sympathy of all concerned; and if any substantial good has been accomplished, we would most cheerfully acknowledge that the credit ought to be ascribed to that superintending and divine goodness, that gives success to humble effort.

In retiring from the field, the outgoing Superintendent claims, without fear of contradiction, that, whether in the appointment of trustees or district clerks; the examination and license of teachers; or the performance of any other duty, he has tried to do right; and he is persuaded that all concerned will bear testimony, to the fact, that in the most strictly impartial manner himself and the associate examiners, have thus endeavored to discharge their respective duties.

The old and well tried examiners, William B. Hill, Esq., of Brick, and E. A. Hyde, Esq., of Union, appointed under the old system by yourself, and retained under the new with your knowledge, and because no better selections could be made, cannot in justice to them and to myself, be passed by in silence in this my last official communication to you. These gentlemen are old residents, and well acquainted with the wants of the county, of liberal education, large experience, sound judgment; with no disposition to favoritism in their decisions; old and qualified teachers, and the constant and unwavering friends of education. Such men taken from us leave a vacuum in the common cause, not likely to be filled up. Whatever may become of the writer, these friends of the cause, cannot well be spared from the field. If in place I would be glad to express my unfeigned thanks to these gentlemen, to the trustees, clerks, and all the teachers of the county, for their aid, and to the people generally among whom the Superintendent has traveled, for that hospitality and kindness that has generally characterized them. If my worthy successor receives similar co-operation, which it is hoped he may, he will certainly have no reason to complain of any.

In conclusion I may be allowed to say, that, for the responsible position of County Superintendent, no man was ever requested to sign a paper, nor was any County Freeholders' vote sought by myself. The State board with yourself will accept my thanks, for the confidence reposed in, and sympathy evinced towards me, and in retiring from the field, you, and the Board of County Freeholders, will be assured that, in relieving the present incumbent from the arduous, responsible and (in this county) unremunerative duties, they have con-

ferred a duly appreciated favor.

### OCEAN COUNTY.

# E. M. LONAN, SUPERINTENDENT.

In conformity to the law, I have the honor to present the following

report:

As my appointment was confirmed only in May last, and as we have just passed through the summer vacation, my visits to the schools have been few.

I am happy to say that the people of our county are waking up to the cause of education, and have come to the sensible conclusion that it takes less to keep up schools than state prisons and poor houses. I hope the day is not far distant when our schools will be entirely free. I was agreeably surprised a few days since on visiting a school house at Cold Spring, Dover township, although an isolated place, five miles from Toms River, I found a new, neat, and substantial school house, with patent desks, &c., and well fitted with blackboards. It is an

honor to the place, and goes to show that the cause of education is onward.

Although we have less children in the county than last year, the attendance at school shows considerable increase over that of last year—evidence of the increasing interest felt in the cause of public education.

The schools have been kept open very nearly the same as last year.

The value of the school property of the county shows a slight advancement from last year's figures, but the fact of a suitable house in one township of twelve districts (Brick) exceeding in value the whole school property of the other eleven, gives some idea of the general condition of the others.

Toms River is enlarging and repairing her house, and in a few weeks at most she may boast of a school house equal, if not superior to any

in the county.

Several districts up to this time have forwarded no reports. Of the number that were forwarded, several were received late, giving no opportunity of returning them with instructions when they were wrong. We have been obliged to alter several, leaving the main facts as nearly as possible as they were reported, but the minor details of some of them it was positively necessary to change. By so changing, we have succeeded in making the report consistent and a great deal more accurate and more reliable than a copy of the reports received would have been. In several instances the average attendance was not reported. Although a good many reports were wrong, some of them were gotten up with a great deal of accuracy and care. One gotten up by Mr. A. C. B. Havens, of Brick, was a splendid specimen of chirography. If district clerks could get them so accurate, it would save a great deal of trouble to the Superintendent.

I have held two examinations at Toms River, our country seat. Everything passed off smoothly. I was fortunate in securing as examiners Mr. W. H. Moon and Mr. P. S. Smith, two very efficient teachers, and they have rendered me valuable aid. I have endeavored to impress on the teachers that our examinations are not an inquisition.

In all cases I have declined to give private examinations to any one, and have fixed on Toms River as the proper place to hold them. It is the most available place in our county, and nearly in the centre.

In conclusion, I would render my sincere thanks to the friends of education for the assistance they have extended to me; and last, although not least, to the State Superintendent, for his valuable advice on many occasions.

#### PASSAIC COUNTY.

# J. C. CRUIKSHANK, SUPERINTENDENT.

It is gratifying to report under the new order an increase of means to the cause of education. The sums appropriated by the townships and reported officially for educational purposes, in 1867, were \$11,632.13; in 1868, \$14,073.37; in 1869, \$15,915.68; in 1870, \$27,374.93. Here are my official published statements for the use of collectors, township committees, district clerks, and others interested in paying out and receiving the moneys in the county. But the official reports of the district clerks and the Superintendent of the City of Paterson for the year 1870, give one hundred and sixty-five thousand seventyfour dollars and forty-one cents (\$165,074.41). Now, if I add to this the expenditures of the private schools and of individuals in the county and city, the amount will attain to the sum of two hundred The school property in the county, reported by thousand dollars. the different country and city Boards, is estimated at two hundred and twenty-six thousand six hundred dollars. Certainly, the townships have evinced a willingness to avail themselves of the provisions of the school law, to maintain and perpetuate their advantages, to give intellectual character to their children, to prepare them for the activities of business, and render them independent therein.

The sun of hope has burst through the clouds of prejudice and penury in golden splendor, to brighten life in the present, and to gild the hour of the future. Notwithstanding these enlarged provisions, some school district limited in their resources, are struggling under embarrassments, in a state of insolvency. They have not been favored with a rich soil, nor have they an inviting location, but are found on the mountain tops, by the ore bed pits, or in secluded glens—and are obliged to engage teachers of a superficial character, or consent to have the rustic school house closed. Would not the substitution of the township system infuse new vigor; give greater interest, awaken emotions of equality, and tend to bring into the centre of the hamlet; to the door of the miners cottage, the fact? Townsmen are desiring and devising enlarged "ways and means," to secure teachers efficient and active, not only for the village school, but for the most

secluded also.

These school districts in "out of the way places," have been from circumstances, not from intention, discouraged; but by this system, the moral delinquency of parents, guardians and teachers will be remedied, boundary quibbling avoided, and the contentions of trus-

tees and individuals ended. Let the townships give to every child that attention and education that will fit it for the practical duties of life; equality, self-independence and contentment will be the benign fruits. Teachers will be better remunerated—their standard qualifications, desirable and necessary, raised. The interest of all locations will harmonize to a cordial and effective co-operation, to the enforcement of wise and judicious measures. I hope to see the

change.

The schools have been with two exceptions, open during the year, more or less time. The exceptions were extreme cases. The most of them closed in advance of the usual time through the intensity of the heat. The county is favored with teachers of experience, earnest, faithful and active in the school-room and out of it, who make teaching their profession. And then, there are transient wanderers, who stray along and stray away, ready to engage in something else any moment, if they are better paid. I note the majority of our teachers are young, were born and educated in the county, have a home pleasure and interest to make their school-rooms attractive and their persons influential, and it is here such secure the cooperation of parents and pupils. Twenty-four of the thirty-six have made their annual reports. The teacher is wise and valuable to the community who has a just "apppreciation of life's great end," who, by precept and example, leads his pupils to love, to regard truth, and honesty, to cherish and cultivate kind feelings of the heart, to exhibit a courteous deportment, and a choice selection of words in their intercourse with each other. He is the successful teacher who shows himself possessed of tender, manly feelings, influenced by manly motives, with a heart alive to the interests and wants of the children placed under his care.

The new building at Passaic, in the township of Aquackanonk, is a fine structure, built at the expense of thirty-five thousand dollars. Mr. S. W. Rice, formerly Principal of the schools in the city of Paterson, is in charge, with three assistants. By the census reports there are six hundred and eighty-two children in the district. The buildings will seat three hundred and fifty. To afford the necessary school accommodations, there should be another structure. There are, however, private schools in the place worthy of patronage, and have been very beneficial and successful. In the Little Fall school district No. 1, a new structure is under contract, which, when completed, will be an adornment. The most of the school buildings in the county are substantial, but the internal accommodations of some

are of ancient form.

District school boundaries engaged my attention, and of all duties I dread them. It is a trying position to have two, three or four boards of trustees besetting you at once, all wanting to be heard, to keep what territory they have, to secure more if they can, to decide on the questions discussed justly, without seeing in person the ground

in dispute. The true reason for boundary changes may often be traced to an altereation between the children—to a prejudice without cause against the teacher—to the extra expense of a district tax on

property holders.

It is utterly impossible for the County Superintendent to give a full detail of his work. He is called upon to consult, advise and assist in various ways and places, at his home, on the streets, on the road, in season and out of season, just as necessities may require. And after he has gone over his regular visits and made the circle of the county, he may be called in a special case to its extreme end. But let him go cheerfully. He does not work upon marble, nor brass, nor iron, but upon "men's immortal minds." In the discharge of my duties, trustees, schools, and persons of standing have endeavored to make my labor pleasant, and have treated my person with the utmost respect, and I have gone through my work having the assurance of their support and approval. Success has crowned our efforts.

I regret the reports of the district clerks have not accounted for the "whereabouts" of all the children in their districts. They have stated their numbers, and the names of those on the school register, but have not accounted for those who attend private schools, or no school in many cases. Thus, a district clerk reports 682 children—185 names on the school register; 187 attending private schools: 216 as attending no school, inviting the question, where are the 94? This is a matter to engage my attention to correct.

I had no applicant for the "Agricultural College."

#### SALEM COUNTY.

# WILLIAM H. REED, SUPERINTENDENT.

Transmitted herewith is the statistical report for the school year

ending August 31, 1870.

This report, so far as relates to school finances, is reliable; the part showing the attendance of pupils is not wholly consistent. District clerks, in two or three instances, assert that they find conditions existing in the attendance of children upon schools, that make it impossible to produce the correspondence in numbers expected in their reports, and ask allowance on that account.

It is true, however, that accuracy in keeping registers, from the marking of half-days, to the filling up of the final report, at the close of the year, is not universally practised by teachers; and, further,

that district clerks do not, in all cases, show a clear understanding of

what they are expected to report.

Considering the circumstances attendant upon making out the reports this year, the shortness of time and the unsettled condition of school affairs in the county for some time previous, the returns are, certainly, commendable.

It is stated, with a view to improvement, that the district clerks are not observant of the requirements of the law, in making financial reports on or before the first of April of each year. A slight improvement could be made in the performance of duty, under the school law, by some township collectors in the time and completeness of their reports. Some township committees are to be commended for their care in forwarding copies of collectors' reports to them.

The system devised by the Board of Education, under the New Jersey School Law, relating to reports, clearly looks to the proper management of public school affairs; and a compliance with the regulations will tend to secure this, while the opposite course will lead

to the contrary.

Improvements in school buildings have been going on to some extent. A school building in Lower Alloways Creek township has been completely remodeled and newly furnished. It combines comfort and utility in its arrangements, and is an ornament to the neighborhood. A district in Upper Penns Neck township has been increasing its school conveniences, by repairing and refurnishing. In two other townships considerable district tax will be raised this year; in one, to complete the payment for a building already erected; in the other, to make up a sum requisite to erect a large and commodious building the coming year.

A continuous effort is being made to have good schools. The necessity of having convenient school buildings is realized to a great extent, as shown by what has been done within the past three years in the way of building and repairing, and what the friends of improvement are attempting to do in districts where more suitable school

buildings are needed.

The want of funds of a public character, for the support of schools, is a cause of difficulty in securing the continued service of good teachers. The public fund exhausted, it is a troublesome task to collect in tuition fees, or contributions, the sum required to make up the salary of the teacher. There is a more decided opinion in favor of raising a sufficient sum by taxation to make the schools free. It is thought unwise to wait for a next to unanimous consent for this—that, if a majority favor raising increased means to secure good teachers and to keep the school open the desired length of time, it should be done, and that the public good would be promoted thereby.

In reference to teachers, faithful and consciencious ones are employed. The district that obtains such a teacher, and by due sym-

pathy and reasonable reward secures the services of such, is, to say the least, doing for itself a good that will far overbalance all cost.

Within the year past Mr. E. R. Bullock, of Woodstown, has been appointed an assistant examiner—he assisted at the May and August examinations. Mr. J. K. Linderback aided at the February examination. Mr. Joseph A. Miller, who has assisted from the first under the new law, has been prevented, by ill health, from taking part for the last three examination periods.

Visiting township board meetings was not permitted the latter part of the year. It will be resumed as soon as possible. No opportunity has presented to obtain a discussion of the merits of the "Township School System." The first opportunity will be used for that purpose, which, in the natural course of things, will occur during the fall and

early winter.

In regard to labor performed, previous to any legal impediment occurring, business was proceeding as ordinarily, with the usual variety of visitations and office business; consultations with trustees and teachers; ascertaining district bounds, and in some cases endeavoring to settle the bounds of districts in such a way that the township tax might be as equitably distributed as possible. Since the action of the Board of Freeholders in August last, the labor has been continuous. Work had accumulated, by previous non-performance, and extra efforts had been made to do it. Much has been done and much remains to be done.

In conclusion, it is hoped that all who have duties to perform under the New Jersey School law, will act with the direct object of securing the establishment of an efficient public school system, and that by the united efforts and wisdom of the friends of popular education that may ere long be realized.

## SOMERSET COUNTY.

# F. J. Frelinghuysen, Superintendent.

The report I have heretofore sent you of the appropriations made by the respective townships of our county, in behalf of the public schools, is a better criterion by which to determine the sentiments of our people in the cause of education, than any thing I might write, however voluminous, in the detail of other facts bearing upon the question.

By referring to the report, we find four townships have increased

their appropriations to \$4.00 per scholar, being the maximum amount required by law, to be raised by any township. One township has voted \$3.00, and three townships have voted, as yet, only \$2.00 per scholar. I am glad, however, to report that a more liberal popular feeling is likely to prevail, and will remove the restrictions now preventing our schools from being free.

Two new school buildings have been in the course of erection, and will be completed before the present year ends; one at Six Mile Run on the line between Somerset and Middlesex, and another at Raritan. Both buildings are well adapted to the uses for which they were designed, and speak well of the good taste and liberality of the districts

I have named.

The building at Raritan with the lots and furniture of school room, will cost about \$9,000. And the authority given to the trustees to purchase the lots and build the building at the above cost, was by the unanimous vote of a large district meeting, called for the purpose.

In several school districts, repairs and improvements, have been made since my last report, and in districts where new buildings should be erected, the people are agitating the question, and will soon fall

in line with the friends of public improvement elsewhere.

We have about eighty-six teachers engaged in our schools; twenty-five are graduates from the Normal Schools; twenty of the last named are from our own state institution. While it would not become me to institute a comparison between the teachers educated in our county and the Normal graduates, yet it is due to our State Normal School and the eminent men who are so faithfully administering its affairs, that I should say the Normal graduates now teaching in our county are giving general satisfaction, and are awakening a greater interest in our State Institution, and a more frequent desire is expressed to select teachers from those who have been especially educated and trained for the work.

The Agricultural Society of our county at its annual exhibition, recognizing it to be proper to encourage our public schools in some of the branches of knowledge taught to the scholars, offered a premium to the school that would offer the best exhibition of map drawing. The competition was not as general as we could wish, (owing to the short notice); yet the specimens shown were creditable alike to the scholars, and their faithful instructors. We hope next year will be more fruitful in the display of the talent of our schools in this very instructive method of studying Geography.

The premium offered was awarded to the Raritan Public School, J. S. Haines, Principal, assisted by Miss M. Brokaw, the latter hav-

ing the special oversight of the map drawing department.

The premium although so justly awarded would not have been so easily won, if some of our schools in which map drawing is very successfully taught had entered among the list of competitors. We

hope the Society will excite a competition for excellence in other subjects being taught in our schools, by premiums appropriately offered to this end.

We have held our quarterly examinations at the time required by law. The same Board of Examiners I first selected, (viz: J. S. Haines and E. W. Rarick), still continue to discharge the duties assigned them, and I might add with such signal ability and fairness as to merit, and receive the esteem and approval of all the teachers.

I have devoted more time this past year to school visitation than in any former year. I have been kindly welcomed by the teachers and trustees, and I hope as a result we have all been profited by our interview, and feel with more power than before the responsibilities devolving upon us in our respective spheres of duty.

#### SUSSEX COUNTY.

## E. A. Stiles, Superintendent.

I have availed myself of all the means at my command to impress upon the various district clerks the necessity of accuracy and completeness in filling out their statistical returns, and the advantages of promptness in forwarding them to me. I have called the attention of school officers to these matters by appeals published in all the county papers, by letters to every district, and by personal applica-tion whenever I was able, and yet, I regret to say, that in some instances the clerks have been tardy; in many instances the reports have been in a degree incomplete and faulty, and from three districts I have received no report whatever. I have discovered that in many cases, where the clerks seem disposed to do their duty promptly and thoroughly, they are, nevertheless, so unaccustomed to follow printed directions, that the plain rules accompanying each schedule are beyond their comprehension, and they can only gaze at the blank columns in hopeless and helpless bewilderment, until they receive personal oral instruction. In some reports, where the errors were glaring and the corrections obvious, I have felt at liberty to make alterations, but generally at expense of much time and labor. I have returned them for revision, indicating at length where and how the changes should be made. By these means I think I have at last secured in my statistical report as near an approach to accuracy in its various details as is possible with the existing machinery.

It would be a useless outlay of time and space to enumerate and enlarge upon the discouragements which invariably face one who takes an active interest in popular education. Unsuitable buildings, inadequate furniture, scarcity and variety of text books, inefficient teachers, and irregular attendance are evils common, in a greater or less degree, to all sections of the State and of the country. In a county like this, however, where the schools are not free, and where a large fraction of the territory is mountainous and sparsely populated, many of these evils must necessarily exist in an aggravated form. Many of the poorer districts, if left to their own resources mainly, cannot afford to employ such teachers, or to furnish such buildings, books and apparatus as are essential in order to secure the best results.

The one great evil, however, which I constantly deplore, the evil which makes all minor ones possible, is the almost universal apathy in regard to educational interests. This discouraging fact obtrudes itself upon me so constantly, and tends in so many ways to neutralize the honest efforts of the few who thoroughly sympathize with the great cause to which we ought to devote ourselves, that I am led to believe that whatever of failure may attend our educational legislation, is owing in a great measure to the neglect of adequately reorganizing it and taking it into account as an element of disturbance and resistance.

In a community that is watchfully and intelligently alive to its educational interests, the present school law will leave little to be desired. But when school officers who are not paid for their services nor punished for their delinquencies, are palsied by personal apathy in regard to the interests of which they have charge, and where the constituency who have delegated to them the charge of these interests are sunk in a similar lethargy, it is hardly to be supposed that the provisions of the law will be enciently complied with. Thus it happens that trustees keep no accounts, do not attend meetings of the township board, neglect to provide books for indigent children, ignore the approved series of text books and allow scholars to use whatever they may choose to procure, and fail to enforce upon teachers the duty of keeping a register. Teachers themselves neglect to present their reports, and in some cases men who hold no certificates have been suffered to teach, and have been paid by the collector for their illegal services.

But although the letter and spirit of the present law have in so many particulars been defied or evaded, I am far from pronouncing it a failure. Results have by it been accomplished which are not only valuable in themselves considered, but which are plainly prophetic of future advancement. The old routine has been broken up, and the change has, in many cases, set men to thinking. This is a service of inestimable importance, for every man who is aroused to reflection and stimulated into intelligent activity is the centre of an ever widen-

ing influence, and it is upon this personal effort that we are to rely for the ultimate removal of that underlying and all embracing cause of inefficient public schools to which I have before alluded. Besides this, the law has a tendency to lead to the selection of more efficient trustees, and by more accurately defining their various duties gives the ability to hold them to a more rigid accountability for the discharge of their trust. Statistics have also been furnished which are sufficiently accurate for the basis of any future legislative reformation. Better teachers, too, have been secured, though in this regard, as in the other points which I have mentioned, the progress is far less than we could have desired. Beyond all this the application of the law clearly demonstrates the weak points of our system, and gives the people an opportunity to use it as a stepping-stone to something better; and I cannot but cherish a lively hope that we can use its machinery in the transition to a system in which the State will rise to a full appreciation of its responsibility to furnish educational advantages to all; in which schools will be absolutely free; in which attendance will be, under certain restrictions, compulsory; in which district boundaries will be erased; and in which competent officers will be properly paid for their services and held to a strict accounta-

If I am correct in assuming that the excellence of the public schools in any community depends directly on the intelligent interest which that community manifests on educational subjects, it is obvious that apart from the mere routine functions of my position, I can best serve the cause of popular instruction by endeavors to excite men and women to individual effort, by arousing them to a sense of their personal re-

sponsibility.

I have kept this object constantly before me while traversing the county to visit schools, to meet the township boards, or to settle disputed district boundaries. I have been able to secure some subscribers to various educational periodicals. I have advertised the time of my intended visits to various schools, and invited officers and patrons to be present; and should I be permitted to assume the responsibilities of my position for another year, it is my purpose to organize a series of popular meetings in various parts of the county, for the purpose of correcting errors, dispelling predjudices and disseminating rational views on educational questions.

I petitioned the board of freeholders for a small appropriation to be used in the purchase of a few educational works for each district, mostly for the benefit of teachers. I failed to secure it, but at the meeting of the township boards I obtained an expression of opinion on the subject, and in every instance the sentiment was unanimously in favor to my project. I again applied to the freeholders, but without success. I am quite confidant, however, that during the coming year each district in the county will possess a small library of the best educational books, and although I am well aware that such

agencies rarely achieve such grand results as we anticipate, still, there can, I think, be no question that their influence will be in a degree

wholesome and stimulating.

At times I have been oppressed with a painful and disheartening realization of the almost insurmountable nature of the obstacles in the path of progress. Many times I have visited schools which not one parent or guardian, not one school officer, not one Minister of the Gospel has entered during the year. I find very few teachers who have an adequate knowledge of the recent progress in methods of instruction; and in districts which have efficient and even enthusiastic teachers, there is rarely that sympathetic co-operation extended to them by the school officers and patrons which is so essential to the highest success.

A calm survey of the entire field, however, affords cheering signs of progress. After a heated discussion in my own township and one adjoining, the full amount of four dollars to the scholar was voted. In the district of Newton (the largest in the county, embracing the entire township), the school is free. In most of the other townships the appropriations have been increased, showing that public sentiment is setting strongly in favor of free education. A smaller fraction of the applicants for certificates has been rejected this year than was the case last year. The new teachers are more thoroughly fitted for their work. The average salaries of male teachers, though still inadequate, has been increased nearly thirty per cent.; the increase in the salary of female teachers, though not so great, is also considerable. The average attendance has been much greater. The various districts have been more fully represented by trustees at meetings of Township Boards; nor am I left without encouragement to believe that my own endeavors to forward the growth of a healthy public sentiment have been attended with some success.

I cannot close without a grateful acknowledgment of my indebtedness to very many friends throughout the county for their sympathy, encouragement, assistance, and especially for their hospitality; to the editors of the various county papers for many favors received; to Mr. Lawrence, of the State Board of Education, for much valuable counsel and co-operation, and especially to the State Superintendent for that unvarying courtesy which has made our official rela-

tions so agreeable.

#### UNION COUNTY.

#### N. W. Pease, Superintendent.

In compliance with the provisions of the school law, I have the honor to submit the following, with my second statistical report rela-

tive to the schools of Union county:

Some progress has been made during the year. To say that is entirely satisfactory would be affirming too much. There are felt wants yet existing. Parsimony or apathy still holds sway in some portions of the county. In others, faultless liberality and energy have supplanted them. Generally, however, more funds are needed for building, repairs and incidental expenses. Teachers' salaries, also, are insufficient in many cases to secure good instructors. This is a stubborn fact, and is the main reason why the public schools are not held in higher repute. The appropriations for this purpose should be doubled. Liberality here is demanded.

There has been a decided improvement in school buildings and accommodations. Five new school houses have been erected, costing nearly \$50,000; four others are in process of erection. Worthless buildings on bleak and fenceless corners are disappearing, though a few remain, as relics of past ages, to pain the eyes and chill the hearts and bodies of luckless pupils. The total value of school preperty in 1869, was \$124,750. This year's report exhibits the sum of \$180,550, an increase of \$55,800, or a gain of 44 per cent. The amount raised by special tax last year for building purposes, was \$18,012.18. This year the report shows the amount thus raised to be \$21,998.59, a gain of twenty-two per cent.

Including cities, there are eighty-one teachers employed in the county. In 1869 the sum expended for teacher's salaries, was \$27,-899.40; in 1870 the amount used for that purpose is \$32,330, a gain of sixteen per cent. The reported average salary per teacher last year was \$46.22. This year it is \$48.23; average gain per cent, four. On total moneys raised for all school purposes, there has been

a gain of eighteen per cent.

Generally there is an increased interest among teachers. Many are striving to honor the positions they hold, and gain advanced ground in the profession. They are really endeavoring to teach. Improved order, discipline, and methods of instruction are manifest. The how to teach, to render knowledge available and lead the pupil to grasp it, seems to be sought. Such teachers are always successful. Previous training and preparation for the profession are, how-

ever, greatly needed. Too many are content to go through a dull routine in the school-room, without enquiring for anything better. Amazement succeeds the advent of a new idea. The law relative to teacher's reports is seldom fully obeyed by this class. Indeed some have not yet rendered a reliable annual report; others, teaching a portion of the year, have not reported at all.

Trustees have generally performed their duties with increased fidelity. In every district a part of the board, and in some the entire board is zealous and constant in promoting the interests of the

schools. Still there is a lack of uniform interest.

The few visits made upon the schools by the trustees and the character of text books used prove this. In some schools about as many different authors in the various branches are represented as there are different pupils in attendance. Some of those books are apparently being used by a second generation. Under such difficulties the labors of teachers are largely increased and the progress of pupils proportionately retarded. The importance of entire uniformity has been pressed upon the attention of both teachers and trustees. Still the work advances slowly. Perhaps were one paid trustee employed in lieu of three unpaid these and other hindrances would be sooner overcome. Another remedy would certainly succeed. Could the districts be enlarged and the number reduced by consolidation, local prejudices and interests so inimical to the general good would be supplanted by more liberal views, aims and efforts. Under the present district system it is well nigh impossible to establish good graded schools where they are needed. The "township school system," however, presented in the supplement to the report of the State Superintendent, recently issued, prescribes a remedy for every difficulty in the way of universal education. The making of each township a unit, both in school control and taxation, would at once secure to all the people the same advantages now possessed by those residing in cities where graded schools are established. That such a system is pre-eminently desirable is proven by the results reached in those States where it has been tried. District lines being abolished, petty local boards being no longer needed, and the entire school management being entrusted to the most capable men in each township, elected in the same manner as all other town officers, every influence and interest promotive of education would be united for the common weal. The present school law has accomplished much and promises more. But were the township system put in operation that would be attained in a single year which could not be reached in three years under the present system. Thus it appears that the interests of education imperatively demand that this advance should be made at

The census of the children taken in some sections can hardly be called reliable. The city of Elizabeth, for instance, reports only 4197 children between five and eighteen years of age. A correct census it

is believed would show nearly 7000. The city of Rahway also reports but few more than Plainfield, and at least three of the rural districts report less than they ought. The cause of these inaccuracies are two-fold: haste, indifference and carelessness of those entrusted with the enumeration, and delay in taking it at the proper time.

The city schools are mainly in a prosperous condition. Plainfield has an excellent school system and model schools. Those of Rahway are now in a better condition than for two or three years past. Those of Elizabeth are doing as well as circumstances will permit. The appropriations granted by the city conneil are entirely too meagre, while the school buildings and accommodations are not half sufficient for the number of pupils in attendance. At present buildings not designed to accommodate more than 675 pupils have an actual attendance of nearly 1,000. The well-known enterprise, intelligence and liberality of this city will, it is expected, speedily devise the means and provide the remedy for these obstacles to the prosperity of our schools.

There are in this county twenty-seven rural districts, twenty-two entire and five fractional, in which are twenty-five school houses. Two in fractional districts stand in an adjoining county. year two districts have been abolished by consolidation. most part, the schools have made commendable progress. The attendance, however, is much less than it should be. The total average attendance for 1869 was 2,929. For 1870, it is 2,978. Increased average, forty-nine. Only about fifty-six per cent. of the entire enumeration is in attendance at all, while the entire average per cent. is less than thirty-one. Efforts are being made to arouse teachers, parents and children to the importance of a more uniform and regular attendance upon the public schools. Five schools formerly supported in part by tuition fees have been made free. graded schools have been organized and are prospering; especially is this the case with that in District No. 10, Westfield. The new school house there was built amid virulent opposition and stormy scenes. The untiring zeal, energy and ability of Mr. S. S. Mapes, the present district clerk, and his associates, however, triumphed, and one of the best schools in the county is the result. All honor. to them. Hundreds of grateful pupils, at least, hold them in high These remarks apply with equal force to District No. 18, and the elerk, Mr J. W. Clark.

School visitations in most cases, have been regularly made, though attempts to visit some schools have failed because they were not in session. Others have been visited three or four times. It has been the aim to visit often where the teachers have been frequently changed, or where the pupils have been poorly instructed. The whole number of visits made during the year is fifty-nine. The number required by law is fifty-four. The distance traveled in the dis-

charge of the official duties of County Superintendent is 646 miles. This has involved a necessary expense equal in amount to more than one-third of the entire salary allowed. The aim has been to ensure progress in every department of the work. Neither effort nor expense has been regarded in the endeavor to secure it. Especially have teachers been often admonished to teach the common branches thoroughly, because, unless first principles are perfectly understood and applied, pupils are not prepared to reach higher. Indeed, without careful training here, there can be no reliable foundation for intelligent advancement. As well might we expect a person to succeed in manual labor upon crutches, as for a pupil to succeed in life unless thoroughly taught.

It is hoped that teachers feel their responsibility, and will act up to the full measure of it. In the examination of classes it has been the endeavor to test their proficiency in rudimentary principles and exercises, reading, spelling, writing, arithmetic and grammar. In

many instances much gratification has been felt.

Four regular examinations for candidates for teachers' certificates have been held, as the law directs. Twenty-four candidates have been examined, four first grade: three, second grade, and seventeen third grade. Three candidates were found to be disqualified for even the lowest grade. Mainly, these examinations show improvement. The average standing, is higher. Still, some manifest little desire to advance. They complain of the examinations, seek to evade them, absent themselves from the regular meetings of the Board, and solicit private examinations or ask for renewals of old certificates. Such a course detracts from the standing of teachers however capable they may be. On the other hand there are several teachers who attend the regular examinations, from choice, when not necessary, and allege as a reason, that they derive great benefit from the exercise and effort required. Improvement is their motto. One teacher holds three certificates in full force. Comment is unnecessary.

The Boards of Trustees in every township, save one, have been met once during the year, some more. One board has been called together four times. A very gratifying interest has been evinced in every township save that of Union, where the amount raised is only \$2.00 per child, and where the fund for the support of schools is generally inadequate. One district, however, in that township, No. 29, is taking advanced ground, and supports a good school, which is

mainly due to the efforts of the clerk, Mr. D. J. Meeker.

Two candidates, Messrs. C. F. Stillman, and Thomas B. Stillman, sons of Dr. C. H. Stillman, Superintendent of schools, City of Plainfield, were examined and admitted to the class in the Agricultural College this year. Both are excellent students and promising young men

In conclusion it is only necessary to add that it has been the endeavor to state facts, simply and plainly in the present report, and

that the comparison of it with that of last year, affords encouraging evidence of progress, and leads us to expect yet better results during the year to come.

#### WARREN COUNTY.

Joseph S. Smith, Superintendent.

In presenting this, my third annual report, it affords me great pleasure to say that there are unmistakable signs of educational progress in Warren county. Unlike some other counties of the State, situated, as it is, at some distance away from the large cities, where liberal ideas prevail and extend their influence to the surrounding country, yet even here an educational sentiment is developing which promises the best results before long. The growth of the sentiment is slow and gradual, it must be admitted, but it is nevertheless certain and plainly discernible. The public man who would openly, or otherwise, oppose the raising of money for school purposes might as well write "Ichabod" over his political prospects. The day has passed by when men can thus strike a blow at public education, and yet be the recipients of popular favor and esteem.

Reports.—I deem it proper to say in this connection that the reports of the district clerks were more promptly rendered than last year or the year preceding. But two failed to report entirely, while but five others failed to report the attendance of the scholars, although reporting the other statistics required. Annual reports have been received from nearly all the teachers of the county, and from these I have derived much and valuable assistance. It is to be regretted that just about the time that district clerks become capable of making complete reports, they should go out of office, as is generally the case, and leave this work to be performed by their inexperienced successors. As a teacher should be a fixture in the community, as the lawyer or the doctor, so the district clerk, when the right man is found, should be permanently retained. There are men who have served in this capacity from the beginning of the present school law, and who take a peculiar pride in performing the duties of the office in the most complete and satisfactory manner. I would that there were more such. Rotation in office, however, is the inexorable law of American politics, and not even the humble position of district clerk is always exempt from its operations.

A Glance at Statistics.—All the townships in the county have raised the amount of school money required by law; Blairstown and Hardwick, which last year failed to do so, among the rest. Seven voted four dollars, five three dollars and less than four dollars, and five two dollars. The amount of township school tax is \$28,470.24, as compared with \$24,316.25 last year, being an increase of \$4,153.99. The total amount for school purposes is \$72,282.59, as compared with \$71,478.91 last year.

The schools have been kept open eight and one-sixth months, as compared with eight and one half months last year. The number of children of school age reported is 10,368, being an increase of 237 only. In the townships of Blairstown, Frelinghuysen, Hardwick, Harmony, Hope and Pahaquarry, there is a slight decrease from last year. The increase is confined mostly to the southern portion of the

county, where the population is more rapidly augmenting.

School Houses Built.—There have been erected three school buildings during the year, viz.: at Centreville. Port Colden and Hope. All of these buildings are of a first class character, and were obtained only after severe struggles. The first named is not so large as the other two, but all its appointments are complete. That at Port Colden is a brick structure, and will endure through coming generations. For years the school in that large district had been kept in the damp basement of an old church, and the attempt to build was steadily resisted by some wealthy individuals who had no direct personal interest in the school. A year ago last July, however, a district tax of \$3,000 was obtained, and a special act was passed by the last Legislature authorizing the trustees to issue bonds for \$2,000 additional to complete the house. The property is now one of the best and most valuable in the county, being reported as worth \$5,500.

At Hope, for more than twenty years, efforts were made by the friends of education to secure a school building commensurate with the wants of the village, in the place of a little stone structure dignified with the title of school house. These efforts, however, were systematically thwarted by its opponents, and it was not until the new school law was inaugurated that it became possible to secure the long cherished object. If it had not been for the law, it is safe to conclude that a new building could not have been obtained. As it is, a fine location has been selected, and a commodious building constructed, of which its friends and the people of Hope generally may feel proud.

In this connection, I wish to do justice to the perseverance, skill, and I might say, diplomacy, which have characterized the labors of

John H. Angle, Esq., District Clerk in bringing about this glorious result. He is entitled to the thanks of the community.

Houses in the near future.—New buildings are to be erected soon at Port Murray and Pittengerville. About two years ago a tax was ordered for a building at Oxford Furnace, but for some reason the erection has been delayed. I am now informed that it will positively be built within the year. Improvements, more or less extensive in the way of remodeling, repairing, furnishing, etc., have been made in ten districts, while seven districts have put up suitable outbuildings. I think it may be inferred from this exhibit, that if Warren county is not accomplishing all that she should in the way of building new school houses, yet there is a growing public sentiment in that direction, and that the future will witness greater results than has the past. The more new houses that are erected will make it easier to secure others where needed, since the people of such districts will be stimulated to obtain as good school accommodations as their neighbors have. In this way the good work will go on in a constantly accelerated ratio of progress.

Teachers.—The Board of County Examiners was reorganized last May, and now consists of Rev. II. C. Putnam, of Oxford Furnace, E. Dietrich, of Columbia, and William II. Prouty, Principal of the Washington Public Schools. They are all skilful and experienced instructors, are now engaged in the work, and have the confidence of the teachers of the county. During the year eighty-seven certificates were granted; two of the first grade, seven of the second grade and seventy-eight of the third grade. Twelve applicants were rejected. Private examinations were given in exceptional cases only, and then simply provisional certificates were granted, valid no longer than the time of the next quarterly examination.

The average salary per month paid to male teachers is \$48.20, as compared with \$45.18 last year, and to female teachers \$28.40, as compared with \$27.75. There is quite a demand for the better class of male teachers to be hired for the year. We have, of course, the usual proportion of young male teachers who are making teaching a stepstone to something else which they deem higher. Such, as a general thing, do not take the same interest in their work that a professional teacher does, and do not teach more than one or two terms in one place. They accomplish comparatively little. I am rejoiced to see that there is a growing desire for larger districts, so that teachers of good professional standing may be employed by the year, and thus obviate one of the greatest hindrances to the success of our schools, viz.: the too frequent change of teachers.

Conclusion.—I have about finished the labor of arranging the districts, so that, in my humble judgment, no important changes, if

the law remains as it is, will be needed for some time to come. The

number of schools in the county is now ninety-three.

The difficulties with district boundaries having been adjusted, more time will be left for the other and far more pleasant duties of the office, which are by no means light.

## APPENDIX.
